Tolv

An introduction

Tolv is a Danish-owned furniture brand that has been designing and producing original and iconic products for homes and interior spaces worldwide since 2014.

We are delighted to make our European debut this year at **3daysofdesign**

Tolv

Tolv means “12” in Danish, describing a framework for living that’s centered around your day.

The number twelve is integral to daily life and provides a fundamental framework across time, space, and art. It divides time into twelve hours on a clock and twelve months in a year. There are twelve zodiac signs in astrology, twelve main hues on the color wheel, and in music, twelve pitches form an octave. In geometry, a cube has twelve edges, and twelve inches make a foot.

Our thoughtful and considered pieces work for you around the clock.

Tolv

The Why.

At its core, Tolv exists to make furniture that feels resolved—visually, practically, and emotionally.

We work with designers who share this ethos, who understand that beauty is not enough on its own.

A product must also be usable, durable, and appropriate to its purpose.

We see design as a process of solving—not just expressing.

Tolv

The How.

Tolv is a furniture brand founded on the principle that effective design communicates softly yet clearly, crafting pieces that embody honesty—where no element is superfluous, and every detail serves a purpose. The brand embraces simplicity, intentional proportions, and a respectful use of natural materials

We don't follow trends or chase novelty. Instead, we aim to create enduring objects that hold their own over time. Everything we make is the result of careful collaboration, where ideas are tested, adapted, and refined until they feel right. There are no gimmicks, no unnecessary gestures—just thoughtful, well-made furniture that carries its weight quietly.

Tolv

Our belief.

Tolv is built on the belief that good design speaks quietly but with clarity.

We're drawn to pieces that feel honest—where nothing is forced, and every element has a reason for being there.

Our approach favours simplicity, thoughtful proportions, and materials used with respect.

It's about achieving the most with the least.

Tolv

Scandinavian ideals.

Tolv upholds the Scandinavian ideals of well-made, well-designed furniture. We are obsessive about the finer details, and the collection is made in our own factory where we can keep a keen eye on quality.

Our products are built using premium materials and manufactured by skilled craftsmen under Danish management.

Our factory is set up to engage with designs that involve a high degree of manual skill and time-consuming procedures, placing us at the intersection of craftsmanship and mass production.
