Improving the performance of concrete worldwide®

ROMBUS PAVEMENT

ROMBUS FUSION V2

STRONGER, SMOOTHER & BUILT FOR HEAVIER LOADS

Rombus Fusion V2 builds on the trusted performance of our original grid with added strength, speed, and simplicity. Its thicker profile, upgraded hexagonal cell structure, and overlapping joints offer improved load distribution and a smoother, more seamless finish, especially in high traffic or fatigue prone areas.

It's designed to cover more ground per sheet, reduce the need for expansion joints, and streamline installs. Saving time without compromising durability.

Ideal for container yards, mining, and repeated-load zones, Fusion V2 is the go-to when you need a smarter, cleaner, heavy-duty solution.

KEY FEATURES

- No Formwork cost
- No Reinforcing cost
- No pumping cost
- No sawcutting cost
- Stronger, Faster, Cheaper, Greener

APPLICATIONS

- Industrial
- Concrete Construction
- Recycling
- Farming & Agriculture
- Landscaping & Domestic Applications
- Retail Centres
