POSTER AND SHORT TALK PRESENTATION GUIDELINES

All accepted abstracts are presented as posters during the meeting.

From among the accepted abstracts, authors of the highest-rated abstracts will be selected to deliver short oral presentations of their work in addition to presenting their posters. Authors whose abstracts are not selected for a short oral presentation will be notified accordingly. If authors do not receive an invitation to give a short oral presentation, their abstract has not been selected for oral presentation by the Abstract Review Committee.

If an abstract is not accepted for poster presentation, the presenter may request a full refund of the registration fee by contacting congress@cimt.eu. However, if your abstract is accepted but not selected for a short talk presentation, this policy does not apply.

All accepted abstracts will be published online approximately one week before the meeting. The abstracts will also be published in the CIMT2027 conference app, which will be available throughout the conference, and in the Journal for Immunotherapy of Cancer shortly after the conference.

POSTER DISPLAY Abstract authors have received their conference abstract number and their poster session schedule together with their abstract presentation notification.

- Each poster will have 1 meter **(width)** by 1.4 meter **(height)** of space available for display.
- Poster boards will be numbered.
- Posters are displayed throughout the conference.
- Mounting material will be made available on site.
- There is no poster printing facility on site

ORAL TALK IN SHORT-TALK SESSION Abstract presenters selected for short talk presentation are notified by email of their session schedule.

Short-talk presenters will have 10 minutes for the oral talk and an additional 5 minutes for discussion.

Please hand in your presentation to the technician at the speakers' registration desk in the Rheingoldhalle Congress Center with enough time to spare. Please bring a data storage device compatible with Windows as the lecture rooms are equipped exclusively with Windows PCs. You may want to carry a second data storage device in case there is any unsolvable technical problem.

Please note that the **projection ratio is 16:9**. Please contact us if your presentation requires any special technical set-up.

POSTER AWARDS

At the meeting, all poster presentations will be judged by an international judging panel, which will select the recipients of the 2027 Poster Awards. The winners will be honored during the conference.
