SOVEREIGN VILLAGE RESIDENTS

## **We enjoyed our country home for many years.**

However, it became too much to take care of. We thought we would buy a condo. Then we toured Sovereign Village. It was beautiful! We talked to residents and got very good comments. Everyone loved it. We thought it may be too expensive, but it was pointed out the expenses of owning a home are virtually non-existent here. Sam has memory problems; the doctor was concerned that he was isolating himself too much and advised him to become more active. We were very isolated living in the country. I have liver disease and was really becoming slow to get around. Two years ago the doctor said I may not have not long to live as my condition was worsening.

Sam has improved so much since living here. He enjoys friends and get togethers. He doesn't miss a thing. Communication with others helps to improve memory. His doctor was very surprised on his last visit that he has improved. What a blessing! My doctor couldn't believe how improved I was too. I told her I ballroom dance, go to group exercise class, walk, water aerobics and fitness classes. She said it's helping, that my disease has stabilized.

Together we have a great life at Sovereign Village, a beautiful home and access to all activities at the Clubhouse. Staff is amazing. Cook is great. We are living our best life!

Paul (the owner) is the best! He and his staff provide all we need. Our family no longer worries about us. Words cannot express how happy we are here.
