

Sawyer®

Product Catalog

SINCE 1984

Every Sawyer product you buy contributes to our common humanity, bringing Sawyer water filtration systems to people in need all around the world. Since 2008, we've teamed up with over 140 charities in 80 countries to provide long-term sustainable relief domestically, internationally, and in disaster situations. Together, we're saving millions of lives.

Thank you.

REPELLENTS

From the backcountry to the backyard, our repellents offer long lasting, effective protection for the entire family.

PERMETHRIN

Clothing & gear treatment.

REPELS AND KILLS

For use on clothing, tents, sleeping bags, and other outdoor gear, Sawyer Permethrin is more than just an insect repellent — it actually kills ticks, mosquitoes, spiders, chiggers, mites, and more than 55 other kinds of insects.

LASTS 6 WEEKS OR 6 WASHINGS

Providing a fantastic odorless barrier of protection, a single application of Permethrin lasts for 6 weeks or 6 washings. Using it on outdoor gear also helps reduce the mosquito population in your camp.

PROTECTION FROM DISEASES

Repels mosquitoes which may carry the Zika Virus, Yellow Fever, Dengue, and Chikungunya. Repels and kills ticks which may carry Lyme Disease.

ODORLESS

Sawyer Permethrin is odorless after drying and won't damage fabrics, finishes or interfere with waterproofing.

PROTECTION FOR YOUR DOG

Sawyer Permethrin can be applied to dogs and help control mosquitoes, and fleas for 35 days and against ticks for 6 weeks. Official application instructions for use on dogs can be found at sawyer.com/dogs.

PERMETHRIN PRODUCTS

THINGS TO TREAT

Treatment for clothing, footwear, work wear, bibs, canvas, work-stations, seat covers, dog beds, hammocks, chairs, tents, camping gear, mosquito netting, nets, canopies, screen enclosures, outside of sleeping bags, backpacks, ground cloths, and other fabrics.

PICARIDIN

The gold standard for topical insect repellents.

EFFECTIVE

Derived from piperine in pepper plants, Sawyer Picaridin is a synthetic replica of a natural solution and is highly effective at repelling mosquitoes, ticks, and is more effective than DEET at repelling flies such as biting flies, black flies, sand flies, gnats chiggers, fleas, and no-see-ums. Additionally, it won't damage gear or equipment like liquid DEET. Picaridin repels mosquitoes which may carry the Zika Virus, Yellow Fever, Dengue, and Chickungyna, and repels ticks which may carry Lyme Disease.

LONG LASTING

Picaridin spray lasts 12 hours against mosquitoes and ticks and while the lotion lasts 14 hours. Both spray and lotion repel flies for 8 hours.

FAMILY FRIENDLY

Picaridin is a great for the whole family and is also safe for use during pregnancy. It's considered to be the repellent of first choice by the Public Health Agency of Canada's Canadian Advisory Committee on Tropical Medicine and Travel for travelers as young as 6 months.

ECO FRIENDLY

Sawyer's BOV (bag on valve) continuous spray contains no propellants like an aerosol, so you get more repellent and limit the propellants in the environment. It also sprays in all directions.

DEET

DEET has a long documented use by humans without any credible scientific evidence that it is harmful to humans. Often when people experience negative affects when using DEET in liquid form, it is not the DEET itself that is causing the irritation but the alcohol the DEET is mixed with.

Alcohol is very rough on the skin. Unfortunately many people have the misconception that if they use a lower percentage DEET (like a 30% can of aerosol DEET). They are “safer” because they are exposing themselves to less of the chemical. Unfortunately that 30% DEET is mixed with alcohol and alcohol opens up the pores, irritates your skin and the effectiveness of the DEET diminishes quickly. This is why you constantly have to reapply multiple times throughout the day.

DOSAGE VS CONCENTRATION

When using a lower concentration of DEET like a 30%, you are still exposing yourself to pure 100% DEET molecules, just a smaller amount of them so the effectiveness diminishes quicker. Therefore, our recommendation is to bypass the alcohol altogether and skip right to 100% DEET. By using a smaller dose of a higher concentration of DEET you can apply the repellent less frequent and avoid loading your skin with irritating alcohol. At the end of the application you have the same amount of DEET molecules on your skin to repel bugs.

CONTROLLED RELEASE

20% Controlled Release, low DEET absorption formula. Reduces DEET adsorption by 67% per application. Provides 11 hours of protection from mosquitoes..

WATER FILTRATION

Sawyer set the new standard for water filtration when we introduced hollow fiber membranes to the outdoor industry over a decade ago. Our line of innovative products offer solutions for any situations, from the backcountry to the remotest corners of the world.

