FUSION OF  
NATURAL  
ELEMENTS  
AND CREATIVE  
DESIGN

## CRAFTSMANSHIP

When craftsmanship and art of jewelry meet creating rare and precious masterpieces like glasses COCO SONG. In their prestigious frames goldsmith techniques are combined with skilled workmanship and assemblages, which transform them in lightweight talismans in wearability but lasting over time, just think to accompany those who wear them on every occasion. Like real jewels, all of the COCO SONG glasses are exclusive and different, as unique as the woman who wears them.

## SILKS

Elegance and brightness. These are the characteristics of silk, a very valuable protein fiber whose fame has crossed all history, reaching up to the present day. Discovered in ancient China, silk has a magical charm that radiates to all the elements with which it is combined. This also happens in COCO SONG glasses where different silk colors overlap and mix creating original and always different patterns of colors and with precious combinations.

## FEATHERS

The lightness of the glasses COCO SONG is enhanced by the symbol of softness and delicacy par excellence: the feather. Coming from certified companies, colored feathers fit naturally into the frames, creating an harmonious and elegant game with the other elements, giving a breath of ethereal impalpability to the glasses.

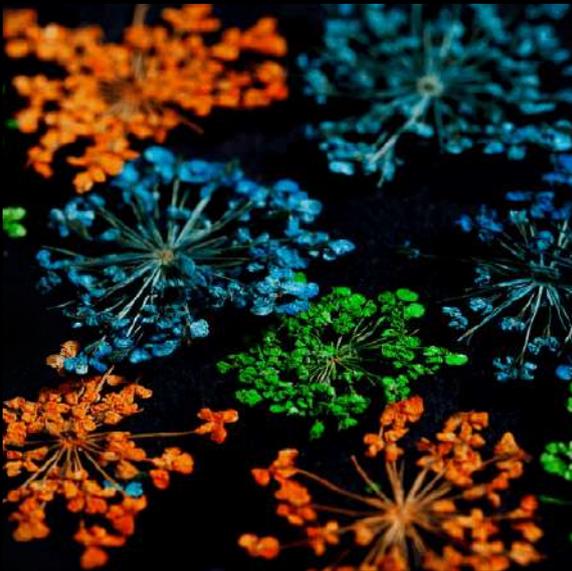

## COLORS

Each COCO SONG eyewear is unique and exclusive. Not just for the materials they make up its frames but also for the colors that characterize it, making it a unique piece. Feathers, silks, stones, leaves and flowers with different shades mix and alternate with exclusive acetates, refined metal decorations and enamels with refined and original shades, creating an irresistible play of colors, made to highlight female beauty.

## FLOWERS

Absolute beauty is an inherent quality within Nature. Only its creations are perfect in every detail and nuance. Precisely for this reason, dried flowers and leaves enter the COCO SONG frames, adding to the glasses that refined and wonderful touch that only Nature can give.

## STONES

COCO SONG, borrows the treasures it holds from nature to pay homage to female beauty, from Nature in the heart of the earth and inserts them in its glasses through the casting technique. Semi-precious stones such as lapis lazuli, turquoise, tiger's eye and others are embedded in the frames, transforming the glasses into jewels which tell stories that are thousands of years old, through symbols and auspicious elements.

## MAGICAL BOX YOUR COCOSONG EXPERIENCE

### FEEL, SEE, TOUCH.

All magic exists only with time and painstaking study, just like Coco Song glasses. In Coco Song frames, unique and natural materials like flowers, leaves, feathers, silks and precious stones are merged with enamels and acetates to create subtle, original textures. All the individual elements are clearly distinguishable, but can also be admired as small parts making up a great masterpiece. Unique and exclusive, Coco Song sunglasses are jewels that will enchant and enthrall any woman who wears them – as only something magical can do.

# COMMUNICATION & VISUAL MERCHANDISING

Every model in the Area 98 collections is a masterpiece made for everyday wear – the result of honed craftsmanship and scintillating creativity.

