

Job Description | Junior Web Developer

[Quidich Innovation Labs](#) is a global company headquartered in Mumbai, India that pioneers in customized technology solutions for Sports Broadcast. From the outset, we have believed in the power of the story that sport tells as a tool to bring people together; and that this story best reaches fans, through the way it is broadcast. Building on this thinking, we have created various technology tools over the past five years and deployed them at tournaments such as the Indian Premier League, ICC Men's T20 World Cup, ICC Women's World Cup, and Men's FIH Hockey World Cup, to name a few.

Role

We are looking for a talented and detail-oriented Web Developer to join our team. In this role, you will be responsible for translating UI/UX designs into responsive, high-performance web interfaces and applications. You'll collaborate closely with designers and back-end developers to build seamless, user-friendly experiences across platforms.

Responsibilities

- Assisting in developing and maintaining user interfaces using HTML, CSS, and JavaScript. Build and maintain reusable code and libraries for future use.
- Translating UI/UX design wireframes into high-quality code.
- Collaborating with designers to bridge the gap between graphical design and technical implementation.
- Ensuring web applications are responsive and cross-browser compatible.
- Participating in code reviews and contributing to team discussions.
- Debugging and troubleshooting issues in a timely manner.
- Staying up-to-date with emerging front-end technologies and trends.
- Working with RESTful APIs to display and manipulate data from the back-end.
- Using Git for version control and collaboration using pull requests and code reviews.
- Incorporating feedback from QA, stakeholders, or user testing to improve usability.
- Ensuring the application works consistently across modern browsers.

Required Skills and Competencies

- Bachelor's degree in Computer Science, Design, or related field (or equivalent experience).
- 1+ years of professional experience in front-end web development, preferably using React.js, with a strong understanding of UI/UX principles.
- Experience with tools like Figma, Sketch, or Adobe XD

www.quidich.com

- Proficient in CSS/SCSS, HTML5 and Javascript. Experience with responsive and mobile-first design. Knowledge of Flexbox, CSS Grid, media queries, and animations.
- Strong knowledge of [React.js](#) - Understanding of components, props, state, and component lifecycle methods.
- Styling in React - Experience with CSS modules, styled-components, Tailwind, or traditional CSS/SCSS.
- Basic State Management - Familiarity with state lifting, context API, or tools like Redux (basic knowledge is enough for junior level).
- Ability to fetch and display data from external APIs using fetch, axios, or similar tools.
- Experience working in team environments, ideally in Agile or Scrum-based workflows.
- Excellent communication and teamwork skills.

Reporting To: Product Manager

Joining Date: Immediate – 30 Days (Mumbai)
