

Eco Club

2025 - 2026

In Griffithstown Primary School, the Eco Club plays an important role in promoting care for the environment and sustainable living. We encourage pupils and staff to reduce waste, recycle responsibly, save energy, and appreciate biodiversity. Our Eco Club members take part in practical projects such as creating recycling posters, monitoring classroom energy use, and planting vegetables and flowers in our outdoor areas. They share their findings and ideas during assemblies, helping the whole school community understand how small actions can make a big difference. Through their enthusiasm and teamwork, they inspire others to protect our planet and make eco-friendly choices every day.