THE SAWYER STANDARD

When you want to be sure your water is safe to drink, use a Sawyer Filter. Sawyer hollow fiber membranes are the highest quality in the industry and here's why:

FIBER STRENGTH - KNOWN AS HOOP STRENGTH

SAWYER HOLLOW FIBER MEMBRANES

OTHER HOLLOW FIBER MEMBRANES

WHAT IT MEANS:

Thicker fiber walls and smaller inner diameter of the fibers make Sawyer fibers stronger than fibers of other typical hollow fiber membranes.

WHY IT'S IMPORTANT:

Stronger fibers allow for aggressive backwashing and shock resistance. Meaning each Sawyer filter can be continually backwashed forcefully restoring up to 98% of the original flow rate.

Because of this exclusive technology, the Sawyer Mini Filter™ and Micro Squeeze Filter™ can be cleaned and reused for up to 100,000 gallons. The Squeeze Water Filter™ offers a lifetime guarantee.

Read the entire Sawyer Hollow Fiber Filter Strength Report at: Sawyer.com/downloads

ABSOLUTE MICRONS

WHAT IT MEANS:

- No pore is larger than 0.1 micron in Sawyer filters.
- Sawyer WILL not use average or nominal pore size ratings.

WHY IT'S IMPORTANT:

- Without absolute pore size, larger holes are present which could allow bacteria, protozoa, cysts, or viruses to pass.
- No harmful bacteria, protozoa, or cysts can pass through the Sawyer 0.1 micron filter.
- All Sawyer filters will remove 100% of microplastics from the water.

100% INDIVIDUALLY TESTED 3 TIMES

WHAT IT MEANS:

Every Sawyer filter is performance tested three different times during the manufacturing process for your protection.

WHY IT'S IMPORTANT:

To ensure every Sawyer filter is 0.1 absolute micron and that no harmful pathogens can pass through the filter.

Every filter is 3X tested. Sawyer does NOT batch test or statistically test for failure. Testing occurs after the fiber element construction and twice after casing assembly to ensure no harmful pathogens leak through the sealed case or internal o-rings.

PROTECTED FIBERS

WHAT IT MEANS:

Our hollow fiber membranes are fully encased and sealed to keep them protected.

WHY IT'S IMPORTANT:

When fibers are not enclosed, physical damage of exposed fibers could allow harmful pathogens to pass through.

CNOC COLLABORATION

A new line of premium water filtration systems

SP303 (CLEAR)

SP304 (BLUE)

SQUEEZE WATER FILTRATION SYSTEM X CNOC PREMIUM 2 LITER BLADDER

UPC: 0-50716-00303-1 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Squeeze Filter
- 2 Liter Cnoc® Bladder
- Cleaning Coupling
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, Cysts, & Microplastics

FILTER CAPACITY: Lifetime Warranty

FIELD WEIGHT: 6 oz

BEST USES: Backpacking, hiking

SP302

SQUEEZE WATER FILTRATION SYSTEM X CNOC PREMIUM 1 LITER BOTTLE

UPC: 0-50716-00302-4 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Squeeze Filter
- 1 liter Cnoc® Bottle
- Cleaning Coupling
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Lifetime Warranty

FIELD WEIGHT: 5 oz

BEST USES: Hiking, travel

SP301

MICRO SQUEEZE WATER FILTRATION SYSTEM X CNOC PREMIUM 750ML POUCH

UPC: 0-50716-00301-7 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Micro Squeeze Filter
- 750ml Cnoc Pouch
- Cleaning Coupling
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Filter up to 100,000 gallons

FIELD WEIGHT: 4 oz

BEST USES: Hiking, trail running

SQUEEZE FILTER

A thru-hiker favorite for its no-fuss, easy maintenance design. The Squeeze Filter is fast flowing and ideal for multi-day hikes, and groups.

SP129

SQUEEZE WATER FILTRATION SYSTEM

UPC: 0-50716-00129-7 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Squeeze Filter
- 2- 32 oz Squeeze Pouches
- Gravity tubing
- Inline adapters
- Cleaning Plunger
- Mesh Carrying Case/Gravity bag

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Lifetime Warranty

FIELD WEIGHT: 3 oz

MICRO SQUEEZE

Everything you love about the Squeeze
in a lighter, more compact body.

SP2129

MICRO SQUEEZE FILTER

0-50716-02129-5 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Micro Squeeze™ Filter
- 32 oz Squeeze Pouch
- Drinking Straw
- Cleaning Coupling
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Up to 100,000 gallons

FIELD WEIGHT: 2 oz

MINI FILTER

Our lightest filter that lacks no versatility and is easy on the wallet.

