Decriminalize Poverty

Decriminalize Poverty in Tennessee is the web project that emerged from a report by the Vera Institute of Justice and Free Hearts. This narrative experience explores how poverty has been criminalized across Tennessee, what this means for people who live in communities in the state, and practical steps to build a better future.

Services	Web Design Graphic Design Web Development Motion Design
Industries	Philanthropy & Social Good Legal & Consultancy
Challenge	To structure a massive amount of complex content into an engaging story-driven website showcasing a digital archive of 500+ impacted voices. To represent delicate info on a heavy subject in a way that would keep readers' attention.
What we did	<ul style="list-style-type: none"> Transformed dense content into concise steps Defined the key notions from every part of the report that we later highlighted with graphics Analyzed various accent colour options to carefully choose the perfect non-provocative solution Built the experience upon the use of illustrations, collages, photography and animations
Recognition	<ul style="list-style-type: none"> Webby Winner 2023 Webby People's Choice 2023 Webby Nominee

Planetoño

An experimental interface concept exploring how 3D environments, scroll mechanics, and animated UI components can transform a simple ordering flow into an interactive narrative experience.

www.planetono.space

[see case](#)

Services	Web Design Development Motion Design
Industries	Food & Agriculture Entertainment & Media
Challenge	Planetoño was created as an experimental playground for testing interactive storytelling on the web. The challenge was to design an interface where scroll-driven motion, 3D environments, and traditional UI elements work together without overwhelming the user experience.
What we did	We built a custom scroll animation engine in three.js, optimized shader workflows, redesigned the UI integration around a portal-style layout, and introduced Rive-powered micro-interactions to make the entire experience responsive, playful, and technically stable.
Recognition	<ul style="list-style-type: none"> • FWA of the Day • Awwwards Site of the Day • Awwwards Developer Award • Awwwards Honorable Mention • GSAP's Site of the Day

Der Baukasten

A concept site and 3D scroll experience built for Der Baukasten—a modular toy project rooted in Ukrainian myth, blending character design, storytelling, and 3D printing into one interactive digital showcase.

Services	Web Design Graphic Design Development
Industries	Entertainment & Media Design
Challenge	Translating a character-based concept into a dynamic 3D experience meant blending illustration, storytelling, and modular design into one scrollable site. The tricky part was syncing motion, transitions, and textures across tools and devices without losing the charm of the original idea.
What we did	From illustration to implementation, we brought the idea to life with detailed 3D modeling, motion design, and scroll-triggered transitions. The site features a custom UI, card-based navigation, and downloadable builds—all synced to tell a cohesive, tactile story.
Recognition	<ul style="list-style-type: none"> • FWA of the Day • Awwwards Site of the Day • Awwwards Developer Award • Awwwards Honorable Mention • Awwwards Nominate for Typography Honors • GSAP's Site of the Week

