In **Raised on Rhythm**, choreographer and freestyle pioneer Niki "Awandee" Tsappos wants to draw our attention to how rhythms unite, free and set people in motion. But where does a rhythm begin and where does it end?

Niki "Awandee" Tsappos has danced to her own beat since a young age. Today, she inspires her global dance community as an award-winning dancer, choreographer, teacher and judge.

Joanna Holewa Chrona's first solo work, "Phakathi Inside," is a solo odyssey, a return to the inner body and the force dwelling within. It explores the physical and spiritual dimensions, strengthening the manifestation of an avatar - the embodiment of a powerful spirit. Through a unique approach to self and movement, Joanna Holewa Chrona investigates the purpose of dance as a vessel to navigate life's peaks and valleys. What unfolds when one discovers that the magic resides within ourselves, and that the true superpower lies in the art of transmutation?

WIRED is a 40 min. interdisciplinary dance & music performance focused on rhythm, soul and emancipation. It is developed and performed by an international and intergenerational cast with powerful personalities, masterful skill sets and educated points of view.

It's centered around the relation between music & dance as intelligent languages that carry the wisdom of Black traditions. It is an uninterrupted journey through different feelings.

Niki is the dancer and choreographer who has become legendary on the Swedish and international street dance scene. Her technique and presence have not only conquered the world's dance floors, but also led to wins and prestigious titles that have cemented her place both on stage and in people's hearts. Now she turns her gaze inward and creates a new solo work inspired by Mother Earth and the words of mothers. Through rhythm, voice, loops and flow, she explores the body's intelligence, the processes of nature and our inner landscapes. With the rose as both a metaphor and a compass, she leads us through a personal journey in the footsteps of our mothers.

Tracks can be a song, a track or a path.

A path to get lost on and tracks to follow in the search for "the right track". But also the needle that follows the track on the vinyl record, the sounds that arise from grains of dust, creating that recognizable crunch. A reminder of the pre-digital world.

The analog era before we went wireless. When wires connected us, when the tangle created a community. Tracks wants us to remember that the future always holds opportunities to change direction, to build something different.
