

# Model 8 Advertisements

The first clipping (top left) is the only newspapers advertisements we found. The other ads feature consoles that may have an 8-tube Model 8 Chassis or a 6-tube Model 6 Chassis. The Model 8 console is believed to have the addition of a tone control. No physical examples are currently available for verification.

**THE NEW**

**YOU CAN BUY NO BETTER**

**BECAUSE-It has tone quality.**  
Jackson-Bell engineers have accomplished this through a special device which lowers and raises the pitch of the voice or instruments, to please the most exacting ear. Do not buy a radio before you have seen and heard this great invention. Remember-Tone is important.

**QUALITY DISTINCTION IN EVERY CABINET**

1. The Cabinets are the last word in Cabinet maker's art, the Jackson-Bell genuine tapetope lends an atmosphere to a home not obtainable in any other design.

2. Only the best shielded parts are used in the construction of these receivers, which are manufactured under R. C. A., Hazeline and LaTour patents.

3. These receivers are the result of the development of these Receivers, they embodying the last word in performance and beauty which qualifies the most discriminating buyers and which are found in these new cabinets.

In keeping with the position we have attained, we have endeavored to furnish the most complete line of Radio equipment. We have been able to offer a long period of service and a complete search. Receivers which are the last word in performance and quality, all other receivers offered in this price range.

We have reached to great lengths to make these receivers as comfortable as possible to place in the home. These receivers at such a low cost.