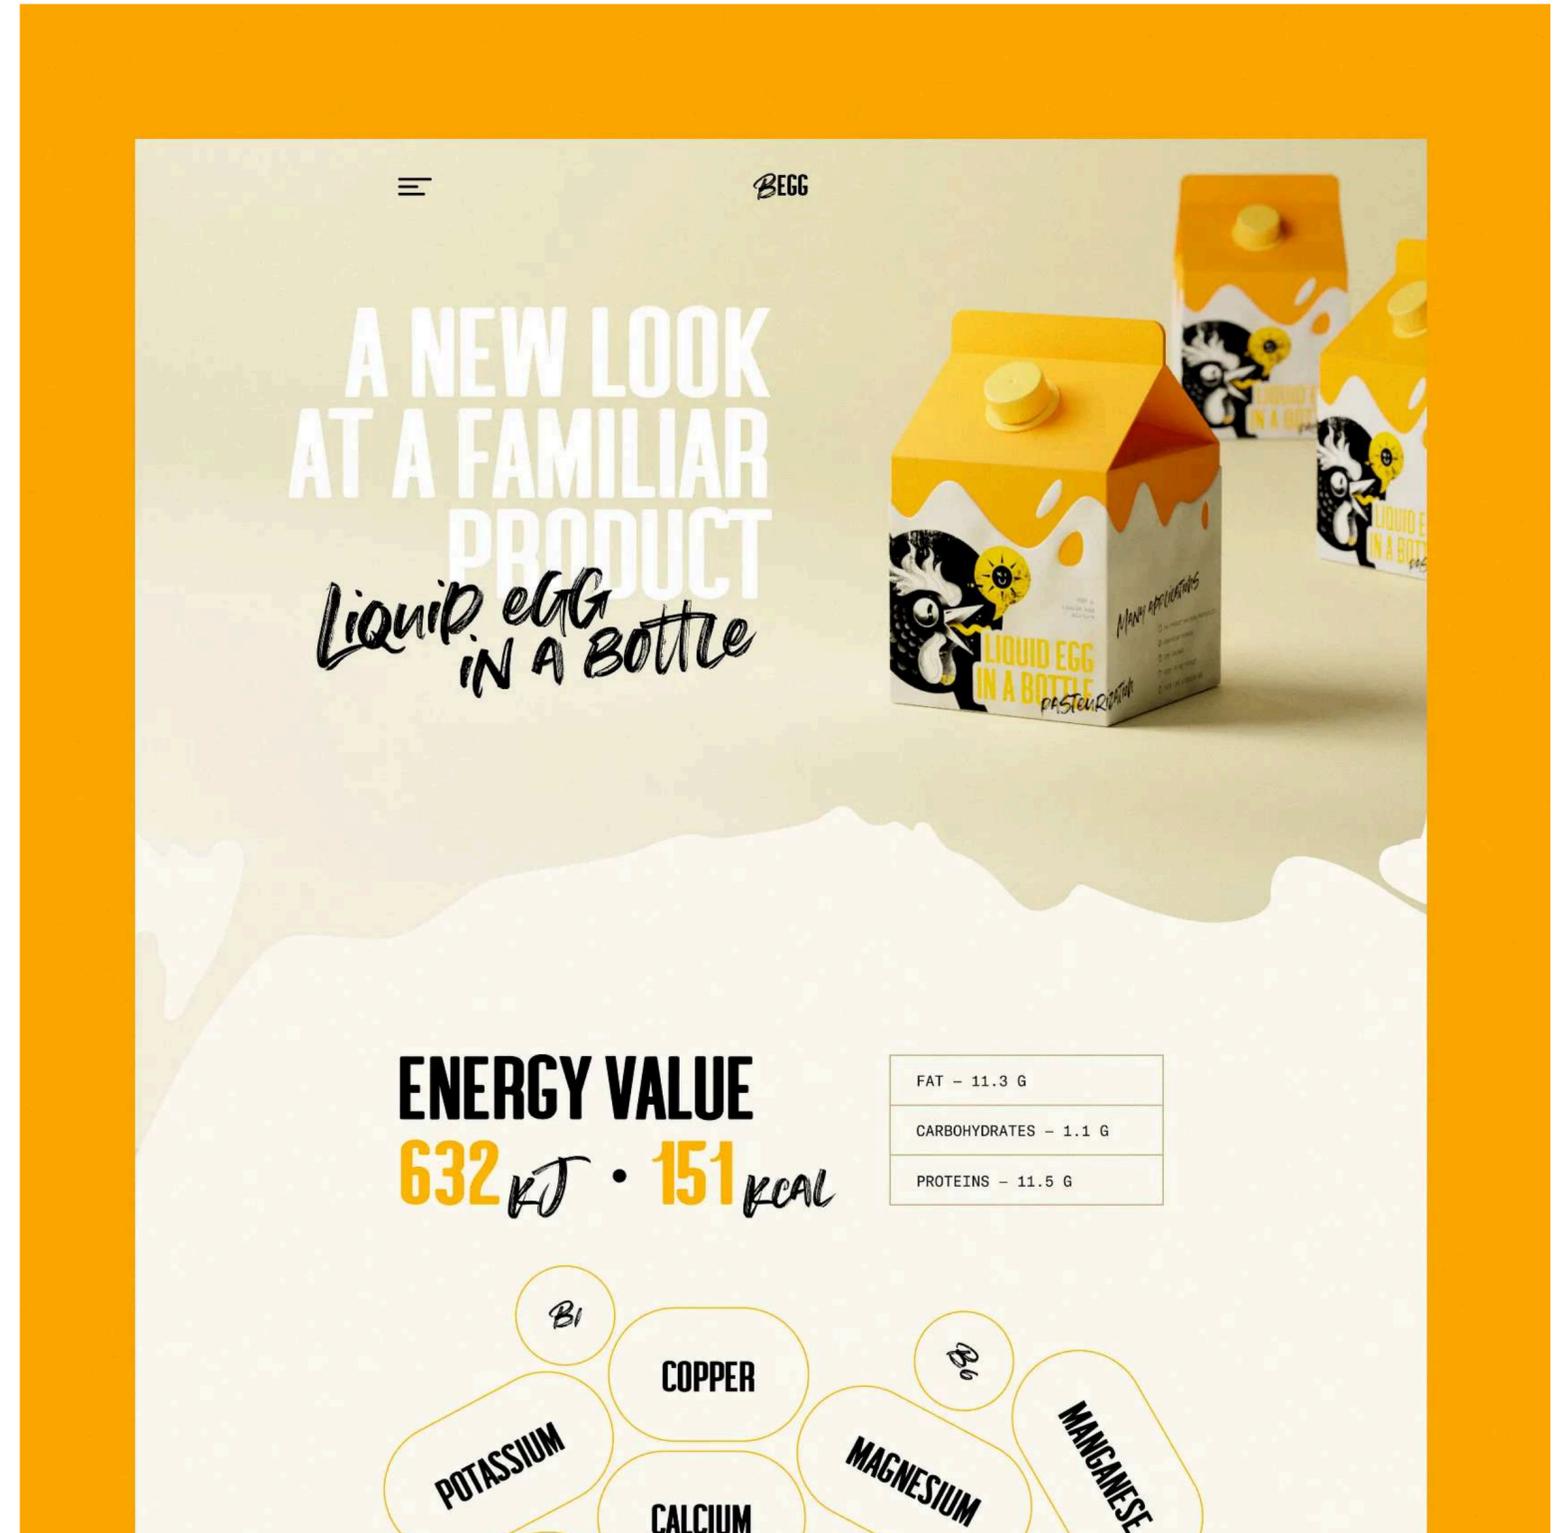

B-EGG

Website for experimental niche food producer

Challenge	To combine functionality and informativeness with a modern visual style that appeals to different age segments of users and makes the website user-friendly, employing effective mental models.
What we did	<ul style="list-style-type: none"> • Researched the sphere to build up the approach that would help the website stand out • Created website design with efficient content presentation • Worked on custom visual content and animations that make user experience more aesthetic and engaging • Implemented the website with Webflow
Recognition	<ul style="list-style-type: none"> • Awwwards Honorable Mention

Huawei icons for EMUI 10

In summer 2019, we've got an offer from HUAWEI to collaborate on design of basic icon set for the EMUI custom Android user interface. Our task was to redesign 54 icons using clean and simple design language that would meet the general trends and patterns, however, would still be different from the competitors. The main goal was not to come up with something completely different, but to make more of an aesthetic update that would be loved by current Huawei fans and would attract new users.

[see case ↗](#)

Services	Brand Identity Graphic Design
Industries	Technology
Challenge	Every year, HUAWEI refreshes the visual skin of its OS, and this time we were invited to create icons for all standard apps—from Weather to Calculator. EMUI 10, which is the name of this OS skin version, had to feel premium, simple, and at the same time vibrant. The icon style needed to appeal both to demanding adult users and to younger audiences. Everything had to stay flat, with no hint of volume, gradients, or shadows.
What we did	We designed 35 core icons in one consistent style. To support them, we developed a design system that defined the color palette, corner radius values and their proportional relationships, as well as the overall flat visual style. This system helped keep all icons consistent while still making each one visually engaging on its own. We used a limited color palette to preserve a sense of sophistication, while keeping the icons bright enough not to feel overly serious. The shapes and geometry are simple and concise, without unnecessary tiny details, so each icon remains clear and readable on a mobile phone screen.

