

The Best Defense Against Post-Op Blood Clots

The Leading Mobile Compression Device

Convenient At-Home DVT Prevention

Defender™ Mobile Blood Clot Prevention is a self-contained, compact DVT therapy device delivering asymmetric compression that replicates the blood flow of an ambulating patient. The Defender™ device is tubeless, portable, lightweight, and battery-operated. With a rechargeable battery and no separate pumps and hoses, patients can use it at all times, ensuring maximum mobility and safety throughout the continuum of care.

Product Features

- Simple One Touch Operation
- Whisper Quiet Pump with Inflation to Clinically Proven 55 mmHg
- Rechargeable Battery Lasts up to 24 Hours
- Breathable, Lightweight Wrap for Enhanced Comfort
- Universal Right & Left Wrap Design Allowing Easy Calf Placement
- Easy to Read LCD Display with Low Light Night Mode

Indications

- Aids in the Prevention of DVT
- Enhances Blood Circulation
- Diminishes Post-operative Pain and Swelling
- Reducing Wound Healing Time

Specifications

- Device Dimensions: 5.17" x 2.6" x 1.48"
(125mm x 62.5mm x 33.3mm)
- Weight : Approximately 0.74 lbs. (335g)
- Modes of Operation: Cyclic
- Source of power: 5Vd.c. @ 2A
- Battery: 3.7 Li-ion Battery (Runtime: 24 hours)
- Cycle Time: 60 Seconds
- Leg Compression Pressure (non-adjustable): 55 mmHg

System Operating Environment

- +5°C - 40°C (41°F-104°F)
- Humidity 30% - 75%
