

## 12-year accuracy guarantee on CMMs from the LH and GT series

WENZEL stands for long-lasting quality - and we are now giving you this in black and white: when you buy a new coordinate measuring machine (CMM) from the LH or GT series, we guarantee that the machine will retain its original specified accuracy for 12 years.

What does this mean in concrete terms?

If your measuring machine can no longer be calibrated to its original accuracy within this period due to a defect in a basic mechanical element, WENZEL METROLOGY GMBH will repair or replace this element free of charge - subject to certain conditions, of course.

Conditions for the warranty:

- Service, maintenance and repairs have been carried out exclusively by authorized WENZEL service partners.
- The appliance has been operated in accordance with the official operating instructions.
- The installation was carried out in accordance with the specifications for the power and compressed air supply.
- There is no damage due to improper use, manipulation, neglect or accident.

Transferability:

The warranty remains valid if the measuring device has been moved to another location under the supervision of WENZEL - in compliance with all conditions.

Please note that WENZEL assumes no liability for direct, indirect or consequential damages that may arise in connection with this warranty.
