

Some provisions within this chapter are subject to appeal to the Environment Court. Provisions that are under appeal are identified by a red box around the provision and a footnote identifying the appellant. The appeal documentation, including the scope of the appeal and relief sought, is available on the Council's Appeals webpage on the Wairarapa Plan website.

## SUB – Subdivision

Subdivision is the process of dividing a site or building into one or more additional sites or units or changing an existing boundary location. The way a site is subdivided, including its size and shape, is important as it can factor into the future use and development of the land, its character and quality, and any impacts on adjacent sites. Subdivision can also affect the natural and physical environment and introduce long-term development patterns that cannot be easily changed.

The subdivision process regulates the provision of services for development and activities, including infrastructure and reserves. The adverse effects of activities are generally controlled by the provisions for each zone at the time of development. However, some potential effects of those activities that may be undertaken on sites are most appropriately managed at the time of subdivision. For example, forming new connections to roads may have an impact on the amenity values of an area and the safety and efficiency of the transport network, and the most effective time and means of addressing such effects is through a subdivision consent. It is also important to ensure that new sites being created are of a size and shape that can accommodate future development and be adequately serviced, either by reticulated services or on-site services.

The subdivision of land to create new lots on undeveloped land also creates expectations and property rights. It requires consideration of the need for public open space, esplanade strips, community facilities, and servicing by and connections to infrastructure. Cost-effective servicing by infrastructure is an important consideration for greenfield developments. However, ensuring sufficient infrastructure capacity can also be an issue for subdivision of already developed land.

This chapter contains several policies and rules that relate to subdivision within the General Rural Zone and Rural Lifestyle Zone that give effect to Strategic Direction Objectives and align with the outcomes sought in those zones.

This chapter contains rules and standards relating to subdivision of land within District-Wide Matters chapters, such as the *Coastal Environment*, *Natural Hazards*, *Natural Environments*, and the *National Grid Subdivision Corridor*. The District-Wide Matters chapters contain the objectives and policies that also apply to any subdivision application.

Minimum lot sizes have been informed by the Councils' strategic planning documents where applicable, including the Carterton Urban Growth Strategy and the South Wairarapa Spatial Plans, which have been consulted on and adopted by each respective Council based on an assessment of areas suitable for future development.

Additional regulatory requirements, separate to the District Plan, are also relevant to subdivision:

1. The partitioning of Māori land is primarily controlled by the Te Ture Whenua Māori Act 1993 and administered by the Māori Land Court.
2. The Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health) Regulations 2011 (“NESCS”) controls activities on pieces of land where soil may be contaminated in such a way as to be a risk to human health, including subdivision of potentially contaminated land. District Councils are responsible for applying and enforcing the provisions of the NESCS. The NESCS does not contain any objectives or policies and those in the District Plan will apply. This chapter contains objective and policy direction for the assessment of any resource consent applications required under the NESCS in accordance with the requirements of section 104 of the RMA.
3. For detailed technical and engineering requirements and guidance, reference should be made to NZS 4404:2010 Land Development and Subdivision Engineering as well as Wellington Water’s Regional Water Standard May 2019 for SWDC, and advice should be sought from Councils’ Development Engineers.

In the case of conflict with any provision of this plan and any national environmental standard (including the NESCS), under Section 43B of the Act the provisions of the national environmental standards will prevail.

### **Application of rules in this chapter**

This chapter includes objectives, policies and rules that relate to subdivision generally. It also includes policies and rules that implement objectives in other chapters, specifically as they relate to the management of subdivision.

Rules SUB-R1 – SUB-R5 and SUB-R10 apply in the relevant zone chapters with the most specific rule that relates to the subdivision prevailing. Rules SUB-R6 – SUB-R9 and SUB-R11 – SUB-R14 apply to relevant planning notations or overlays that exist within the parcel of land where subdivision is proposed. Those rules apply in addition to Rules SUB-R1 – SUB-R5 and SUB-R10, with any number of applicable rules triggered for a particular site (e.g. more than one rule can apply to subdivision where planning notations or overlays exist).

