JOINT FILLERS & SEALANTS

DUROSEAL 50FC

ENGINEERED CONCRETE JOINT SEALANT

Duroseal 50FC is a premium, high-performance single-component hybrid polymer sealant engineered specifically for concrete construction and expansion joint applications. Designed to meet the rigorous demands of commercial and industrial environments, it delivers exceptional adhesion to concrete substrates while maintaining long-term flexibility and movement capability.

Formulated for superior weathering performance, Duroseal 50FC provides outstanding UV resistance. Its advanced hybrid polymer technology ensures excellent durability, strong bond strength and consistent performance over time even in high-traffic or structurally dynamic environments.

KEY FEATURES

- Permanent flexibility + 50% joint movement capability
- Excellent adhesion to concrete substrates
- UV resistant, suitable for internal and external applications
- Outstanding weatherability
- Cures to a tough, durable, elastic finish
- Paintable after curing
- Trafficable
- Easy to gun & tool
- Low VOC / odourless

APPLICATIONS

- Concrete construction joints
- Joints between Precast / Tilt Up panels
- Expansion joints
- Perimeter slab joints
- Many other applications