To fully demonstrate the magnificence of the glasses and the passion that goes into making them, Area 98 provides a series of marketing tools as sales supports: POP, merchandising, social media pages, the website, planning and articles in specialist publications. These materials not only highlight the products at the point of sale, but also allow Area 98 to grab the consumer's attention.

24k gold inserts

A TOUCH OF  
GLAMOUR AND  
GOLD FOR  
MODERN,  
ROMANTIC  
WOMEN.

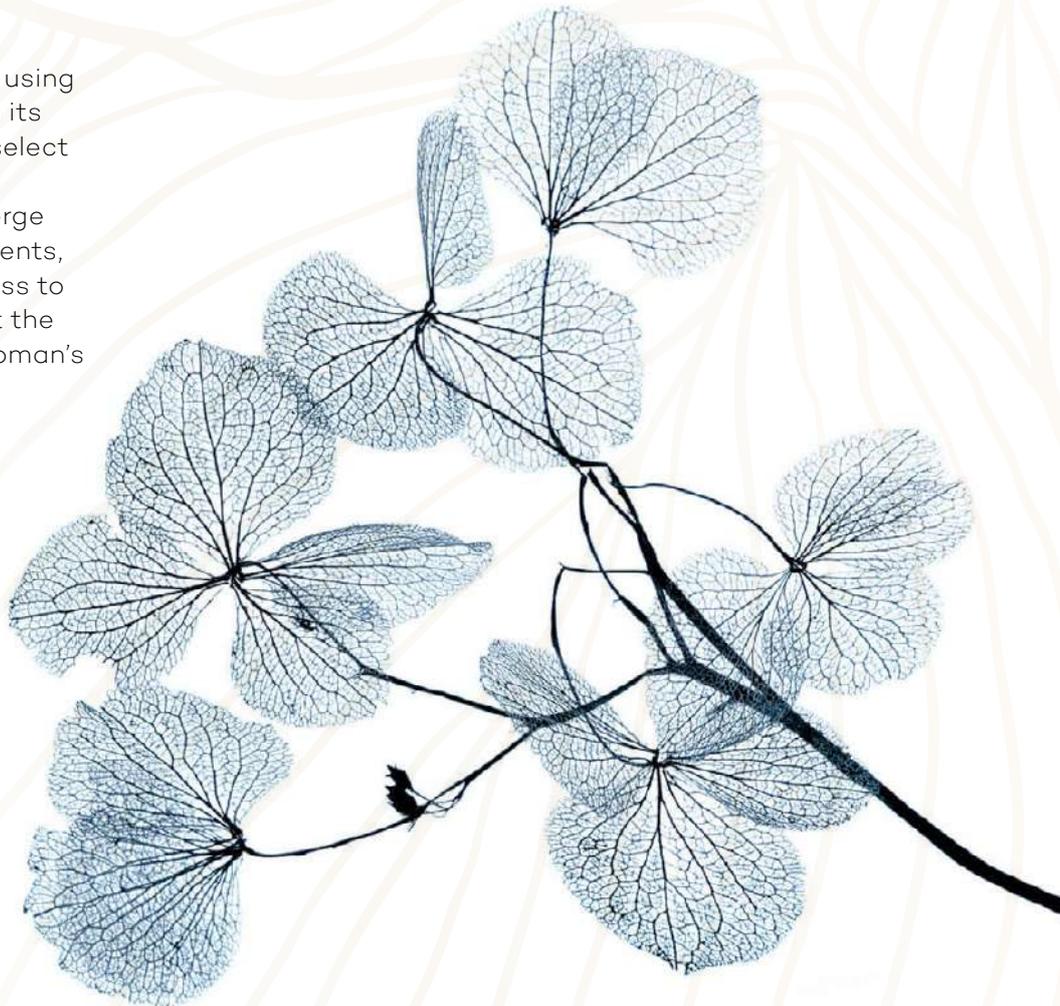

## GOLD 24KT

Gold increases the elegance of everything it touches and, to make its glasses even more unique, CCS has inserted 24 kt gold leaves in its frames. Added directly into the compound, these subtle and bright gold points give a new light to the frames, highlighting the wearer's most beautiful details.

