

Time recording and access control with B-COMM for SAP SuccessFactors®

Benefits at a glance:

- Integrated solution for time recording and profile-managed access control with SAP SuccessFactors
- Data exchange with SAP SuccessFactors
- Time recording terminal connected to SAP SuccessFactors Time Tracking
- Master data maintenance in SAP SuccessFactors
- Automated system operation
- Web-based interface
- Individual system expansion with additional dormakaba modules

dormakaba B-COMM for SAP SuccessFactors is a software solution for time recording and access control. It performs crucial tasks and processes that would otherwise be carried out in the superordinate SAP SuccessFactors system. What's more, the solution handles the necessary dialogue with linked terminals and recording devices, and processes the incoming data. To this end, B-COMM for SAP SuccessFactors works autonomously in the background.

The solution has been specially developed to be integrated with SAP SuccessFactors modules, such as Employee Central and Time Tracking. This custom development makes for an optimal adaptation to the requirements of SAP SuccessFactors. Seamless communication with SAP SuccessFactors is ensured via standardized interfaces such as OData APIs and other web-based protocols.

Through a modern, browser-based user interface, B-COMM for SAP SuccessFactors provides a user-friendly solution for time recording and profile-managed access control. This boosts efficiency and optimizes integration into your existing system environment.

Features

Time recording

The solution is suitable for all SAP users who record working hours and wish to process them further in SAP SuccessFactors. It includes device management, and overviews of bookings and master data. Additional modules expand time recording possibilities, such as the WebTerminal or mobile ERP Time App.

Access control

B-COMM for SAP SuccessFactors provides simple, profile-managed access control so you can manage who is entering your premises to keep your buildings and staff safe. The solution can be seamlessly integrated into the wide-reaching dormakaba access control system.

Advice and consultation

Qualified application consultants work together with you and your SAP SuccessFactors advisor to develop a solution tailor-made to your needs. What's more, we have a highly-motivated specialist team on hand to help you who are experts in SAP SuccessFactors interfaces, communication and dormakaba terminal technology.

An international company

We are active on an international scale, which sets us apart from other providers. There are over 1,800 dormakaba installations with ERP connections in operation across the globe (on the ERP market). Satisfied customers put their trust in dormakaba in over 60 countries. Our country-specific branches and partner companies guarantee seamless customer service.

Software

B-COMM for SAP SuccessFactors is being continuously developed and so is always up to date. You can also choose from a range of useful modules to flexibly put together your software solution and expand and optimize your application to meet your specific needs.

Hardware

B-COMM for SAP SuccessFactors communicates directly with dormakaba terminals 96 00 and 98 00. dormakaba terminals are therefore a central hub for communicating with employees.

Quality

All components have been developed and produced in line with a quality management system tested according to ISO 9001. dormakaba employees are dedicated to meeting your quality standards, using modern development methods and tools.
