COMPANY OVERVIEW

dormakaba Workforce Solutions is a leading provider of workforce management solutions to a wide range of industries. Building on its foundation of automated workforce management tools, dormakaba provides systems that allow clients to efficiently collect, validate, and process workforce time and labor information for enterprise optimization. Automation is accomplished through a suite of flexible products that include the b-comm software and physical time collection devices that support both badge-based and biometric authentication options. Additional time collection methods include mobile, interactive voice response, web time clocks, and PC time clocks.

INTEGRATION OVERVIEW

The b-comm for PeopleSoft Time and Labor platform is communication software that links PeopleSoft Time and Labor to dormakaba time collection options. Automating the data collection process can result in a substantial ROI to your company because it leverages the time and attendance rules engine in PeopleSoft, saving you the cost and overhead associated with standalone time clock systems. The validated, bi-directional integration is designed to maximize the features of your PeopleSoft Time and Labor system.

Product features include:

- Connection to PeopleSoft from dormakaba time collection devices
- Simple, intuitive time clock user interface for improved user acceptance and accuracy
- Recording of employee punch time including clock in, clock out, break, and meal, transfer
- Recording of employee elapsed events including vacation time, sick days, jury duty, and holidays
- Recording of additional task (labor) data in the form of simple task or multilevel recording
- Real-time view of employee activities, including punch times, labor data, and elapsed time
- Support for online and offline data collection
- Scalable system to meet current and future data collection needs

ORACLE
Validated Integration
PeopleSoft

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premises Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
