

Some provisions within this chapter are subject to appeal to the Environment Court. Provisions that are under appeal are identified by a red box around the provision and a footnote identifying the appellant. The appeal documentation, including the scope of the appeal and relief sought, is available on the Council's Appeals webpage on the Wairarapa Plan website.

SETZ - Settlement Zone

The purpose of the Settlement Zone is to provide for small-scale coastal and rural settlements in the districts. The Settlement Zone largely comprises residential areas along with some *commercial activities* that provide services to local coastal or rural communities. The Settlement Zone also provides for tourist and traveller amenities, such as service stations, food and beverage outlets, and small-scale retail services.

The Settlement Zone applies in the following townships:

- Castlepoint;
- Riversdale;
- Cape Palliser;
- Ngawi;
- Whatarangi;
- Lake Ferry;
- Whāngaimoana; and
- South Featherston.

These townships have limited or no reticulated water services. In the Masterton District, these townships have reticulated wastewater services, but do not have reticulated water or stormwater and must provide for this on-site. In the South Wairarapa district, no reticulated water services are available in these townships and all water servicing must be provided for on site. There are no townships zoned Settlement in the Carterton District. Within the Riversdale Terraces Precinct in the Riversdale Beach Settlement Zone minimum site sizes are larger, to maintain residential character and amenity values.

Note: There may be several rules that apply to an activity, building, structure, or site. Resource consent may therefore be required under rules in this chapter as well as other chapters. Unless specifically stated in a rule, resource consent is required under each relevant rule. The steps to determine the status of an activity are set out in the General Approach section in the How the Plan Works chapter.

Objectives

SETZ-O1	Purpose of the Settlement Zone
The Settlement Zone predominantly provides larger sites for residential use and enables some community and small-scale commercial uses where they provide services to the local community.	
SETZ-O2	Character and amenity values of the Settlement Zone
Existing settlements are recognised and retain their existing character and amenity values.	

Policies

SETZ-P1	Enable appropriate and complementary activities in the Settlement Zone
Provide for activities and structures that support and maintain the character and amenity values anticipated for the zone, which provides for: <ul style="list-style-type: none"> a. predominantly low density <i>residential activities</i> on large sites that accommodate on-site servicing if reticulated <i>infrastructure</i> is not available in the area; b. small-scale <i>commercial</i>, tourism, hospitality, and general store activities that service the local coastal and/or rural communities and visitors; and c. <i>cultural activities, visitor accommodation, reserves, community and educational facilities</i> to meet the needs of local coastal and/or rural communities and visitors. 	
SETZ-P2	Maintain the character and amenity values of existing settlements
Maintain the role, function, and predominant character and amenity values for the zone, particularly activities and structures by: <ul style="list-style-type: none"> a. ensuring the intensity of development is predominantly single detached <i>residential units</i> on single sites, on larger lot sizes, and providing for high quality and spacious on-site amenity; b. maintaining <i>building height</i>, bulk, and form that is in keeping with the character and amenity values of the existing settlements, which includes built character of predominantly 1- to 2-storey <i>residential units</i> within a generally spacious setting; c. maintaining <i>building height</i>, bulk, and location that achieves a reasonable level of sunlight access and privacy and minimises visual dominance effects to the adjoining sites; 	

- d. within the Riversdale Terraces Precinct, maintaining the overall subdivision density and pattern of residential development;
- e. ensuring development that achieves attractive and safe streets and public open spaces, including by:
 - i. providing for passive surveillance;
 - ii. optimising front yard landscaping; and
 - iii. minimising visual dominance of garage doors;
- f. providing a good standard of internal amenity within sites including useable and accessible outdoor living areas for residents;
- g. providing for non-residential activities where they are compatible with *residential activities* and do not detract from the character of the settlement;
- h. maintaining significant outlooks from within public spaces in the settlements to coastal or rural areas;
- i. providing for pedestrian movement within the settlement, but with minimal use of kerb and channelling, and informal streetscapes as set out in Council's Engineering Development Standard 2023; and
- j. providing for low impact on-site *infrastructure* to service *residential* and non-residential activities.

SETZ-P3¹

Relocatable buildings

Provide for relocation of buildings while requiring the completion and renovation within a reasonable timeframe by:

1. Requiring pre-inspection reports to be prepared that identify any reinstatement work required to the exterior of the building following the building relocation;
2. Ensuring that *relocatable buildings* have the same use as what they were previously designed, built, and used for;
3. Requiring a performance bond as a security measure that reinstatement works will be appropriately completed in a timely manner; and
4. Maintaining and enhancing amenity values of areas by ensuring the adverse effects of *relocatable buildings* are avoided, remedied, or mitigated.
