

2025 GPA Midstream Convention

Midstream's premier annual event is attended by 1,800+ professionals from around the world. This is the ultimate destination to connect, collaborate, and explore the latest industry trends and innovations along with peers, technical experts, and C-suite executives.

CONVENTION OVERVIEW

GPA Midstream Convention is a three-day industry gathering featuring technical sessions on operations and safety, emission reduction strategies, and regulatory updates. Attendees participate in workshops, interactive panel discussions, and presentations about innovation technologies to make midstream smarter, safer, and more efficient. Earn continuing education credits while networking with peers and industry experts sharing best practices across the midstream sector.

CONVENTION HIGHLIGHTS

- Regulatory Update from PHMSA Acting Administrator Ben Kochman
- Dozens of presentations, workshops, and case studies on topics like safety, mechanical integrity, operations, data centers, facility design, advocacy, communications, and more.
- Professional Ethics for Engineers Training
- Center Stage Luncheon Keynote from illusionist, inventor, and bestselling author Jason Latimer
- Sporting Clays Networking Event
- Opening Reception & Vendor Night
- Hospitality Night – meet with future partners in a fun setting.
- Become a sponsor – bring visibility to your company and products at midstream's biggest event
