

DISCOVER HOW TO POWER YOUR
SUSTAINABLE HOME WITH VOLT

REROOFING CHECKLIST

SOLAR TILE READY EDITION

Planning a roof replacement? Use this checklist to prepare your home for a seamless solar tile upgrade.

1. Assessing Your Roof

- ☐ Have I had my roof assessed for structural integrity and suitability for solar tiles?
- ☐ Is this a full reroof or partial?
- ☐ Have I selected a roof tile range compatible with Volt (e.g. Bristile or La Escandella)?

2. Design & Layout Planning

- ☐ Is there a clear, unshaded roof area suitable for solar tile installation?
- ☐ Have I confirmed the orientation and pitch are optimal for solar performance?
- ☐ Are roof features (chimneys, skylights, vents) positioned away from the solar zone?

3. Choosing Products & Partners

- ☐ Have I selected a solar tile system with strong warranty and proven performance?
- ☐ Am I working with a roofer and solar installer experienced in integrated solar tiles?
- ☐ Have I reviewed technical documents and tile compatibility for the selected range?

4. Electrical & Infrastructure Readiness

- ☐ Is my switchboard ready for solar (and battery or EV charging down the line)?
- ☐ Have I allocated a location for the inverter and ensured adequate conduit access?

5. Approvals & Installation

- ☐ Have I confirmed if council or strata approval is needed for solar tile installation?
- ☐ Has the timeline been coordinated between the roofing and solar teams to ensure smooth installation?