## NATURAL ELEMENTS

CCS honours feminine beauty by using coloured silks and dried flowers in its frames, making them even more select and elegant.

These tiny, fine natural details merge harmoniously with the other elements, adding that extra bit of naturalness to the glasses, which really bring out the carefree and graceful side of a woman's personality.

## METAL

The metal models, presented in gold, rose gold and silver, are characterized by innovative and original textures created with Illustrator, a special printing technique that allows you to customize the metal. Subsequently, once ready, the metal is coated with electroplating, a treatment that protects the glasses, guaranteeing greater resistance to shocks and scratches as well as a more lasting beauty.

## FLORAL PAPER FLOWERS

Sensitivity, purity and romance. These characteristics find their best representatives in flowers and, precisely for this reason, CCS has chosen to include in its frames flowers and sheets with floral prints that blend with the acetate.

The set of these flowers, which follow one another and change in the different frames, give a touch of romanticism to the glasses, emphasizing the purity, beauty and sensitivity of all those women with a gentle soul.

## DELICATE COLOURS, LIGHT SHAPES AND FINE DETAILS.

These are the hallmarks of CCS, a brand that fuses natural elements such as feathers, silks and dried flowers in frames that brim with personality, where marbled acetates are embellished with 24ct gold leaves, accentuating the most romantic and delicate side of the female soul.

# DISCOVER THE NEW SPRING-SUMMER 2022 COLLECTION

## CCS158

Simple and refined lines distinguish this model made of steel with papertransfer, one of the first techniques used in eyewear to give color to frames originally in black, gold or silver, which consists in transferring an image to a support. In this model, the papertransfer was created with the lily, a symbol of purity, nobility and royalty, to recall the aesthetic characteristics of the frame.

The steel temple is characterized by a play of feathers and silk and embellished with a jewel logo on the terminal. The play of the two alternating colors gives a pleasant contrast and enhances the uniqueness of this model.

ANIMAL PRINTS  
AND DAZZLING  
DETAILS FOR  
WOMEN WHO  
LIKE TO  
SHOW THEIR  
WILD SIDE.

# ANIMAL PRINT

Being true to your nature means expressing yourself to the full. And who is your best ally in this mission if not Nature itself? This knowledge has long inspired LA MATTA to choose animal prints as the king of its frames. Leopard, tiger, python and other patterns are found in all the models of its collections, inviting women to release their wildest, natural instincts.

# FINE DETAILS

Nothing is left to chance in LA MATTA frames. Every detail is thought out to the minutest degree. A new acetate process creates refined embellishments reminiscent of mother-of-pearl, giving the glasses luminosity and shine. Designed to bring out the most subtle features of a woman's personality without hiding the determination that only women have, these details that evince mother-of-pearl make each model unique and exquisite.

# DECORATIVE ELEMENTS

Every woman has her own character, and its many facets go to make up her temperament. Just like LA MATTA glasses, where decorative elements in metal and stones create enchanting, seductive details on the frame temples, revealing the hidden, wild sides of the women who wear them.

# COLOURS

In order to give full rein to the breadth of female character and to help women to fully express their personalities, LA MATTA colours its animal prints with original, happening tones. The new colour graduations come in pink, blue, red, green, purple and a variety of other shades, so that allow women can search the brand's various models for the shades that speak for them most.

# COMMUNICATION & VISUAL MERCHANDISING

# DISCOVER THE NEW SPRING-SUMMER 2022 COLLECTION

## LM3315

The undisputed protagonist is the animalier, which in the new acetates is colored with unusual shades. Leopard, brindle, python, zebra, spotted ... the 2022 textures give life to impact frames, where iridescent palettes and unexpected color combinations are the masters. A true triumph of precious details, which make each model unique. The end of the temples is always embellished with the logo inserted under enamel, while the upper part has decorations with stones always obtained from acetate.

