

Dear friend,

Is it May already? Welcome back to On the Radar, your monthly source for all things NST. This month, we're hitting the gym with a case study on how to safely lift the weight of compliance. Next, NST is happy to report the addition of a new team member, Jenn Fox! Finally, we're keeping you in the loop on events we're tracking over the next month. Check it out!

Case Study - Fully Embedded NERC CIP Support

NERC CIP compliance can be a big lift between daily tasks and the governing documentation behind them. Burnt out and looking for a rest? We're happy to step in and carry the load for you! Just looking for a spotter? We'll dig deep into your form and make sure you're working out your compliance program in a secure, sustainable manner.

Click below to read about how we can integrate into your team and provide the support that **you** need both "in the program" and "on the program"!

Case Study - Fully Embedded NERC CIP Support

New Hire Spotlight - Jenn Fox

NST is excited to announce the newest member of the team, Jenn Fox! Jenn joins the NSTeam with over 25 years of experience in security and intelligence work internationally, including 5 years focused on cyber security. Jenn received an MBA from Villanova before discovering her love for more technical, hands-on work, leading her to pursue a cyber security analyst certification from the University of Maryland. While working towards this certification, Jenn entered the NERC CIP world with a focus on Change Management and PNC investigations.

More recently, Jenn has enrolled in a Master of Science in Engineering program in cyber security at George Washington University and expects to graduate next year.

Jenn loves to learn and has no plans to stop after that. When she's not working or engaging in her own education, you might find her spending time coding with her son!

Welcome to the team, Jenn :)

Check out Jenn's full bio here!

Events on the Radar