Note: There may be several rules that apply to an activity, building, structure, or site. Resource consent may therefore be required under rules in this chapter as well as other chapters. Unless specifically stated in a rule, resource consent is required under each relevant rule. The steps to determine the status of an activity are set out in the General Approach section in the How the Plan Works chapter.

## Objectives

<b>SUB-O1</b>	<b>Subdivision and development design</b>
<p>Subdivision and developments create allotments and patterns of land use and development that:</p> <ul style="list-style-type: none"> <li>a. provide for the anticipated purpose, character, and amenity of each zone and the qualities and values of the site(s) including natural features and landscapes, <i>waterbodies</i>, <i>indigenous biodiversity</i>, historic heritage, sites and areas of significance to Māori, and <i>highly productive land</i>;</li> <li>b. provide for a variety of housing types that cater for the range of community needs, such as affordability, accessibility, and lifestyle;</li> <li>c. are well-functioning, accessible, integrated, and connected with adjoining neighbourhoods;</li> <li>d. provide accessible and well-designed open space areas;</li> <li>e. protect cultural, heritage, and natural values; and</li> <li>f. reduce or not increase the risks and consequences of natural hazards and are resilient to climate change.</li> </ul>	
<b>SUB-O2<sup>1</sup></b>	<b>Servicing</b>
<p>Subdivision and developments are serviced to provide for the likely or anticipated use of the land while avoiding, remedying, or mitigating adverse effects on the environment by ensuring:</p> <ul style="list-style-type: none"> <li>a. subdivisions within the urban boundary connect to reticulated water, wastewater services (and reticulated stormwater services where they are available or provide for on-site stormwater disposal) and telecommunications networks and electricity networks with sufficient capacity to accommodate proposed or anticipated development; and</li> <li>b. subdivisions in Rural Zones are capable of being serviced via on-site water, wastewater, and stormwater measures when development occurs on the site and are capable of connecting to a telecommunication network.</li> </ul>	
<b>SUB-O3</b>	<b>Integrated future development</b>
<p>Subdivision and development are provided for where they integrate with the existing and planned development of land, <i>roads</i> (including public and active transport networks and services), and <i>infrastructure</i>, and avoid fragmentation or development that undermines the effective and efficient provision of <i>infrastructure</i> and <i>roads</i>.</p>	

---

<sup>1</sup> Federated Farmers

## Policies

<b>SUB-P1</b>	<b>Creation and design of allotments</b>
<p>Allow subdivision and development that results in the efficient and productive use of land, provides for the needs of the community, and supports the policies of the District Plan for the applicable zones, where the design:</p> <ul style="list-style-type: none"> <li>a. reflects patterns of development that are consistent, compatible, and reinforce the role, function, and existing or planned character and qualities of the zone as set out by the Objectives and Policies of the applicable zone;</li> <li>b. maintains the integrity of the zone with lot sizes sufficient to accommodate intended land uses;</li> <li>c. if within the urban boundary, provides adequate public open space that is accessible, useable, and well-designed, and encourages social interaction, neighbourhood cohesion, and a sense of place;</li> <li>d. has legal and physical access to each allotment created by the subdivision;</li> <li>e. creates esplanade reserves and access where land adjoins MHWS and/or rivers whose bed has an average width of 3m or more;</li> <li>f. ensures that the staging of the subdivision relative to building construction is efficient and appropriate to the scale and complexity of the overall development; and</li> <li>g. results in good urban design outcomes by using measures to enhance urban environments such as Crime Prevention Through Environmental Design (CPTED), energy efficiency, and transport connectivity measures.</li> </ul>	
<b>SUB-P2<sup>2</sup></b>	<b>Provide integrated <i>infrastructure</i> at subdivision</b>
<p>Require subdivision to be located where appropriate <i>infrastructure</i> is available, or to provide <i>infrastructure</i> in an integrated and comprehensive manner by:</p> <ul style="list-style-type: none"> <li>a. ensuring appropriate <i>infrastructure</i> has the capacity to accommodate the development or anticipated future development of the land in accordance with the purpose of the zone, is in place at the time of subdivision or development, and integrates with existing and planned <i>infrastructure</i>;</li> <li>b. requiring connections to Council's reticulated systems within the urban boundary to meet the performance criteria of the relevant Council;</li> <li>c. ensure within the urban boundary new allotments can connect to a telecommunications network;</li> </ul>	

