

Prospera Energy is a Canadian company advancing efficient, sustainable oil and gas production. Unlocking overlooked assets to drive value and deliver compelling returns

February 2026

Legacy Fields. Modern Solutions.

Revitalizing overlooked heavy-oil assets with modern recovery methods, capital-efficient execution, and aligned leadership.

TSXV: PEI

Strategic Outlook

Prospera aims to increase gross production to over 1,000 bpd at the first point of sale, while enhancing cash flow through operational efficiencies and higher netbacks to strengthen financial position and expand financing options.

1

Operations – Increase Production through Well Deliverability Improvements in our Heavy Oil Pools

- Optimize production by enhancing waterflood patterns and reservoir management.
- Reactivate and optimize existing wells with efficient service rig deployment.
- Boost uptime with proactive maintenance and winterization programs.

2

Driving Cost Efficiencies Through Financial Discipline

- Improve production reliability across all core assets.
- Reduce fixed costs via lesser surface lease requirements and property taxes.
- Cut operating expenses through effective vendor alignment.
- Lower G&A expenses with disciplined cost control.

3

Enhancing Cash Flow and Financial Certainty

- Boost cash flow for stable financial predictability and capital deployment.
- Improve confidence with effective vendor alignment and synergies.
- Enhanced access to capital through demonstrated performance.

4

Investor Relations – Increased Communication and Transparency

- Ensure timely, reliable disclosures and press releases.
- Commit to on-time filing of audited financial statements.

Disclaimer:
The production figures are based on Prospera Energy Inc.'s standardized reporting definitions in alignment with ASC 51-324. Gross production represents the Company's working interest before royalty deductions, while net production accounts for royalties. Prospera reports gross production at the first point of sale, excluding volumes used in operations and partner production from those in arrears. Readers are advised to refer to this reporting framework for accurate interpretation of production data.

ASSET OVERVIEW

CUTHBERT SNAPSHOT

ASSET OVERVIEW

WI = 100%, Multi-Zone Inventory
(Basal Mannville oil, Viking gas, Colony gas)

- Development plan of horizontal producers and injectors
- Oil battery facility with all wells pipeline connected
- 14° API oil @ WCS equivalent pricing
- Unconsolidated sand with >30% porosity and >1 darcy permeability
- Recovery factor in pools ~10% with historical pressure maintenance
- Initial reservoir pressure ~8,200 kPa
- Stratigraphically divided into an Upper/Lower Sand
- Primary Target : Lower Cretaceous Basal Mannville Sand

RESERVES

Summary December 31, 2024	PDP	1P	2P
MBOE	552	1,903	3,039
OOIP (MBBL)	54,468	54,468	54,468
Recovery Factor (%)	9	9	9
NPV10 (BT) \$MM	19	55	85

*Updated Feb 1st 2026

ASSET STRATEGY

Injection Optimization & Reactivation.

- Well Workover Program**
 - Several Heel Perf Candidates identified after success on the Hz 8-2 Heel Perf Program
 - Reactivation & Restart of existing oil wells once water injection capacity has been increased
 - Water Injection well stimulations to add injection capacity
- Water injection**
 - 2 Pipeline Replacements complete (2-28 and 6-28)
 - Water Plant Injection Plant Upgrade in progress to add 3000+ m3/d of injection capacity
 - Waterflood optimization in progress
- Infrastructure Upgrades**
 - New Engines, Hydraulic Skids, flowline valves
 - Comprehensive winterization is complete
 - Collaboration with SaskPower to reduce power outages and other power issues
- Asset Optimization**
 - Excess equipment inventory inspected and now ready for use
 - Cut and cap program complete enroute to reducing surface lease expenses
 - Eliminated numerous non-compliances

 Cuthbert

ASSET OVERVIEW

Cuthbert South Seismic Oil Pool Outlines

Calculated drainage areas (hectares) highlighted in orange circles. >50% drainage within the green dash circles.

LUSELAND SNAPSHOT

ASSET OVERVIEW

WI = 100%, largest OOIP (70% of company), targeting multi zone oil (Bakken, Waseca) with reactivation of prolific wells

- Development plan focused on reactivation of suspended wells
- Oil battery facility with water disposal infrastructure
- 12° API oil @ upwards of 14 meters of net stacked pay
- Unconsolidated sand with >33% porosity and >2 darcy permeability
- Recovery factor in entire Bakken pool area <8%
- Initial reservoir pressure ~5,800 kPa
- Stratigraphically contiguous marine sand preserved at subcrop edge
- Primary Target : Lower Mississippian Bakken Sand

RESERVES

Summary December 31, 2024	PDP	1P	2P
MBOE	233	845	1,151
OOIP (MBBL)	282,228	282,228	282,228
Recovery Factor (%)	8	8	8
NPV10 (BT) \$MM	5	16	22

*Updated Feb 1st 2026

ASSET STRATEGY

Reactivation of legacy suspended wells at 3–8% recovery factors and produce using CHOPS (Cold Heavy Oil with Produced Sand) techniques

1

Workover and Reactivation program

- 18 well reactivation program complete
- 42 additional Tier 1 reactivations identified
- Daily monitoring of fluid levels and wellhead cuts

2

Single Well Battery Setups

- Brand new single well battery setups built for reactivated wells
- Full winterization package to maximize runtime year-round
- High fixed cost, low variable cost pool

3

Sand Control Strategies

- Undersized rotors with soft-nitrile elastomers
- Recycle pump injecting 3–5 m3/d oil into casing + sand suspension chemical
- Instigate wormhole propagation

