# POSEIDON OWN QUARRY

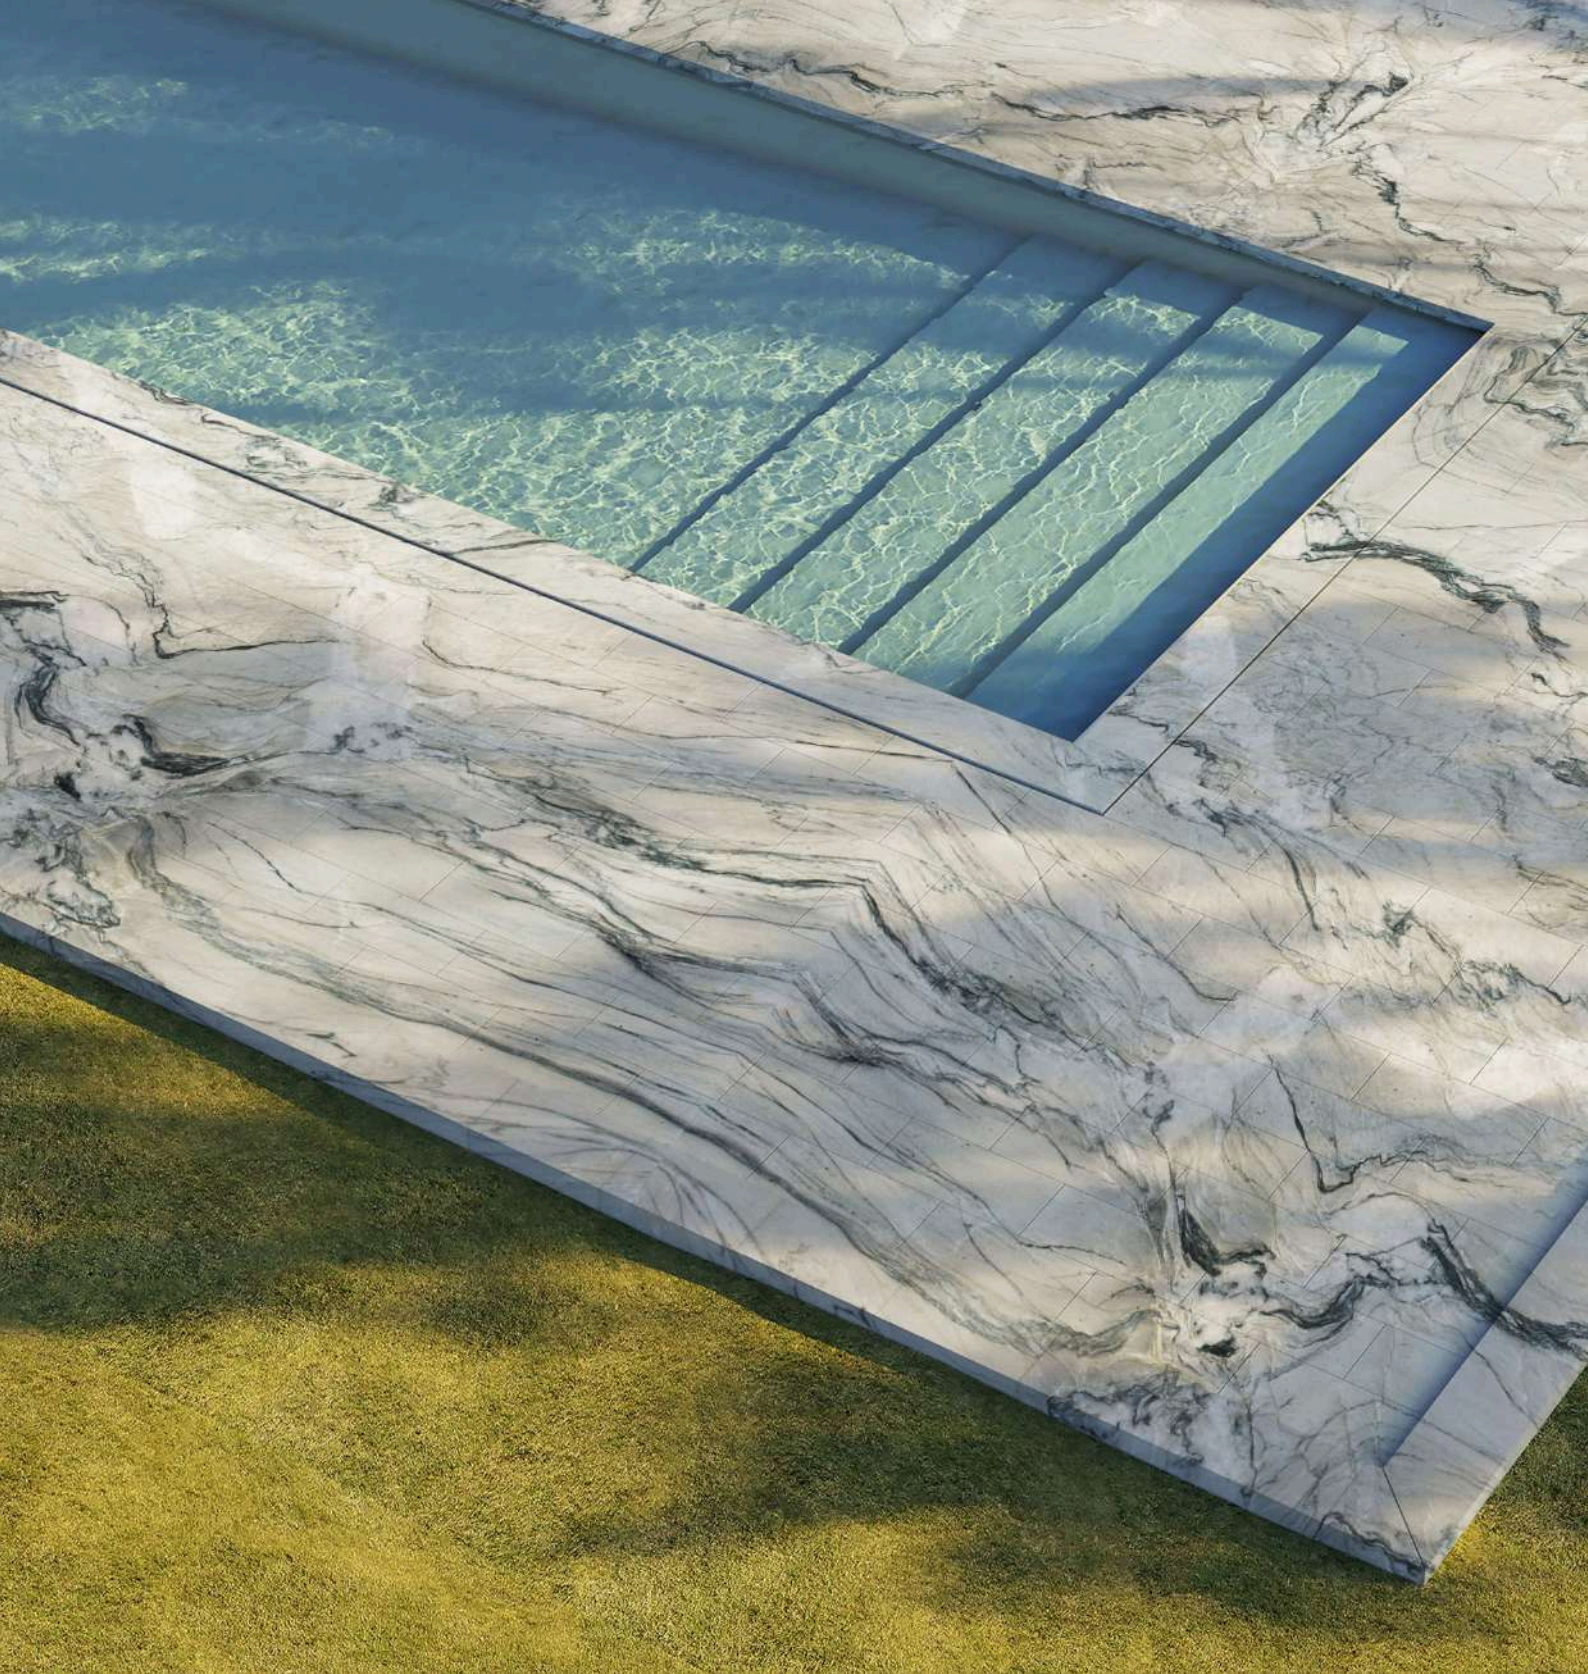

Poseidon, the great God of the seas, has always been known to provoke sea storms and command the waves of the entire sea.

Just like the turbulent waves on the beach on stormy days, our quartzite carries its forms of the movement of the sea that only Poseidon could provoke.

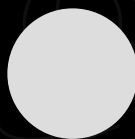

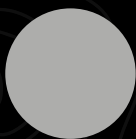

Its colors remind us of the Spanish island of Gran Canaria, which has a large statue of Neptune, which remains underwater and allows the lord of the seas to observe his kingdom from his watchtower.