---

<sup>2</sup> Federated Farmers

- d. ensuring allotments outside the urban boundary:
  - i. are of a sufficient size and shape with appropriate soil conditions to accommodate on-site wastewater, and stormwater;
  - ii. are appropriately serviced with water supply *infrastructure*;
  - iii. have sufficient water supply capacity for firefighting purposes; and
  - iv. have an ability to connect to telecommunication network;
- e. ensuring roads and any vehicle access to sites meet minimum design standards to allow for safe and efficient traffic movements and can safely accommodate the intended number of users and the intended functioning of the road or access;
- f. providing for transport network connections within and between communities;
- g. where consistent with the zone, providing for a variety of travel modes that reflect the purpose, character, and amenity values of the zone, including walking, cycling, and access to and infrastructure for public transport while recognising the role that efficient transport infrastructure and connectivity plays in reducing greenhouse gas emissions; and
- h. achieving safe and efficient access onto and from state highways in accordance with the roading hierarchy and meeting the TR-Transport objectives and policies.

<b>SUB-P3</b>	<b>Subdivision containing natural features or sites or items with significant values</b>
---------------	--

Manage subdivision of land containing significant natural features or other values such as landforms, *waterbodies*, *indigenous vegetation* and ecological values, historic heritage, sites of significance to Māori, or identified or otherwise known features to ensure their protection, enhancement, and community accessibility in line with the objectives and policies of the relevant chapters of this Plan.

<b>SUB-P4</b>	<b>Subdivision in areas with risks from <i>natural hazards</i></b>
---------------	--

Manage risks from *natural hazards* by avoiding subdivision that:

- a. creates new, increases the likelihood, or exacerbates existing *natural hazards* including coastal hazards, erosion, slippage, subsidence, falling debris, flooding, or liquefaction;
- b. results in adverse effects on the stability of land, *buildings*, and infrastructure;
- c. accelerates, worsens, or results in material damage to land, *buildings*, infrastructure or people from *natural hazards*; or
- d. at the time of subdivision does not provide safe and stable *building* platforms over a 100-year horizon taking into account potential effects from climate change and/or sea level rise.

<b>SUB-P5</b>	<b>Rural character and amenity values of subdivision in the General Rural Zone</b>
<p>Provide for subdivision where it does not compromise the purpose, character, and amenity values of the General Rural Zone as directed through GRUZ-O1, GRUZ-O2 and GRUZ-P3.</p>	
<b>SUB-P6</b>	<b>Avoid inappropriate subdivision in the General Rural Zone</b>
<p>Avoid subdivision in the General Rural Zone that will result in sites that are of a size, scale, or location that is contrary to the anticipated purpose, character, or amenity values of the zone by:</p> <ul style="list-style-type: none"> <li>a. limiting small lot subdivision within the General Rural Zone to only areas where the soil resource is fragmented and it does not compromise the use of land for <i>primary production activities</i>;</li> <li>b. avoiding the cumulative effects associated with small lot subdivision on the productive use and potential within the General Rural Zone; and</li> <li>c. avoid cumulative effects that can arise from subdivision located fronting roads with an Interregional Collector function in accordance with the roading hierarchy.</li> </ul>	
<b>SUB-P7</b>	<b>Subdivision in the Future Urban Zone</b>
<p>Avoid subdivision within the Future Urban Zone that may result in one or more of the following:</p> <ul style="list-style-type: none"> <li>a. the efficient and effective operation of the planned and existing local and wider transport network being compromised;</li> <li>b. the need for significant upgrades, provisions, or extensions to the reticulated wastewater, reticulated water supply, stormwater networks, the transport network or other <i>infrastructure</i> in advance of planned integrated urban development;</li> <li>c. the efficient and effective provision of <i>infrastructure</i> being compromised;</li> <li>d. reverse sensitivity effects when urban development occurs;</li> <li>e. reverse sensitivity effects on existing rural activities or infrastructure; or</li> <li>f. fragmentation of sites in a manner that may compromise the appropriate form or nature of planned urban development.</li> </ul>	
<b>SUB-P8</b>	<b>Subdivision of <i>highly productive land</i></b>
<p>Avoid subdivision on highly productive land except as provided for in the National Policy Statement for Highly Productive Land.</p>	

