

Gessi: a journey through the vision

*From Woven Metal craftsmanship to Haute Culture,
Gessi brings its culture of living to Copenhagen for the first time*

Serravalle Sesia, 25.05.2026

Gessi makes its **debut at 3 Days of Design Copenhagen** with an immersive exhibition conceived as a journey through its creative universe. Hosted at **Galerie MøllerWitt**, in **the heart of the historic Frederiksstad** district and directly facing the Designmuseum Danmark, the exhibition **transforms the former art gallery into a refined exploration of water**, materiality and contemporary living.

Through immersive installations and experiential settings, visitors are invited to **discover some of Gessi's most iconic collections** up close, interacting with sculptural forms, tactile surfaces and atmospheres conceived in the unmistakable language of Gessi.

The journey unfolds through the **Woven Metal** craftsmanship of **Gessi316**, where steel is transformed through **textures, patterns and sophisticated finishes** into a material with an unexpectedly soft, textile-like identity, blurring the boundaries between industrial precision and decorative artistry.

Alongside it, **Incastri**, created in collaboration with Japanese architect **Kengo Kuma**, explores the dialogue between vision and memory through balanced geometries, interlocking textures and references to traditional **Japanese craftsmanship** techniques such as **Chidori** and **Yakisugi**, creating an aesthetic of lightness, harmony and essentiality.

The exhibition continues with **Inciso**, inspired by the warm modern **sensibility of New York design**, where simplicity, heritage details and tactile finishes merge into a timeless and deeply architectural expression. Alongside it, **Venti20** reinterprets the spirit, optimism and **elegance of the Roaring Twenties**, bringing the emotional power of beauty and decorative refinement into contemporary living spaces.

The experience culminates in the philosophy of **Haute Culture**, the ultimate expression of Gessi's culture. A **sartorial, experimental and deeply emotional vision** where beauty becomes ritual and wellbeing transforms into an inner experience. Through collections such as Jacqueline, Pelle, Ludovica and Perle, together with **the iconic Haute Culture trunks** that have become emblematic of this design language, the exhibition enters its experimental dimension.

Jacqueline brings nature into the most intimate space of the home through an unprecedented **interpretation of bamboo root craftsmanship**, echoing the iconic language of haute couture accessories in creations of quiet and unexpected elegance.

GESSI

Pelle originates from the study of Tressé, **the art of weaving in fine leatherwork**, reimagined **through brass** to evoke the illusion of a material that is not truly there, suspended between what the eye perceives and what the hand discovers.

Delicate engravings of light, softly sculpted volumes and **hand-set brilliant accents** define the sinuous forms of **Ludovica**, where the gestures of **fine jewellery** craftsmanship become objects of intimate and luminous elegance.

Perle speaks the language of purity and perfection, translating **centuries of Murano glassmaking, marble sculpting and metal craftsmanship** objects of sculptural purity and magnetic presence.

Each collection is born from **rare materials, artisanal mastery and refined aesthetic research** — creations conceived to invite touch, drawing the hand toward water and **restoring to it the sense of preciousness it has always held at the heart of Gessi's vision**. Through this layered and evocative journey, Gessi reveals **the many nuances of its universe**, transforming Galerie MøllerWitt into **a living expression of its culture** — a space designed not only to be seen, but truly felt.
