EXAKT MFG Makes Its International Debut During 3 Days Of Design

Swedish lifestyle brand EXAKT MFG makes its international debut at this year's 3 Days Of Design in Copenhagen. Presented at Frederiksgade 1, the exhibition introduces new furniture, kitchens and objects developed through a tightly connected process between design and production.

Founded by Christoffer Söderqvist, EXAKT MFG combines artisanry and state-of-the-art industrial technology to create furniture shaped by longevity, material understanding and contemporary living. With its own factories and fully in-house production, the company works without distance between sketch and finished object, allowing material, construction and atmosphere to evolve simultaneously throughout the process.

During 3daysofdesign, EXAKT MFG presents *The Listening Lounge*, a spatial installation exploring how sound shapes the way people gather, interact and experience a room. Conceived as a social environment rather than a traditional showroom, the exhibition reflects a growing cultural shift towards slower, more intentional forms of living and social connection.

New collections of furniture and objects are presented alongside two entirely new kitchen concepts, developed according to EXAKT MFG's philosophy of reduction, practicality and longevity. For the company, beautiful objects are resolved objects. Every element exists because it earns its place.

Extending the listening lounge concept further, EXAKT MFG also presents its own high-fidelity speaker collection, treating sound as an integral part of the interior rather than a separate technical element.

Quote - Founder, Exakt MFG Christoffer Söderqvist

"For me, artisanry is about skill, care, and responsibility. It is a way of working that has gradually shaped how I want to design, and take responsibility for what I put into the world. EXAKT MFG grew out of that process."

Quote - Designer, Superlab Jenny Madsen

"By starting from everyday life rather than isolated products, EXAKT MFG reverses the traditional design process, developing furniture around the ways people actually gather, listen and spend time together. What began as an exploration of music and shared presence has naturally become part of a larger international conversation around more meaningful social experiences."

Exhibition: The Listening Lounge
Presented by: EXAKT MFG in collaboration with the design studio Superlab
Event: 3 Days Of Design
Venue: Frederiksgade 1
Dates: 10–12 June 2026
Opening hours: 10:00-18:00
City: Copenhagen Denmark

About Exakt MFG

EXAKT MFG is a Swedish furniture studio and in-house manufacturer based in southern Sweden. By designing and producing furniture within its own workshops, EXAKT MFG maintains full control over materials, processes, and quality. The studio works at the intersection of artisan skill and industrial precision, developing furniture shaped by real use, long lifespans, and contemporary ways of living.
