Elevate your Email Security
ES Mail ℠

Email-related security breaches account for nearly 90% of all cyberattacks.
Built natively for Microsoft Office 365, with Elpha Secure Mail, you can combat email-based attacks directly from your inbox.

Deploy
- Activates in minutes with a cloud-based security layer
- Integrates directly with Microsoft O365 via native API connections
- Minimal permissions enable a faster and more secure setup

Protect
- Detects & blocks malicious links, domains, and file-based threats
- Intercepts spam and phishing attempts to reduce exposure
- Helps keep email environments secure

Simplify
- User-friendly configuration and minimal ongoing modifications
- Robust security without administrative burden
- No disruptions to end-users

Strengthen
- Complements Microsoft Exchange Online Protection (EOP), extending coverage beyond baseline defenses
- Enhances email security and closes protection gaps

Elpha's Financial Fraud Detection (FFD)

Leveraging a proprietary, real-world cyber incident data set, Elpha's FFD is your critical safeguard against financial fraud schemes and inadvertently falling victim to high-impact email scams. Elpha's FFD is designed to detect and flag:

Fraudulent payment instructions   Deceptive tax-related directives

Suspicious cryptocurrency transactions