MINI WATER FILTRATION SYSTEM

CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Mini Filter
- 16 oz Squeeze Pouch
- Cleaning Plunger
- Drinking Straw

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Up to 100,000 gallons

FIELD WEIGHT: 1.8 oz

GRAVITY FILTER

Great for groups and base camp.

SP160

ONE GALLON GRAVITY FILTER

UPC: 0-50716-00160-0 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Filter
Dual Threaded Mini Filter
- One Gallon Bladder
- Gravity Tube
- Cleaning Plunger
- Cleaning Coupling
- Hose Guide

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Up to 100,000 gallons

FIELD WEIGHT: 8 oz

WATER FILTRATION BOTTLE

Simply fill and drink.

SP140

WATER FILTRATION BOTTLE 1 LITER

UPC: 0-50716-00140-2 | CASE PACK: 2

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane
Squeeze Filter
- 1 Liter Bottle
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, and Cysts

FIELD WEIGHT: 5.5 oz

SUNSCREEN

Our sunscreen is formulated to work, whether you're playing hard or working hard. The unique bonding base makes it longer lasting, and more comfortable, so you can focus on your adventure.

SUNSCREEN

Once you try it, you'll know.

SAWYER STAY-PUT SERIES

Sawyer Stay-Put® SPF 30 sunscreen uses a non-greasy, "Breathable Matrix" Formula that spreads into all layers of your skin, uniquely penetrating where other sunblocks simply can't go. This allows Stay-Put sunscreen to bond with the skin while allowing sweat and water to pass over the sun-blocking compounds to prevent them from deteriorating.

Enriched with aloe vera and vitamins, Stay-Put SPF 30 is recommended for most uses, and a single application penetrates deep into your skin for all day sun protection. It's also engineered to be effective when combined with Sawyer insect repellents.

A SOLID BOND, A BREATHABLE MATRIX

While most sunscreens hold their lotions in the top two layers of skin, our Stay-Put SPF 30 sunscreen uses a special technology to bond the sun ray absorbing agents deeper into the skin.

The Stay-Put formula was engineered to spread the same volume of lotion over a larger cubic area of skin, requiring less lotion per area of skin and producing a more comfortable, breathable feel — all while providing great all-day protection. You'll hardly know you're wearing sunscreen.

SP1132

 Amy Stead

FIRST AID

Sawyer's first product in 1984 was the Extractor® Bite and Sting Kit and to this day it remains a staple item in camping departments. We're also proud to partner with Sam Medical to provide the most advanced splints and blister technology.

FIRST AID

Bites, blisters, and broken bones, we've got you covered.

THE EXTRACTOR® PUMP, SINCE 1984

Successfully used for over 30 years, the Extractor Pump is also a safe and useful first aid device for treating bee and wasp stings as well as spider, scorpion, fly, or mosquito bites.

The lightweight, small, and reusable Sawyer Extractor Pump Kit extracts venom and poisons from the bites and stings of snakes, bees, and more. The double chamber vacuum pump action is designed to provide powerful suction for the extraction of venoms and poisons without the need for scalpel blades or knives used in other kits. Because it's a pump — not a syringe — it's easy to use with one hand.

It most effectively retrieves venom from extremities and areas of body outside muscle areas; effectiveness varies with the location of the bite.

B6

EXTRACTOR® PUMP KIT

UPC: 0-50716-00224-9 | CASE PACK: 6 or 4 (B4)

KIT INCLUDES:

- Extractor® Pump
- Alcohol prep pads
- Adhesive bandages
- Sting care wipes
- Razor (for hair removal)
- Instruction manual

CLEAN WATER FOR ALL

When earthquakes, hurricanes, and other natural disasters strike, clean drinking water supplies get disrupted. The cost of transporting high volumes of water or bottled water gets expensive and heavy real quick. A single case of bottled water weighs the same as approximately 60 Sawyer water filtration systems. Sawyer Gravity Filtration Systems and Tap Filtration Systems not only provide significantly more clean water, they also make room for other incredibly important medicine and supplies. These systems can also provide peace of mind domestically in areas prone to natural disasters or for surprise boil alerts.

Using Sawyer Filters in an Emergency

These systems use the exact same filters and technology as our domestic retail systems but often with slightly different accessories or components to keep the cost down. Sawyer stockpiles these water filtration systems to deploy to relief partners anywhere in the world. International relief organizations and governments appreciate the long-term solution we provide. With the help of our amazing partners, we've been able to help millions of people in countries like Haiti, Japan, Pakistan, Brazil, and Indonesia get back on their feet during a devastating time.
