# Iulian Boamfa

AI Lead @ OneThousandPieces  
London, England, United Kingdom

## Summary

Hi there!

I'm Iulian, fresh out of Middlesex University London with a degree in Cybersecurity and Digital Forensics. These days, I'm all about blending AI automation with go-to-market (GTM) strategies to help businesses thrive.

I'm super into using AI to make companies run smarter—not just automating stuff, but building what I like to call “cyborg businesses,” where tech and people team up for killer results. Think smoother product launches and workflows that just click.

I've also been geeking out on GTM and project management for AI and software projects. I love the whole process—planning, tackling challenges, and turning ideas into real systems that hit the market strong.

Feel free to scroll through my projects below to get a vibe for what I'm working on. Thanks for stopping by—maybe we'll end up building something cool together!

---

## Experience

OneThousandPieces  
AI Lead  
May 2025 - Present (8 months)  
France

I'm blending my love for AI automation with go-to-market (GTM) strategies to help global clients crush it. Working with an awesome international team, I build workflows that streamline product launches and boost market wins. I'm all about using tech to make businesses shine and deliver real results.

Autosyslab

## Founder & CEO

May 2025 - Present (8 months)

Romania

I founded AUTOSYSLAB to help small businesses work smarter with AI automation. The mission is to design systems that handle repetitive tasks, improve daily operations, and give people more time to focus on what truly matters.

Using tools like Make.com, Voiceflow, and Vapi, I develop digital assistants and automations that are simple, effective, and built for real-world impact.

## KeenSight Analytics LLC

7 months

Junior Software Project Manager | AI automation

January 2025 - June 2025 (6 months)

United States

Applying my proven management expertise while advancing as an AI specialist within the company that first entrusted me as an intern.

## AI Automation Intern

December 2024 - December 2024 (1 month)

United States

I'm all about learning, exploring new ideas, and turning them into real solutions that make a difference. At KeenSight Analytics, I focus on using AI automation to solve problems, streamline workflows, and deliver real value to the world.
