## Alpha Secure Launches ES Mail & Expands Cybercrime Limits to \$500,000

**NEW YORK (February 10, 2026)** – Alpha Secure, a fully integrated cyber insurance and security platform, today announced the launch of two new products to deliver enhanced security to small and middle market companies. These products include ES Mail<sup>SM</sup> and increased cybercrime coverage limits up to \$500,000. Both are available now in the U.S. for surplus lines and will begin underwriting business immediately where permitted.

ES Mail is a lightweight, cloud-based security solution providing clients with additional email protection on top of their current Microsoft 365 security. It helps intercept spam and bulk phishing attempts, helps detect financial fraud, and is available as part of every Alpha insurance policy.

“ES Mail can filter an additional twenty-five percent of the monthly hostile emails that target small and middle market businesses,” **said Alpha Secure Chief Technology Officer Paul Schottland**. “The best part is, it operates in combination and not as a replacement for our clients’ existing email security. Additionally, our Financial Fraud Detection alert flags and prompts our insureds to validate banking changes and transfers before sending money electronically. Ultimately, ES Mail helps prevent both cybercrime and ransomware events by proactively reducing potential cyber incidents.”

Alpha’s increased cybercrime limits offer clients additional options to meet their insurance needs.

“Our small and middle market clients are progressively facing AI-enhanced cybercrime risks at the same time traditional cybercrime incidents are continuing to surge. To address our client needs, Alpha’s ability to offer increased limits can help mitigate the impact of cybercrime loss,” **said Alpha Secure Chief Underwriting Officer Josh MacDonald**. “This expansion reinforces our commitment to providing insurance solutions that support small and middle market organizations as they navigate an increasingly complex digital environment.”

To learn more about the increased cybercrime coverage limit, contact your Alpha underwriter or email [underwriting@elphasecure.com](mailto:underwriting@elphasecure.com).
