Credit/Debit Card Information

This form will be deleted once the transaction has been completed.

Card Number

Expiration Date

Card Security Code

Billing Zip Code

At times, we use authorization holds to verify that the amount is available on the card. Although this does not remove money from the account, many banks/issuers do not allow use of these funds for a period of time based on the policies of the bank/issuer. AIESEC US is not responsible for any claims, losses, expenses or fees incurred because these funds are unavailable.

The card security code (CSC) is usually a 3 - or 4 - digit number, which is not part of the credit card number. The CSC is typically printed on the back of a credit/debit card (usually in the signature field).

CSC is known by different names with the different card associations: to Visa as the Card Verification Code (CVV2); to MasterCard as the Card Validation Code (CVC2); and finally to American Express as the Card Identification Number (CID).
