

# EDWARD DANILYUK

## SENIOR FRONTEND ENGINEER

[edward.darling@hey.com](mailto:edward.darling@hey.com) | 385-272-4121 | [linkedin.com/in/edwardjayce/](https://www.linkedin.com/in/edwardjayce/)

### SUMMARY

- 8+ years of experience in frontend engineering with a focus on building high-quality, performant web experiences
- Extensive experience bridging product, design, and engineering teams to deliver seamless user experiences
- Strong background in optimizing web performance and ensuring cross-browser compatibility
- Proven track record of mentoring junior engineers and implementing best practices for code quality

### CORE COMPETENCIES

- **Frontend Engineering:** HTML, CSS, JavaScript, TypeScript, React
- **Performance Engineering:** Web performance optimization, cross-browser compatibility, mobile responsiveness
- **Team Collaboration:** Cross-functional communication, technical leadership, mentorship

### PROFESSIONAL EXPERIENCE

#### ALMA | SENIOR FRONTEND ENGINEER

*July 2023 - Present*

- Design and implement reusable frontend components creating a standardized "paved path" for product engineers
- Collaborate with cross-functional teams to build high-quality APIs that enhance developer productivity
- Utilize modern JavaScript frameworks to optimize desktop and mobile web performance
- Lead initiative to improve architecture and developer tooling for high-traffic web applications
- Integrate multiple third-party APIs with focus on maintainability and performance

## **6 RIVER SYSTEMS | SENIOR SOFTWARE ENGINEER**

*February 2021 - May 2023*

- Enhanced engineering productivity by establishing frontend development standards and best practices
- Implemented pair programming initiatives to improve knowledge transfer and code quality
- Created comprehensive testing strategies ensuring reliability across browser environments
- Collaborated with technical leadership to architect scalable frontend solutions
- Optimized remote collaboration with efficient communication guidelines and tooling

## **DOCK90 | SOFTWARE ENGINEER (CONSULTANT)**

*April 2017 - Present*

- Founded and operated a consulting firm focused on improving web development workflows
- Architected frontend systems with emphasis on performance and cross-browser compatibility
- Developed custom developer tooling that improved client productivity by 200%
- Built scalable web applications using React, JavaScript, and modern frontend toolchains
- Led technical initiatives with direct client collaboration to solve complex engineering challenges

## **EDUCATION**

### **TEMPLE UNIVERSITY**

*BA in Russian | September 2009 - May 2015*

## **INTERESTS**

Love traveling, good food, small coffee shops and indie book stores. Always learning something new! Currently learning how to be a better writer.
