

 LG Top-Load Washer & Drying Companion

Top-Load Washer & Drying Companion

LG's Top-Load Washer is built for heavy use with minimal maintenance, delivering fast, efficient cycles that maximize wash quality and throughput. Designed to partner with the LG Commercial Dryer, it's available in single or stacked dryer/dryer configurations.

Durability

Backed by a comprehensive 3-year factory warranty, LG Top-Load Washers feature heavy-duty, belt-free drive for fewer mechanical headaches. Four dampers reduce vibration for quieter operation, while a porcelain-glazed lid and top protect against scratches and wear.

Speed

Advanced smart features deliver a powerful yet gentle clean in less than 29 minutes. The 3-D Gyro Balancing System uses an advanced algorithm for errorless spinning and optimal load balance. TurboWash™ 3D rotates the tub and motor in opposite directions for faster, deeper cleaning, while the exclusive LG Motion Wash system enhances overall wash performance. With 720 RPM spin speed, cycles finish faster, reducing dry times and increasing load turnover for greater profitability.

Efficiency

TurboWash™ 3D technology generates powerful water flow and jet spray to soak clothes faster and clean more efficiently, helping lower utility bills. The 4-Way Agitator, larger than traditional agitators and equipped with large Trihelix™ wings, widens wash coverage and creates strong currents to circulate laundry from the tub floor to the top.

Maintenance

LG Top-Load Washers feature a smart, low-maintenance design with the industry-proven Inverter Direct Drive™ Motor that eliminates belts and pulleys — reducing wear and potential mechanical issues. A removable front service panel allows quick access without uninstalling the washer, while the front-facing pump simplifies servicing. The Tub Cleaning cycle sanitizes the tub with powerful waves of water to remove residue.

Modern Design & Dryer Pairing

With a sleek, contemporary design and premium finish, the LG Top-Load Washer pairs seamlessly with LG Dryers, available in single or stacked dryer/dryer configurations and in natural gas/LP or electric options — delivering a clean, modern look for any professional laundry setup.
