

Some provisions within this chapter are subject to appeal to the Environment Court. Provisions that are under appeal are identified by a red box around the provision and a footnote identifying the appellant. The appeal documentation, including the scope of the appeal and relief sought, is available on the Council's Appeals webpage on the Wairarapa Plan website.

RLZ – Rural Lifestyle Zone

The purpose of the Rural Lifestyle Zone is to provide an area for rural lifestyle living, while allowing for the nearby Rural Zone's continued function as a productive working zone that is not compromised by ad hoc or sporadic rural lifestyle activities.

The Rural Lifestyle Zone comprises areas identified within the outer edges of Masterton where there is a higher concentration of rural living facilitated through smaller allotment sizes or where there is capacity to accommodate new rural living opportunities. In addition, this land is not suited to conventional residential subdivision because of the absence or limited accessibility of reticulated services. Also, some of this land may have physical limitations to more intensive development such as on-*site* servicing, topography, ground conditions, instability, or natural hazards where more intensive development may cause or exacerbate adverse effects on the environment.

Subdivision, use, and development in the Zone is expected to provide a transition from residential areas to the other rural zones, while retaining a sense of spaciousness and prevailing rural character. This reflects the use of land and *buildings* for *residential activities* and small-scale rural production activities in a rural setting. For this reason, rural lifestyle character and amenity are managed through density and the consideration of *building* locations at the time of subdivision, in addition to the use of *building* setback controls from boundaries. Rural activities and home businesses and activities that are complementary to the rural activities of the *site* are provided for.

Rural lifestyle areas, being close to urban areas, can attract other activities that are not appropriate including: general residential living at urban densities, stand-alone retail or commercial activities, and industrial activities. Such activities are discouraged from the Rural Lifestyle Zone as they can reduce rural character and amenity, and lead to reverse sensitivity and cumulative adverse effects. They also erode the use and function of the Town Centre, Neighbourhood Centre, Residential, Mixed Use, and Industrial Zones.

Objectives

RLZ-O1	Purpose of the Rural Lifestyle Zone
<p>The Rural Lifestyle Zone is used primarily for a residential lifestyle within a rural environment on lots smaller than those of the General Rural Zone, while still providing for <i>primary production</i> to occur.</p>	
RLZ-O2	Character of the Rural Lifestyle Zone
<p>The predominant character of the Rural Lifestyle Zone is maintained, which include:</p> <ul style="list-style-type: none"> a. low density residential living on rural lifestyle blocks, characterised by predominantly 1- to 2-storey <i>buildings</i> and high levels of on-site amenity, privacy, and large areas for landscape planting and small-scale <i>primary production</i> activities; b. a diversity of topography and land quality, including land without significant <i>primary production</i> values; and c. a general absence of urban <i>infrastructure</i>. 	
RLZ-O3	Enable compatible activities
<p><i>Residential activities</i>, small scale <i>primary production</i> activities, and other activities that are compatible with the character and amenity values of the Rural Lifestyle Zone are provided for.</p>	

Policies

RLZ-P1	Compatible activities
<p>Enable <i>residential activities</i>, <i>primary production</i>, and other activities that are compatible with the purpose, character, and amenity values of the Rural Lifestyle Zone.</p>	
RLZ-P2	Incompatible activities
<p>Avoid activities that are incompatible with the purpose, function, and predominant character of the Rural Lifestyle Zone and/or activities that will result in:</p> <ul style="list-style-type: none"> a. reverse sensitivity effects and/or conflict with permitted activities in the Rural Lifestyle Zone and adjacent zones; b. the establishment of <i>commercial</i>, <i>rural industry</i>, or <i>industrial activities</i> in the Rural Lifestyle Zone that are more appropriately located in the Commercial and Mixed Use Zones, General Rural Zone, or General Industrial Zone; 	

	<ul style="list-style-type: none"> c. urbanisation of the Rural Lifestyle Zone as a consequence of residential development; or d. adverse effects, which cannot be avoided, remedied, or mitigated, on: <ul style="list-style-type: none"> i. residential activities or <i>primary production</i> activities; and ii. rural lifestyle character and amenity values.
<p>RLZ-P3</p>	<p>Rural lifestyle character</p>
<p>Provide for subdivision, use, and development that supports the purpose, character, and amenity of the Rural Lifestyle Zone, by:</p> <ul style="list-style-type: none"> a. maintaining low density of single detached <i>residential unit</i> on a <i>site</i>, maintaining larger rural lifestyle lot sizes, and providing for high quality and spacious on-<i>site</i> amenity; b. maintaining <i>building height</i> and form that achieves the planned built character of predominantly 1- to 2- storey <i>residential units, buildings, and structures</i> within a spacious rural lifestyle setting; c. <i>building height</i>, bulk, and location maintains a reasonable level of sunlight access and privacy and to minimise visual dominance effects to the adjacent <i>sites</i>; d. <i>buildings</i> are setback from road and side boundaries to maintain the spacious landscape character of the area; e. ensure allotments are of large enough size to: <ul style="list-style-type: none"> i. be self-sufficient in the provision of on-<i>site</i> water supply, wastewater, and stormwater disposal; ii. be in keeping with the spacious landscape character of the area; iii. not exacerbate any physical limitations such as land instability; and iv. provide for setbacks from <i>primary production</i> activities; and f. avoiding, remedying, or mitigating <i>reverse sensitivity</i> effects.
