■ ReWild Doddaballapura

Enveloped by lush forest on three sides.

**Luxury** feels different here, quieter, slower, wilder.

**Un**seen. **Un**matched. **Un**manicured.

**ReWild** redefines luxury through **low-density, nature-preserved hilltop plots** that feel more like an **unspoiled forest than a manicured estate**. This isn't curated landscaping, it's the **raw terrain** itself. Unfiltered, unblemished, unscripted. **Carved into the hilltop and surrounded by forest on three sides**, these plots are designed for those **who find value in the unseen** and **meaning in what remains untouched**.

# Up Ahead!

An aerial view of our hilltop, embraced by the forest on three sides.

Bengaluru's best-kept secret, **ReWild Skyward**, is an **exclusive collective of only 28 hilltop plots, each spanning 5,000-15,000 sq. ft.**, rare, expansive sanctuaries set within **27,000 acres of pristine reserve forest**. Here, land rises into higher ground, becoming more than ownership, it becomes **perspective**.

**Perched above the rest**, the landscape unfolds in terraced contours with **360-degree views of hills, lakes, and forests** at every turn. Each plot is framed by wilderness, offering **both vast openness and quiet privacy**.

Every element, from pause decks and nature trails to native greenscapes, is designed to let the site breathe, so life here feels like an unending dialogue with nature. **Mornings rise with the sun, evenings open to the horizon, and every day carries the feeling of being endlessly elevated.**

# A landmark of **trust**

The founders of ReWild Doddaballapura discovered **a property with rare environmental richness** and **chose to retain and elevate its essence**. Working with master planners, landscape designers, and architects, they **crafted a hilltop plan where every intervention is intentional**, from water conservation systems with retention ponds and recharge zones to the planting of low-maintenance native species that keep the **landscape sustainable while enriching biodiversity**, ensuring the **terrain remains natural yet elevated**.

**Sustainability here is more than functional** — shaping a cooler microclimate, inviting biodiversity to thrive, and grounding every step in something larger and lasting.

Just as importantly, the spatial design ensures **best-in-class views and complete privacy across plots**, while weaving in common zones that nurture community and interaction. By balancing ecology with lifestyle, and personal sanctuaries with shared spaces, **ReWild sets a new benchmark in design-led nature living**, a landmark of trust, crafted for generations.
