This quarter section is one mile east of St. Denis and 35 km east of Saskatoon, offering farm and residential potential with access just off Highway 5. Soils are Dark Brown Clay Loam, final rating of 46.5 points per cultivated acre, very open quarter. Seeded to wheat in 2024 and canola in 2025.

The 12.90 acre yardsite in northwest corner is in the process of being subdivided and is not included in this listing, approximate boundaries can be seen in photos.

After subdivision, this quarter will include 140 approximately cultivated acres.

The yardsite may also be available for purchase - interested buyers are encouraged to inquire with listing agent for further details.

Owners have advised there is a well present on Block A Plan 102282005, although it has not been used for approximately 20 years.

If purchased prior to April 1, 2026, buyer can farm this land in 2026.

Farmland & Price Summary

- 147.36 title acres (estimated based on proposed subdivision)

Property Information

- 147 total acres (as proposed)
- 140 cultivated acres
- 7 wetland/bush acres
- \$272,400 total 2025 assessed value (AV)

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
