Registration opens 30mins before start time

Half day programme: \$32/day | Full day programme: \$64/day

3pm-5pm extended care add-on: \$15/day

### Fabric Scrap Wreaths

Celebrate the festive season with colour and creativity! In this hands-on workshop, children will transform scraps of fabric into their own beautiful Christmas wreaths. Using a mix of textures and patterns, participants will explore design and composition while creating a cheerful decoration to take home.

### Watercolour Christmas Ornaments

In this calming and creative session, children will paint dreamy watercolour skies and layer delicate pine silhouettes to capture the magic of the season. Each piece will be turned into a hanging ornament, ready to brighten the tree. Participants will experiment with colour blending, brushwork, and contrast to create something truly special.

### Bouncing Christmas Character Decorations

Get ready for some festive fun with this playful mixed-media workshop! Children will design and construct their own bouncing Christmas characters using colourful papers, card, and

collage materials. With a focus on movement, expression, and imagination, each decoration will spring to life with personality and charm.

### **Christmas Character Puppets**

Step into a world of storytelling and design! In this creative session, children will craft their own handheld Christmas character puppets using paper, card, and simple mechanisms. Participants will explore character design and expression while making a festive puppet ready for imaginative play.
