Tech4Eva: Accelerating Innovation in Women's Health

Tech4Eva is a pioneering initiative designed to accelerate innovation in the field of women's health, known as Femtech. It serves as a dynamic global ecosystem that connects start-ups, corporates, healthcare professionals, investors, and researchers to foster the development of technology-driven solutions addressing the unique health challenges faced by women. Through mentorship, funding opportunities, and strategic partnerships, Tech4Eva aims to enhance access to and the quality of healthcare for women globally, promoting advancements in areas ranging from reproductive health to chronic disease management and mental wellbeing.

What kind of start-up are we looking for?

We are on the lookout for tech-driven start-ups that show growth potential in the Femtech sector. We welcome start-ups of all nationalities and those with unique healthcare solutions. Ideal candidates should have products ready for market or proof of concept validated, showcasing their commitment to impacting women's health positively.

A strong, cohesive team is at the heart of what we search for, as it's the foundation upon which successful ventures are built. We are particularly interested in start-ups looking to expand their reach internationally.

Additionally, commitment is key. We seek teams that are dedicated to participating actively in our program, ready to engage with our network of experts, mentors, and investors. If your start-up is at the intersection of technology and women's health, aiming for global impact and backed by a passionate team, Tech4Eva is your platform to shine and grow.

Research confirms that mental health is metabolic health. HEALTHY-LONGER has developed and validated the first neuro-metabolic assessment and neuro-nutritional treatment addressing the root cause of mental health vulnerability and disorders – neuro-nutrient deficiencies. The technology is intended to be the first metabolic neuro-biomarker-based diagnostic tool in mental health.

A pole of innovation as Tech4Eva's birth house

Whereas EPFL draws some of the best international researchers to develop cutting-edge technology, the EPFL Innovation Park is a hive of interaction between academia and business, attracting outstanding, innovative projects and empowering them to flourish, scale up and transform society. Together, we are engaging our resources to meet the challenges facing today's world.

Over one third of their innovations relate to solving key health issues related to aging, changes in metabolism, cardiovascular problems or rare diseases. In addition, companies at the EPFL Innovation Park are actively engaged in implementing effective processes and measures to guarantee a more sustainable future. The EPFL Innovation Park has hosted and supported around 500 startups and scale-ups over the past 30 years. These have made a significant contribution to improving the well-being of humankind.

Driven by the influx of dozens of disruptive projects emanating from research laboratories each year, they continually adapt their offering, going beyond expectations while staying one step ahead of future societal needs. Drawing on the accumulated experience of their extensive team of coaches and mentors, they offer tailored support to businesses across a wide range of sectors at every stage of their development. They also team up with industry leaders to design unique programs such as ours, Tech4Eva in Femtech, or Tech4Trust in cybersecurity and digital trust.