<b>SUB-P9</b>	<b>Managing the effects of subdivision on freshwater</b>
<p>Subdivision of land is managed in an integrated and sustainable way to avoid, remedy, or mitigate adverse effects, including cumulative effects, on the health and well-being of water bodies, freshwater ecosystems, and receiving environments.</p>	

## Rules

<b>SUB-R1</b>	<b><i>Boundary adjustment</i></b>
<b>Residential Zone</b>  <b>Settlement Zone</b>  <b>Rural Lifestyle Zone</b>  <b>Commercial and Mixed Use Zones</b>  <b>General Industrial Zone</b>  <b>Open Space and Recreation Zones</b>  <b>Future Urban Zone</b>	<p>1. Activity status: <b>Controlled</b></p> <p>Where:</p> <ol style="list-style-type: none"> <li>a. The boundary adjustment complies with, or does not increase any existing or previously approved non-compliance with:             <ol style="list-style-type: none"> <li>i. SUB-S1;</li> <li>ii. SUB-S2;</li> <li>iii. SUB-S3;</li> <li>iv. SUB-S4;</li> <li>v. SUB-S5;</li> <li>vi. SUB-S6;</li> <li>vii. SUB-S7;</li> <li>viii. SUB-S8;</li> <li>ix. SUB-S9; and</li> <li>x. SUB-S10; and</li> </ol> </li> <li>b. The boundary adjustment complies with, or does not increase any existing or previously approved non-compliance with the relevant standards of the underlying zone.</li> </ol> <p>Matters of control:</p> <ol style="list-style-type: none"> <li>1. The matters set out in Policies SUB-P1, SUB-P2 and SUB-P9.</li> <li>2. The size, design, and layout of lots that would exist after the <i>boundary adjustment</i>, including the effects of any additional permitted activity development potential resulting from the reconfigured layout.</li> <li>3. Legal and physical access to and from lots affected by the <i>boundary adjustment</i>.</li> <li>4. Protection, maintenance, or enhancement of natural features and landforms, historic heritage, waterbodies, indigenous vegetation and biodiversity, sites and areas of significance to Māori, or archaeological sites.</li> </ol>

