DURAFORM FORMPLY

Durable Film-Faced Formply

DURAFORM Film Faced Formply is a high performance construction material designed for durability & versatility

This Formply features a Polypropylene plastic film coating on both form faces, enhancing moisture & abrasion resistance. Designed for repeated use in concrete forming applications.

DURAFORM Formply Provides a uniform concrete finish and reduces surface defects.

Release agent - Apply a concrete release agent before pouring concrete, clean the surface after use.

Always reseal the cut edges of Formply to prevent swelling from moisture absorption. DURAFORM Formply can be reused multiple times with proper care and maintenance.

THICKNESS: 18MM
DENSITY: 580KG/M3
EDGE SEALANT: WATER REPELLENT
ADHESIVE: PHENOLIC - A BOND
SIZE: 2440MM X 1220MM

KEY FEATURES

- Durable reusable Formply
- Plastic film on both form faces
- 11 layer ply
- A-bond Adhesive
- Can be reused multiple times
- Cost effective
- Concrete surface finish NZS 3114: F5
- All edges are sealed
- Pallet size = 50 sheets
