FORMWORK SYSTEMS

SPEED BRACKET

YOUR ULTIMATE ADJUSTABLE FORMWORK BRACKET SOLUTION

The **SPEED BRACKET** simplifies the process of formwork installation, cuts down install time, and keeps your projects running up to **SPEED**. It's a clever, dependable method to back your formwork, keeping your business running smoothly, steadily, and confidently with every project.

The **SPEED BRACKET** is the strongest formwork bracket system in the industry. With two extendable insert arms and formwork fixture plates strategically placed, you can support formwork/boxing for slabs from 100mm through to 600mm thick with one system.

The **SPEED BRACKET** allows contractors to increase their productivity in multiple applications, the formwork fixture plates can be mounted to wood, steel, or plastic formwork, using **DUPLEX** screws.

You can pin our system down to your subbase with **CANZAC DURA-PINS**, the most durable steel forming pins/stakes on the market, or you can fix the bracket to site concrete with our masonry anchor bolts.

This system is a real time and money saver, your return on investment is great, and our product stands the real test of time. We're well aware of how tough contractors can be on the job with equipment that's used repeatedly in the field. That's exactly why we've created a solution that not only makes on-site work faster, but is also super durable and built to last for years.

The Speed Bracket® is available for rental.

Contact **CANZAC** for the best system for the best result!

PRODUCT	CODE	DESCRIPTION	UNIT
	64 030	Speed Bracket	Each
	98 137	Dura-Pin 19mm x 915mm Long with Holes	Each
