

LEWIS POINT

FULL STACK DEVELOPER

TO WHOM IT MAY CONCERN,

I am writing to express my interest in the software application development position at your organization, as advertised. With over 24 years of experience spanning full stack development, project management, and software architecture, I bring a wealth of knowledge and a proven track record of delivering innovative solutions that drive business success.

For over 20 years I have worked with the Sto:lo services agency, as a software developer. I have recently started providing more in-depth technical support across a variety of systems. These include IIS, SQL, and accounting packages. Please note for security and NDA reasons, I cannot get into too much detail.

At Concentrix, I was part of a team in providing live support for virtual reality headset users, significantly enhancing user engagement and satisfaction. This role honed my ability to understand user needs and translate them into effective software solutions.

My tenure at Avocette Technologies and NNTC (First Nations Tribal Council) involved leading projects from conception to deployment, showcasing my technical prowess in .NET, SQL Server, and web development technologies.

What sets me apart is not just my extensive technical skill set, but my passion for solving complex problems and my commitment to excellence. I am constantly seeking out new technologies and methodologies to improve project outcomes, a quality I believe aligns with your organization's culture of innovation.

I am excited about the opportunity to contribute to your organization and am confident that my skills and experiences will make me a valuable asset to your team. I look forward to the possibility of discussing this exciting opportunity with you. Please feel free to contact me at your convenience to schedule an interview. Thank you for considering my application. I am eager to bring my background in software development and project management to your organization and help achieve new heights in software excellence.

Sincerely,
