

VOLA

VOLA created the modern tap in 1968. Following the original designs by the renowned Danish architect Arne Jacobsen, VOLA combine exceptional Danish design with the traditions of craftsmanship and responsible manufacturing. Since the beginning, VOLA products have been acclaimed for their timeless design and high quality.

The Original. Recognized worldwide

Architects and designers worldwide acknowledge VOLA as a true stamp of quality; VOLA is the original, not an imitation. These iconic designs have earned numerous awards and are featured in prestigious museums, including MoMA in New York and Designmuseum in Denmark. Renowned for their timeless elegance and innovative craftsmanship, VOLA products continue to set the standard in design excellence and continues to be recognised and awarded today.

Infinite possibilities. One unique modular system

Part of what makes VOLA truly different is the unique modular system. All VOLA products are future-proofed and offer infinite design possibilities, because they are designed to work within our unique modular system. This provides endless customisation, configuration and adaptability.

Built on Arne Jacobsen's original proportions of the 111, HV1 and KV1 built-in mixers, the VOLA modular system's family of parts, including levers, handles, spouts and plates, are all interchangeable. Every VOLA product is available in a wide range of colours and metallic finishes, giving limitless creative possibilities. The modular system means that VOLA fits into any design scheme and allows customization to respond to changing lifestyles and interior specifications.

Designed and produced in Denmark

In the factory in Denmark, VOLA manufacture every product to order, using only the highest quality materials and the continued commitment to craftsmanship and attention to detail. The results are beautiful, hand-finished products that not only look and feel extraordinary, but also ensure the seamless integration of water into architecture for generations to come.

Designed for generations

All VOLA products, including those from 1968, will never become obsolete. The world needs durable products to reduce use of the planet's scarce resources. That's why all VOLA products are designed and made to last. All VOLA products are repairable, with spare parts available for every product made since 1968.