## LM3320

The frame is in acetate with two different bondings: animal print for the upper frame front and monochrome for the lower part with bright colours that really stand out. The temples are always the same as the upper part of the frame front while the logo laid under enamel gives a final flourish to the temple tips. The jewel embellishing the temple is made using the lost-wax technique, and is a play on the jewels that inspire it, in line with happening trends.

## LM3323

A real jewel to always carry with you. In acetate with two different bondings, typical of the brand, animalier patterns are combined with increasingly sinuous shapes giving life to refined frames where iridescent palettes and unexpected color combinations are the masters. Goldsmith's workmanship and inspiration from high jewelry becomes a decoration made of investment casting with enameled details in alternating colors. The enriched temples make this model a perfect eyewear for a contemporary, refined look that never goes out of fashion.

## LM3327

The oversized film star format for this model gives the eyes a mysterious air and a fascinating allure. Made in acetate with two different types of bonding, the LM3327 comes in three variants: animal print and Havana – a mainstay of the brand – multicolour animal print and zebra and black, with mother-of-pearl inserts. The acetate temples, with the same texture as the upper part of the frame front, are embellished with semi-precious stones and jewelled details, made using the lost-wax technique.

COLOURFUL AND ORIGINAL  
FOR PEOPLE WHO LIKE TO  
THINK OUTSIDE THE BOX

Unruly elements and unconventional combinations  
– but also space for creativity,  
free expression, individual interpretation and matching of colours.  
KAOS glasses represent a new way of looking at the world.  
Designed for everyone who strives to show their most creative side  
and who seek out different perspectives.  
KAOS is the perfect brand for people who like to think outside the box.  
This is the philosophy that led to the birth of SUPERKAOS in 2020.  
Created as a capsule collection to mark the 20th anniversary of KAOS,  
SUPERKAOS is aimed at anyone who wants to be original  
but who also likes to keep it simple.

**ECCENTRIC**  
**ORIGINAL**  
**PLAYFUL AND COLOURFUL**

## EXCLUSIVE ACETATE

Seemingly uncoordinated and untidy, KAOS glasses are in fact minutely designed down to the last detail. They are no less than a new form of expression that allows you to freely combine, match and interpret colours.

These are the hallmarks of KAOS and SUPERKAOS glasses, where different textures and patterns come together through the bonding technique, accentuating and exalting the dominance of KAOS.

## PROCESSING

When acetates and metals come together, they bring out the best in each other.

This is what happens in the temples of KAOS and SUPERKAOS frames. The processing and combining of these elements makes the glasses lighter, more versatile and more original.

## STEEL

Handling and mobility.

These are the standout features of SUPERKAOS glasses when steel is used instead of metal, making the frames incredibly light.

## COLOURS

KAOS – colours are its best friends.

In KAOS and SUPERKAOS glasses, fluorescent tones and chromatic contrasts are used to colour geometric figures and alternating shapes by use of the innovative 3D digital printing (HDA) technique, giving the glasses an energetic and creative charge that makes them extravagant, original, playful and colourful.

# COMMUNICATION & VISUAL MERCHANDISING

# DISCOVER THE NEW SPRING-SUMMER 2022 COLLECTION

## KK527

Dedicated to those who do not want to go unnoticed, this model plays on the strong contrast between the monochrome of the acetate and the textures that instead characterize the temple and the upper part of the frame, to create a continuum that gives the face an absolutely over the top look. To create these very particular patterns, tiny pieces of acetate were used which, once glued together, give life to original and modern patterns. A stylish detail is the temple, embellished with geometric details inspired by the jewels in vogue in the Sixties.

## KK531

Made of steel and acetate, KK531 is a sophisticated and eccentric model, which revisits one of the classics of the 1950s in a colorful and pop key: the browline style. The upper part of the frame, frames the lenses in the same way that the eyebrows frame the eyes. The peculiarity, however, lies in the very original texture, created by gluing small pieces of acetate to give life to a showy and colorful pattern, which stands out on the other monochromatic elements of the glasses. The same texture is also found on the temples, also embellished with contrasting geometric elements.

