

AI [ARTIFICIAL] INTELLIGENCE] Essentials

This course equips students with a foundational knowledge of Artificial Intelligence, including its principles, applications, and ethical implications so that learners can develop the critical thinking and technical skills necessary to thrive in a world increasingly shaped by AI.

Grades 6-12

Format

- 10 hours
- Self-paced, video-based instruction
- Combination of videos, interactive activities, and real-world examples

What students will learn:

- What Artificial Intelligence is - and is not!
- How to Use AI Suitably, Safely and in an Ethically Responsible Manner
- Prompt Engineering: How to Optimize AI Outputs Efficiently and Effectively
- AI Cheating: Knowing the Difference between Appropriate vs Inappropriate Usage
- Creating Your AI Student Toolkit: Understanding the Landscape of Academic and Career-Ready Resources

Prepare your students for a world being changed by AI
