

CANZAC® GROUP

Improving the performance of concrete worldwide®

CURING SYSTEMS SINAK VC-5

TECHNICAL DATA

COVERAGE RATES

Two-coat coverage rate is 14 square meters per litre for smooth trowelled concrete. two coats are required , apply the 2nd coat perpendicular to the first , once the first coat has dried, (dry to touch) overall coverage per pail = 132 m2

PRECAUTIONS

For use on freshly placed concrete surfaces only. Hardwood and engineered glue down wood floors (may) require an application of SINAK V Poxy™. Do not allow VC-5™ to come in contact with any glass, metal or painted surfaces. VC-5™ left to dry on the surface may result in streaking, whiting or staining. Immediately wipe affected surfaces with a clean water-saturated cloth, then wipe dry with a second clean cloth. For questions regarding VC-5™ contact CANZAC.

COLD WEATHER INSTALLATION

DO NOT apply below (1 °C). Allow ample time between coats for drying. If the temperature is expected to drop below (0°C), cover treated areas with thermal blankets. Contact SINAK for additional information. DO NOT allow VC-5 to puddle or flood the surface.

STORAGE & HANDLING

VC-5™ has an indefinite shelf life when stored in a cool dry area out of direct sunlight. Must be kept in tightly secured containers to prevent evaporation and contamination. VC-5™ MUST be protected from freezing. Product that has frozen will not function as intended and should be discarded

TESTING

- ASTM C-39 (Compressive Strength). Equal to 28 day water cure results.
- ASTM C-1202 (Chloride Ion Penetration) (Coulombs). Equal to 28 day water cure.
- BS-1881 P5 (Initial Surface Absorption). Superior to 7 day water cure.
- ASTM C-309 Type 1, Class A Complies with Section 6 Water restension.
