

Drinking Fountain and Bottle Filler BACH

Article number B118811

Free-standing, piped outdoor drinking fountain made of stainless steel type A 304

Description

The "Bach" model from myBach is a barrier-free drinking fountain that can be modularly expanded with online hygiene monitoring. The system is vandal-resistant, corrosion-protected, weatherproof, frost-resistant, and can therefore be used year-round, even in sub-zero temperatures.

- ✓ Vandal-resistant bottle filler and drinking fountain
- ✓ Automatic hygiene flushing
- ✓ Year-round operation
- ✓ Contactless
- ✓ Barrier-free
- ✓ Technically maintenance free

Excess water flows along the outer water channel towards the ground through the protected water dispensing area. This allows pets to drink the remaining water hygienically.

Standard features

- Bottle filling station and drinking fountain
- Barrier-free, for disabled and children suitable
- Bubbler / water outlet protection against contamination
- Certification: German DVGW-standard, certified parts
- Complies with highest German drinking water regulation
- Contactless operation via sensor
- Automatic shut-off after 60 seconds if no interaction occurs
- Pre-set flushing intervals prevent stagnant water
- Includes water backflow prevention
- Water flow: Laminar flow, minimizes splashing water
- Powered with replaceable batteries (annually)
- User-friendly maintenance via back inspection flap
- Material: Stainless steel Type A 304 (brushed)
- Connection: Geka Plus quick coupling (claw distance 40 mm)
- Designed for 3-6 bar
- Labeling "Drinking water"

Installation: Secure anchoring with the included mounting material; suitable for any surface

Scope of Delivery: Includes the drinking fountain, all required mounting components, screws, and instructions

Options (may incur additional costs)

- Modular expansion for monitoring water quality and hygiene data
