

A portrait of a young man with dark, wavy hair and a light blue button-down shirt. He is looking directly at the camera with a neutral expression. The background is a blurred cityscape at dusk or dawn, with a body of water and a bridge visible. A street lamp is on the right side of the frame.

## A little about me

Hey,  
my name is Anton Chertkov (Tony) and I am a graphic designer. Ambitious, motivated and willing to learn – always searching for new inspiration and chances to increase my horizon. I was born in Russia and I have been living in Osnabrück, Germany for 18 years now, 5 of which belong to my design career. I discovered Design through photography, that I have been doing for over 10 years now.

One of my highlights so far was the participation in the international competition „WorldSkills Kazan 2019“, where I represented Germany in the skill „Graphic Design Technology“. I had two apprenticeship programmes in design and currently I am studying at FH Münster for the Bachelor of Arts design programme. Also I am currently teaching design basics for the first and second semesters as a tutor at my university. I volunteer part-time as a coach at WorldSkills Germany e.V. to intensively train the German competitor for the „WorldSkills Shanghai 2022“ and other future international competitions.

My best works are especially prominent in the fields of logo design, branding and photography. Although I am working in web design, editorial, animation and illustration as well. Over the last couple of years I managed to gain experience in clients interaction and project management. While creating a new product, the concept is as important as the implementation. For my future journey I plan to take the role of an art director and work on exciting projects for clients who want to make the world a better place. A dream of mine is to organize workshops on different design topics someday because I strongly believe that education has a high status if not the highest status in our society.