4

Significant Upside

- Additional reactivated wells reduce overall pool operating cost per barrel
- Current wells online continue to add barrels through speed-ups
- Certain sections with recovery factors <3%

HEARTS HILL SNAPSHOT

ASSET OVERVIEW

WI = 100%, multiple producing zones (Bakken oil, Sparky oil) with waterflood analogues

- Development plan of Bakken horizontal producers and injectors
- Oil battery facility with all wells pipeline connected
- 15–17° API oil @ WCS equivalent pricing
- Unconsolidated sand with >27% porosity and excellent permeability
- Sparky recovery factor ~10% with no pressure maintenance
- Bakken recovery factor ~10% with historical pressure maintenance
- Initial reservoir pressure ~5,800 kPa
- Primary Target : Lower Mississippian Bakken Sand

RESERVES

Summary December 31, 2024	PDP	1P	2P
MBOE	355	1,603	2,010
OOIP (MBBL)	42,030	42,030	42,030
Recovery Factor (%)	10	10	10
NPV10 (BT) \$MM	12	43	54

*Updated Feb 1st 2026

ASSET STRATEGY

Optimize injection, restart wells, advance JVs.

- 1

Workover Program
 - Additional workover candidates have been identified.
 - Restart of existing wells once Water Injection Pipelines replaced.
- 2

Water Injection
 - 2 Pipeline Replacements, 1 complete and 1 in progress
 - Water Injection well stimulations to increase injection capacity
 - Waterflood optimization in progress to target bank oil and new patterns
- 3

JV Partner
 - Sparky and Waseca development
 - 3D Seismic updated interpretations
- 4

Infrastructure to Grow
 - Large-scale central processing facility with modern design
 - Surface land availability to expand pool development
 - Emulsion and injection pipelines to optimize waterflood patterns
- Hearts Hill

Our Leadership Team

Shubham Garg

CEO & Executive Chairman

Oil entrepreneur with deep technical expertise, 10 years of operational experience, and a proven capital-markets track record. He has led complex energy projects across engineering, service providers, and strategic investors. Shubham drives sustainable growth, operational efficiency, and shareholder value.

Darren Jackson

Chief Operating Officer

Professional engineer with 30 years of leadership in oil and gas operations, engineering, and production. He has guided E&P teams across Western Canada and offshore assets. Darren leads field operations, innovation, and operational excellence.

Chris Ludtke

Chief Financial Officer

Finance executive with 20 years in heavy oil, upstream operations, and strategic planning. Previously spent 12 years at Husky Energy focused on thermal and CHOPS economics and multi-year capital planning. At Prospera, he leads finance and strategy for redeveloping Saskatchewan's legacy heavy-oil fields.

Peter Chung

Sr. Reservoir Engineer

Senior Reservoir Engineer with 18 years of experience in reservoir management and EOR. A Ph.D. in Chemical Engineering, he has led reserve optimization strategies and recovery improvement pilots. Peter drives reservoir modeling, EOR planning, and asset-level technical strategy.

Our Board of Directors

Matthew Kenna

Board Member

Seasoned executive with 30 years of leadership experience, operational discipline, and a strong record of financial performance. A CPA, CMA with deep expertise in scaling businesses, streamlining operations, and strengthening client and capital relationships. Matthew has led major turnarounds, improved profitability, and built lasting connections across Calgary's finance and business community.

Mark Lacey

Board Member

Mark Lacey is an entrepreneur and investor with 20 years of experience in public and private markets. As President of a Central Alberta family office and a graduate of the Canadian Securities Institute, he focuses on portfolio management, capital allocation, and strategic growth, using his market insight to identify and execute high-value opportunities.

Brian McConnell

Board Member

Brian McConnell brings 47 years of experience across Heavy Oil, Light Oil, and Natural Gas exploration and production throughout the Western Canadian Basins. He has held senior roles at Saskoil, Wascana Energy, Murphy Oil, and Tundra Oil & Gas, driving major production growth. Brian now serves as President of 1101391 Alberta and Highway Seven Resources.

Christopher Moore

Board Member

Christopher Moore is an entrepreneur and investor with over 30 years of experience building and scaling businesses. A University of Ottawa graduate, he leads a successful healthcare company and is a major Prospera Energy shareholder. He brings strong oil and gas insight, a data-driven approach, and a solid grounding in corporate governance and accountability.

Forward Looking Statements

This presentation contains forward-looking statements relating to the future operations of the Corporation and other statements that are not historical facts. Forward-looking statements are often identified by terms such as “will,” “may,” “should,” “anticipate,” “expects” and similar expressions. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding future plans and objectives of the Corporation, are forward looking statements that involve risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements.

Although Prospera believes that the expectations and assumptions on which the forward-looking statements are based are reasonable, undue reliance should not be placed on the forward-looking statements because Prospera can give no assurance that they will prove to be correct. Since forward-looking statements address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, risks associated with the oil and gas industry in general (e.g., operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve estimates; the uncertainty of estimates and projections relating to production, costs and expenses, and health, safety and environmental risks), commodity price and exchange rate fluctuations and uncertainties resulting from potential delays or changes in plans with respect to exploration or development projects or capital expenditures.

The reader is cautioned that assumptions used in the preparation of any forward-looking information may prove to be incorrect. Events or circumstances may cause actual results to differ materially from those predicted, as a result of numerous known and unknown risks, uncertainties, and other factors, many of which are beyond the control of Prospera. As a result, Prospera cannot guarantee that any forward-looking statement will materialize, and the reader is cautioned not to place undue reliance on any forward- looking information. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement. The forward-looking statements contained in this news release are made as of the date of this news release, and Prospera does not undertake any obligation to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by Canadian securities law.
