JOB SELECTION PROGRAMS AND PICKS - Job Pick

2023 MS1 TRK JOB PICK

Note #	Note Detail
1	Various tour (As required)
2	Various RDO's (As required)
3	Various reporting location – Systemwide (As required)
4	If upon completion of a thirty (30) calendar day qualification period the employee fails to qualify for this position, he/she will be reassigned to whatever vacancy exist at that time.
5	This position is a Pre-pick. Resume Required
6	This position will be locked in for a period of 2 Years
7	This position will be locked in for a period of 3 Years
8	Will be responsible for the maintenance operation and supervision of the track inspection cars. Must have a working knowledge of all tracks and yards throughout NYCTS system, and must be able to inter-face with line managers, superintendents, dispatchers and yardmasters, to assure the efficient and safe operation of the track inspection cars. Must be able to be qualified to operate the track inspections cars if so required. Knowledge of NYCT'S rules and regulations (including signaling and train operations) is required. Must be computer knowledgeable and able to use printers, hard drives and data units and other personal computer equipment. Will be responsible for the supervision of all repairs, maintenance calibration adjustments and modifications to the diesel, mechanical, electrical, pneumatic on board the track inspection cars. Must be able to read and interpret, car equipment diagrams for troubleshooting. This position requires good knowledge of the maintenance and operation of diesel, mechanical, electrical, laser, computer and other specialized equipment onboard the track inspections cars. Candidates will receive on the job and also manufacturers' training on the special equipment and measuring/inspection equipment on board of the track inspection cars; employees must demonstrate proficiency in understanding the material offered by manufacturers' training and a good understanding of the overall measuring and inspection systems on the track inspection cars. Employees must be able to read and interpret measuring equipment diagrams for troubleshooting, evaluate measuring equipment conditions, and diagnose and calibrate electrical, mechanical, and computer issues on the track geometry, appplanix, tunnel clearance, right of way video, thermal image, KLD, and ultrasonic inspection systems that collect data along all NYCT main line tracks. Work hours and RDO'S may change at any time due to the needs of the track inspection car's runs and the availability of track access.

Note #	Note Detail
9	Applicant must possess the capabilities to perform the following duties. Must have good knowledge of the NYCT Track System, track geometry, track ultrasonic testing and track devices. Must be capable of learning and analyzing interpretation of internal rail flaw ultrasonic test data. Must have computer skills, be able to use printer's hard drives and other personal computer equipment. Applicants must know GEO Dude (NYCT rail defect data entry software application).