	<ol style="list-style-type: none"> <li>5. Any change to the effects on the transport network or three waters infrastructure.</li> <li>6. Where relevant, compliance with Council's engineering standards.</li> <li>7. Where located in a hazard area, the matters set out in policies NH-P4, SUB-P1, SUB-P2, and SUB-P4.</li> <li>8. The matters referred to in sections 108 and 220 of the Act.</li> </ol>
<p><b>General Rural Zone</b></p>	<p>2. Activity status: <b>Controlled</b></p> <p>Where:</p> <ol style="list-style-type: none"> <li>a. The minimum lot size of any lot created by <i>the boundary adjustment</i> is 0.5ha; and</li> <li>b. The <i>boundary adjustment</i> complies with, or does not increase any existing or previously approved non-compliance with:           <ol style="list-style-type: none"> <li>i. SUB-S2;</li> <li>ii. SUB-S3;</li> <li>iii. SUB-S4;</li> <li>iv. SUB-S5;</li> <li>vi. SUB-S6;</li> <li>vii. SUB-S7;</li> <li>viii. SUB-S8;</li> <li>ix. SUB-S9; and</li> <li>x. SUB-S10; and</li> </ol> </li> <li>c. The boundary adjustment complies with, or does not increase any existing or previously approved non-compliance with the relevant standards of the underlying zone.</li> </ol> <p>Matters of control:</p> <ol style="list-style-type: none"> <li>1. The matters set out in Policies SUB-P1, SUB-P2, SUB-P7, and SUB-P9.</li> <li>2. The size, design, and layout of lots that would exist after the <i>boundary adjustment</i>, including the effects of any additional permitted activity development potential resulting from the reconfigured layout.</li> <li>3. Legal and physical access to and from lots affected by the <i>boundary adjustment</i>.</li> <li>4. Protection, maintenance, or enhancement of natural features and landforms, historic heritage, waterbodies, indigenous vegetation and biodiversity, sites and areas of significance to Māori, or archaeological sites.</li> </ol>

	<ol style="list-style-type: none"> <li>5. Any change to the effects on the transport network or three waters <i>infrastructure</i>.</li> <li>6. Where located in a hazard area, the matters set out in policies NH-P4, SUB-P1, SUB-P2, and SUB-P4.</li> <li>7. Where relevant, compliance with Council's engineering standards.</li> <li>8. <p>accordance with Council's engineering standards.</p> <p>3. Where the means of stormwater disposal is to ground, that area must be able and suitable to accommodate the stormwater discharge, and shall not be subject to instability, slippage, or inundation, or used for the disposal of wastewater.</p>	
<p><b>SUB-S6</b></p>	<p><b>Network utility services</b></p>
<p>Residential Zones, Commercial and Mixed Use Zones, General Industrial Zone, and Rural Zones</p> <p>1. Electricity and telecommunications services shall be provided to the useable area of each new lot where electricity lines and telecommunications lines pass within 200m of any boundary of any new lot.</p>	<p>Matters of discretion:</p> <p>1. Alternative provision of electricity supply and telecommunications.</p>
<p><b>SUB-S7</b></p>	<p><b>Transport, access, and connectivity</b></p>
<p>All Zones</p> <p>1. All new allotments created must have legal and physical access to a road in accordance with TR-R1(1) and the relevant standards TR-S1 – TR-S28 in TR - Transport.</p>	<p>Matters of discretion:</p> <p>1. The effect of non-compliance with any relevant Transport standard that is not met, and the matters of discretion of any standard that is not met.</p> <p>2. The safe, efficient, and effective functioning of any private way, including firefighting access and the safety of pedestrians and cyclists, including road hierarchy, intersection separations, and types.</p> <p>3. The safe, efficient, and effective functioning of the transport network and its connectivity, including public transport, cyclist and pedestrian network connectivity.</p> <p>4. Safety of access to individual lots, including proximity of vehicle crossings to</p>

