

Some provisions within this chapter are subject to appeal to the Environment Court. Provisions that are under appeal are identified by a red box around the provision and a footnote identifying the appellant. The appeal documentation, including the scope of the appeal and relief sought, is available on the Council's Appeals webpage on the Wairarapa Plan website.

SARZ – Sport and Active Recreation Zone

The purpose of the Sport and Active Recreation Zone is to provide for areas used predominantly for a range of indoor and outdoor sport and active *recreational activities* and associated facilities and *structures*, including larger-scale *buildings*.

This Zone applies to open space that provides for a range of sport and *recreation activities* including organised sport and recreation for local and regional communities in parks, sports grounds, and multi-sport facilities. Such areas will normally have associated *buildings* such as club rooms, spectator stands, changing sheds, or toilet facilities. Examples include Memorial Park Masterton, Gladstone Sports Complex, Colin Pugh Sports Bowl, and Solway Showgrounds.

Sport and recreation areas are predominantly characterised by large open space areas with associated buildings and facilities that vary in scale depending on the sport and recreation activities that take place there. The level of development anticipated in this Zone is expected to be higher than the Open Space Zone and can involve a mix of temporary and permanent structures and activities and generate noise, light, and traffic effects in surrounding neighbourhoods.

Some of the land in the Sport and Active Recreation Zone is subject to Reserve Management Plans prepared under the Reserves Act 1977. While Reserve Management Plans determine what types of land uses are appropriate for public open spaces that are classified as reserves, the RMA is responsible for managing the effects on the environment of activities taking place on those reserves.

There may be a number of rules that apply to an activity, building, structure, or site. Resource consent may therefore be required under rules in this chapter as well as other chapters. Unless specifically stated in a rule, resource consent is required under each relevant rule. The steps to determine the status of an activity are set out in the General Approach section in the How the Plan Works chapter.

Objectives

SARZ-O1	Purpose of the Sport and Active Recreation Zone
<p>The Sport and Active Recreation Zone supports a range of indoor and outdoor sport and active <i>recreational, community, and cultural activities</i> and associated facilities and <i>structures</i>.</p>	
SARZ-O2	Character and amenity values of the Sport and Active Recreation Zone
<p>The predominant character and amenity values of the Sport and Active Recreation Zone are maintained, and where possible enhanced, and are characterised by:</p> <ul style="list-style-type: none"> a. indoor and outdoor sport and active <i>recreation activities</i> and ancillary activities and structures; b. a larger scale of built development that supports <i>recreation and community activities</i>; c. compatible multi-functional use and co-location of activities and <i>structures</i>; and d. safe, accessible, and connected public spaces. 	

Policies

SARZ-P1	Compatible activities
<p>Enable activities, <i>buildings, and structures</i> which are compatible with the purpose, character, and amenity values of the Sport and Active Recreation Zone and consistent with any applicable Reserve Management Plan, while ensuring their design, scale, and intensity reflects the purpose, character, and amenity values of the Zone.</p>	
SARZ-P2	Potentially compatible activities
<p>Only allow activities that are compatible with the purpose, character, and amenity values of the Sport and Active Recreation Zone, considering whether they are:</p> <ul style="list-style-type: none"> a. consistent with any applicable Reserve Management Plan or reserve status under the Reserves Act 1977; b. ancillary to and/or support other activities within the open space area; c. of a scale and location compatible with the purpose, character, and amenity values of the area in which the activity or structure is located; d. not constraining the establishment and operation of other activities within the open space area, compromising safety, or restricting of public access to and across open space; 	

<p>e. of a form, scale, location, and nature that will not compromise established or planned open space activities in Reserve Management Plans and result in any conflict; and</p> <p>f. able to be serviced with adequate <i>infrastructure</i> and services.</p>	
SARZ-P3	Incompatible activities and development
<p>Avoid use and development that is incompatible with the purpose, character, and amenity values of the Sport and Active Recreation Zone or any applicable Reserve Management Plan, unless there is a <i>functional</i> or <i>operational need</i> to establish on the site.</p>	
SARZ-P4	Maintaining character and amenity
<p>Ensure effects generated by activities are of a type, scale, and level to maintain the character and amenity of the Sport and Active Recreation Zone and surrounding zones, including by:</p> <ul style="list-style-type: none"> a. ensuring the level of openness and vegetation and built development of recreation or community facilities reflects the purpose, character, and amenity values of the area of open space; b. ensuring <i>buildings</i> are suitably located and of an appropriate size for the proposed activity; c. providing visual separation between new <i>buildings</i> and existing <i>buildings</i> on neighbouring properties; and d. integrating new <i>buildings</i> and <i>structures</i> with existing built form. 	
SARZ-P5¹	Relocatable buildings
<p>Provide for the relocation of buildings while requiring the completion and renovation within a reasonable timeframe by:</p> <ul style="list-style-type: none"> a. requiring pre-inspection reports to be prepared that identify any reinstatement work required to the exterior of the building following the building relocation; b. ensuring that relocatable buildings have the same use as what they were previously designed, built and used for; c. requiring a performance bond as a security that reinstatement works will be appropriately completed in a timely manner; and d. maintaining and enhancing the amenity values of areas by ensuring the adverse effects of relocatable buildings are avoided, remedied or mitigated.