ARTWEAR

*A MODERN,  
UNCONVENTIONAL STYLE  
INSPIRED BY POP ART.*

## **BONDING TECHNIQUES**

Any work of art is based on a union of different elements that alternate and blend to create something sublime.

This is also the case with GENESIS frames: the bonding technique involves lots of little pieces of acetate that come together to create original, ever-changing textures. The result is glasses that are true masterpieces.

## **DIGITAL PRINTING**

3D digital printing is used in GENESIS frames to create unique, creative patterns:

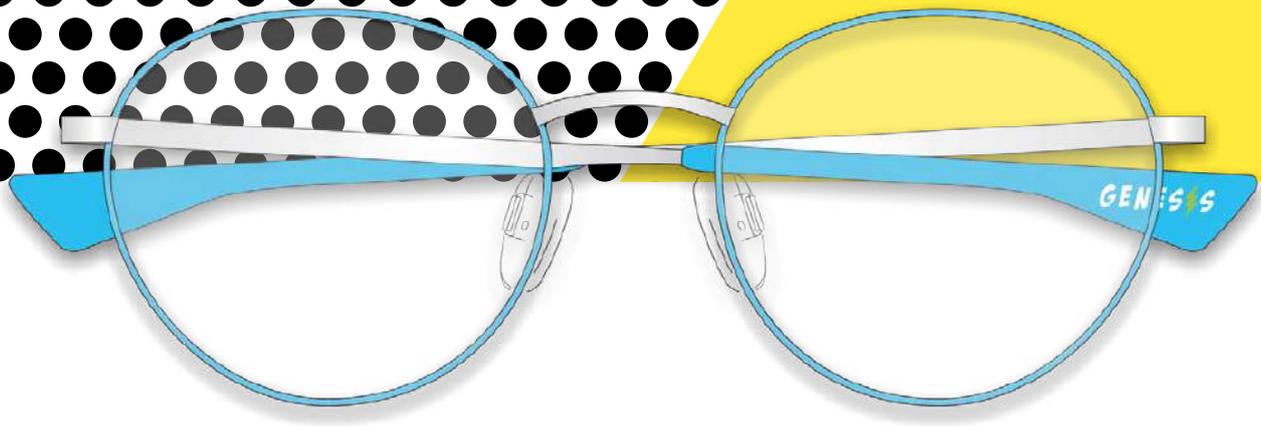

this high-resolution printing not only provides super-definition details and unmatched brightness of colour, shape and texture, but also allows you to feel the thickness of the design when you touch the frame.

A truly innovative solution that takes traditional painting media and repurposes them in a digital version.

## **POP ART**

Art has always been a source of inspiration. GENESIS takes its inspiration for its frames from the one of the world's most well-known and well-loved art movements: pop art. Bright colours, optical effects, abstract patterns, unusual combinations and unconventional shapes are just some of the features of this art genre. GENESIS takes them and reworks them in its glasses, turning each model into works of art you can wear every day.

## COMMUNICATION & VISUAL MERCHANDISING

Every model in the Area 98 collections is a masterpiece made for everyday wear – the result of honed craftsmanship and scintillating creativity.

To fully demonstrate the magnificence of the glasses and the passion that goes into making them, Area 98 provides a series of marketing tools as sales supports: POP, merchandising, social media pages, the website, planning and articles in specialist publications.

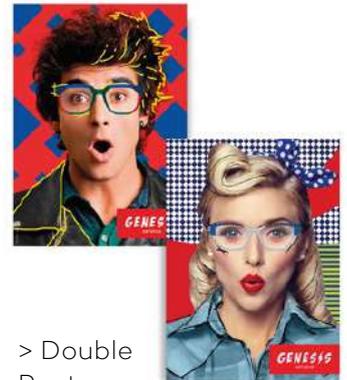

These materials not only highlight the products at the point of sale, but also allow Area 98 to grab the consumer's attention.