	<p>intersections and sight distance constraints.</p> <p>5. The suitability of any alternative design options.</p>
<b>SUB-S8</b>	<b><i>Esplanade reserves, esplanade strips, and access strips</i></b>
<p>All Zones</p> <p>1. Any subdivision of land less than 4ha that involves the creation of one or more sites that adjoins:</p> <ul style="list-style-type: none"> <li>a. the line of MHWS; or</li> <li>b. the bank of a lake or a river whose bed has an average width of 3m or more;</li> </ul> <p>must provide a minimum 10m wide <i>esplanade reserve</i> or <i>esplanade strip</i> in accordance with section 230 of the RMA.</p> <p>2. The <i>esplanade reserve</i> or <i>esplanade strip</i> must be measured in a landward direction at 90° to the line of MHWS, or the bank of a river.</p> <p>3. Any subdivision of land less than 4ha that involves the creation of one or more sites that includes, adjoins, and/or can provide improved public access to a:</p> <ul style="list-style-type: none"> <li>a. <i>Significant Waterbody</i>;</li> <li>b. heritage feature or site of significance to Māori; or</li> <li>c. significant natural area;</li> </ul> <p>shall provide a minimum 10m wide access strip.</p>	<p>Matters of discretion:</p> <ol style="list-style-type: none"> <li>1. Whether safe public access and recreational use is already possible and can be maintained for the future.</li> <li>2. Whether an <i>esplanade strip</i> would better provide for public and customary access, recreation, hazard management, stormwater management, and ecological values.</li> <li>3. The extent to which ecological values and landscape features of the land adjoining the coast or other <i>surface waterbody</i> will be adversely affected.</li> <li>4. The extent to which any scheduled historic heritage places and sites and areas of significance to Māori will be adversely affected.</li> <li>5. Whether any reduced width of an <i>esplanade reserve</i> or <i>strip</i> is sufficient to manage the risk of adverse effects resulting from natural hazards, taking into account the likely long-term effects of climate change.</li> <li>6. Whether a full-width <i>esplanade reserve</i> or <i>esplanade strip</i> is not required to maintain the natural character and amenity of the coastal environment.</li> <li>7. Whether a reduced width in certain locations is offset by an increase in width in other locations or areas that would result in a positive public benefit, in terms of public and customary access, recreation, hazard</li> </ol>

		management, stormwater management, and ecological values.  8. The extent to which the water quality of a surface waterbody will be adversely affected.
<b>SUB-S9</b>	<b>Financial contributions</b>	
All Zones  1. Financial contributions must be provided in accordance with the provisions of the FC - Financial Contributions Chapter.		Matters of discretion:  1. Refer to FC-Financial Contributions Chapter.
<b>SUB-S10</b>	<b>Firefighting water supply</b>	
All Zones  1. All new allotments must comply with the water supply requirements in the New Zealand Fire Service Firefighting Water Supplies Code of Practice SNZ PAS 4509:2008.		Matters of discretion:  1. Alternative means of providing an adequate water supply for firefighting purposes.

**SUB - Table 1 Minimum allotment sizes**

<b>Residential Zones</b>	
GRZ: General Residential Zone	350m <sup>2</sup> with an average of 400m <sup>2</sup> for subdivisions creating 3 or more lots
LDRP: Low Density Residential Precinct	400m <sup>2</sup> with an average of 500m <sup>2</sup> for subdivisions creating 3 or more lots
MDRP: Medium Density Residential Precinct	200m <sup>2</sup>
SETZ: Settlement Zone	Masterton District (outside the Riversdale Terraces Precinct): 400m <sup>2</sup>  Masterton District (within the Riversdale Terraces Precinct): 1000m <sup>2</sup> provided that the average allotment size in the precinct is no less than 1200m <sup>2</sup>  South Wairarapa District: 1,000m <sup>2</sup>
<b>Rural Zones</b>	
GRUZ: General Rural Zone <sup>23</sup>	40ha excluding sites within the Martinborough Soils Overlay <sup>24</sup>
	6 ha on sites within the Martinborough Soils Overlay
RLZ: Rural Lifestyle Zone <sup>25</sup>	1ha <sup>26</sup>
<b>Commercial and Mixed Use Zones</b>	
NCZ: Neighbourhood Centre Zone	No minimum lot size
TCZ: Town Centre Zone	No minimum lot size
MUZ: Mixed Use Zone	No minimum lot size
<b>Industrial Zones</b>	
GIZ: General Industrial Zone	No minimum lot size
<b>Open Space and Recreation Zones</b>
