

# PRESS RELEASE

## Vintola Studio at 3daysofdesign 2026

### Honest Craftsmanship - The Impact of Polish Heartbeat

Warsaw-based Vintola Studio joins *Honest Craftsmanship - The Impact of Polish Heartbeat* during 3daysofdesign 2026 in Copenhagen, presenting a selection of collectible and functional furniture shaped by material sensitivity, sculptural form and timeless aesthetics.

Founded in 2018 by designer Ola Szewczul, Vintola Studio develops original furniture collections alongside carefully curated vintage objects, creating a dialogue between contemporary design and historical character. The studio's approach combines refined proportions, tactile finishes and emotional presence with everyday usability.

Presented within the collective exhibition bringing together a new generation of Polish designers, Vintola Studio showcases pieces rooted in authenticity, precision and close attention to materials. Soft geometries, balanced silhouettes and understated detailing define the studio's visual language, reflecting a calm and atmospheric approach to interiors.

Alongside collectible furniture, the studio also develops premium functional pieces designed for hospitality spaces, including luxury hotels, fine dining restaurants and private interiors. Each object is created with an emphasis on longevity, comfort and craftsmanship.

Through its presentation at 3daysofdesign, Vintola Studio highlights a contemporary perspective on Polish design - one that values material honesty, emotional connection and thoughtful form over excess.