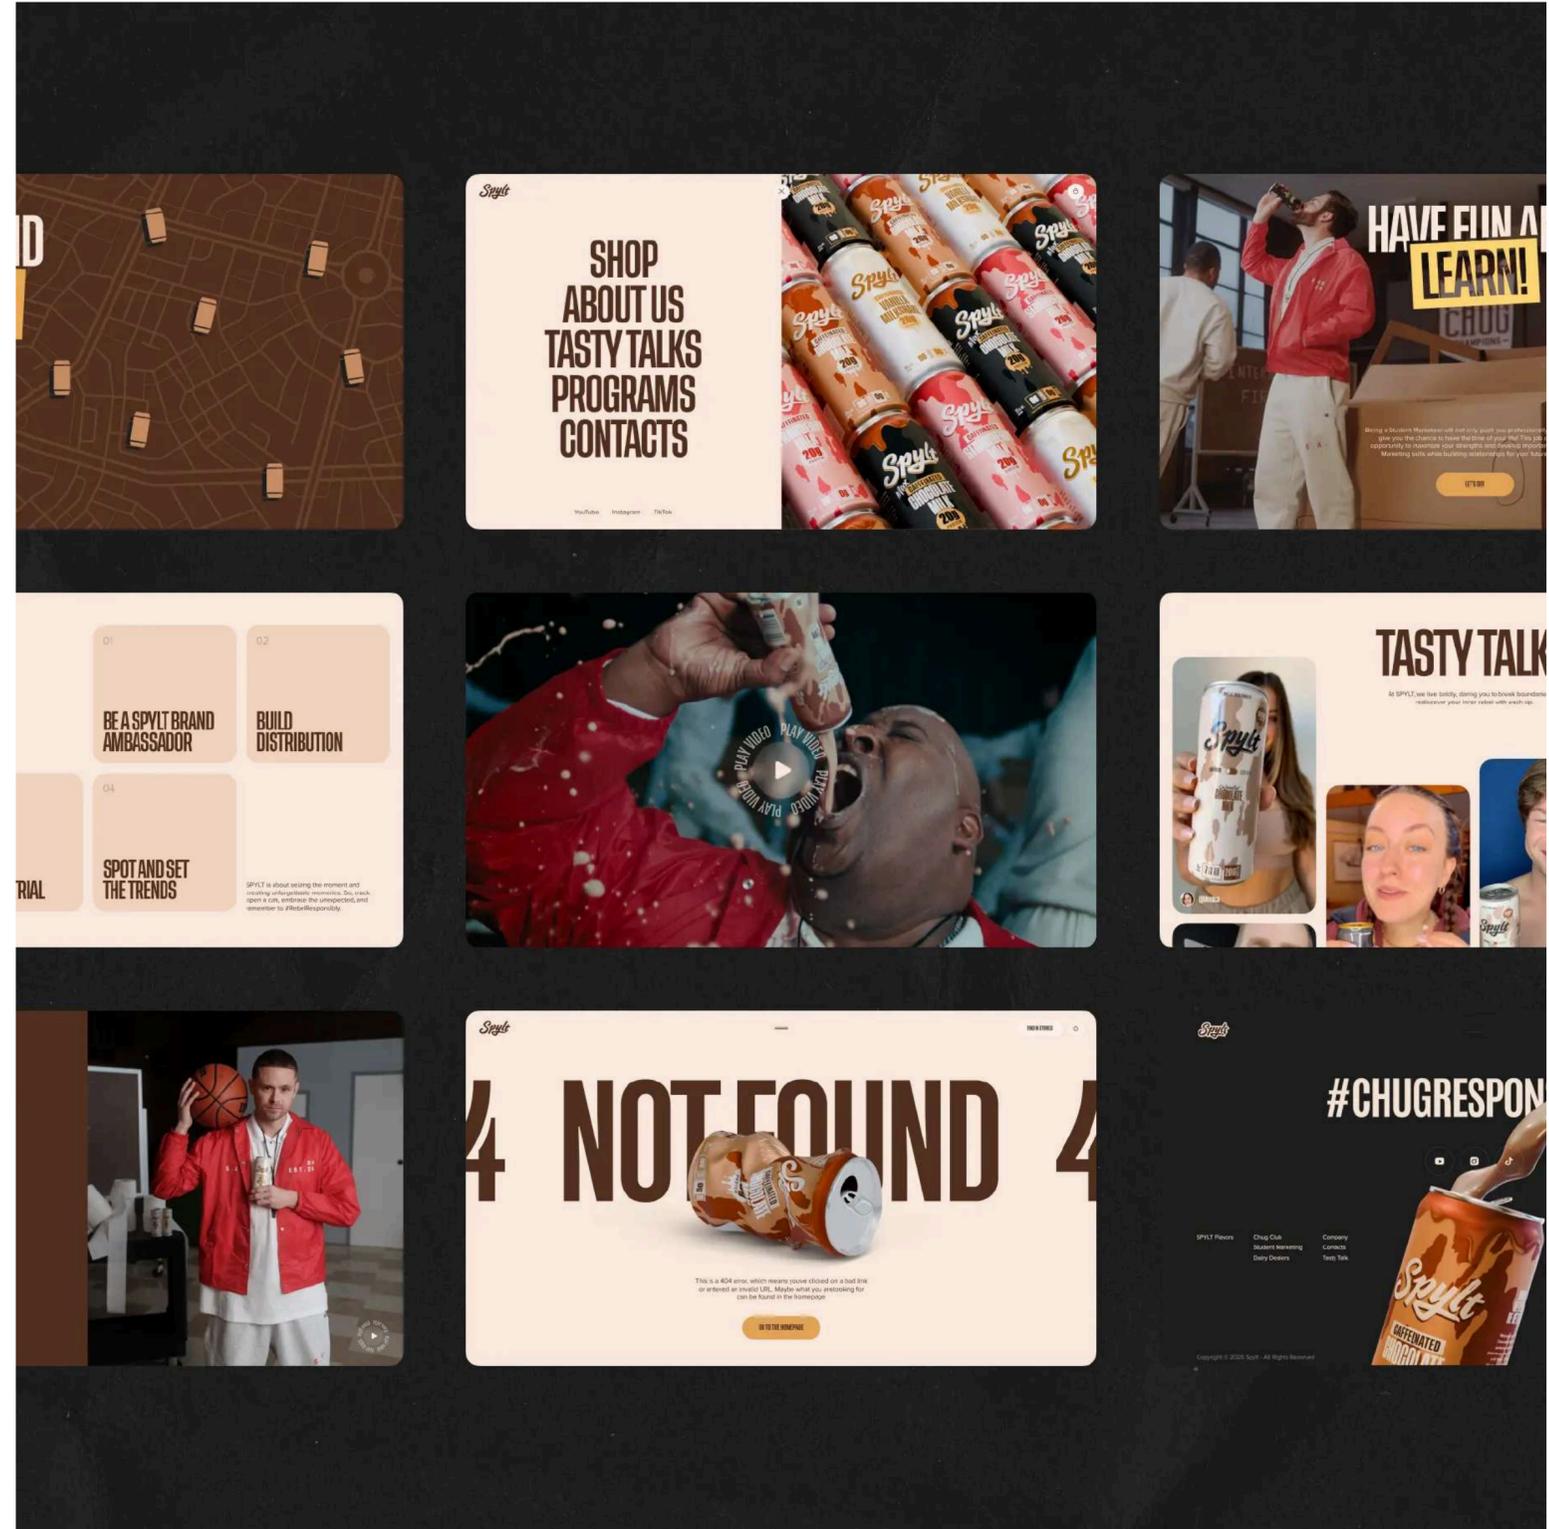

SPYLT

Catchy and captivating ecommerce website designed and implemented for SPYLT, a bright and energetic brand of protein-rich caffeinated chocolate milk with bold and delicious flavors.

www.spylt.com

Challenge Transforming a dense historical narrative into a clear digital experience within an existing website, integrating large volumes of content while maintaining visual originality, thematic sensitivity, and strong performance.

What we did Designed a storytelling layout to guide users through the historical narrative. Developed a modular visual system inspired by vintage posters—using clippings, sketches, photos, and collages—to give each story a textured feel. Integrated the section into the existing Webflow website with scroll interactions, subtle animations, and smooth transitions. Optimized heavy content for performance using WebP images and efficient layout strategies, while adapting visual effects for consistency across modern browsers and devices.
