Equipment & Multi-Media Racks

Designed, Fabricated & Assembled in Canada

The Ultimate Foundation for Your Audio System

We believe the listening room itself is the most overlooked yet crucial element in achieving truly rewarding sound. Once the room's acoustic parameters are properly managed, the next vital factor is the foundation—the surface on which your system rests. Tri Art Equipment and Audio Racks marry the natural tonal harmony of bamboo with handcrafted resonance tuning. The result—musical blackness, noise-free, vivid detail, and the musicality that makes for a rewarding listening session.

Everything By Design

- Solid 3 ply bamboo shelves and uprights
- Each shelf tuned to a frequency null
- Solid polished brass insert pucks
- Stainless steel thumbscrews mated to knurled nut polished brass
- Stainless steel adjustable spikes

Tri-Art Audio Racks redefine high-end audio furniture with exceptional value and craftsmanship. The result is furniture that is not only visually stunning but also acoustically transparent, giving your components the foundation they deserve and allowing your system's true musical character to shine.

Crafted from Bamboo

Our audio racks are crafted entirely from solid, precision CNC-machined, three-ply carbonized, constrained bamboo, including the uprights, shelves, and back supports. Unlike common furniture made from MDF or plywood with a thin veneer, every component in our racks is genuine laminated bamboo—selected for both its striking natural beauty and its superior acoustic behavior.

Resonant Pressure Release Aperture (RPRA)

Each shelf goes a step further: it is sonically tuned and features a Resonant Pressure Release Aperture (RPRA), a precisely engineered vent that optimizes the material's response to vibration. By leveraging the natural acoustic synergy of copper, brass, and bronze, every shelf is hand-tuned to a specific frequency null to control resonance at the source. Every piece passes through our designer's hands for fine-tuning, ensuring perfect balance and consistency.

Isolation Feet

Each base of the Equipment Rack features adjustable stainless-steel thumbscrews and knurled polished-brass nuts seated on elegant brass flanges, with precision spikes extending up to 1.25 inches. (most elements are milled inhouse by Tri-Art Audio)

Our Signature Sound

Bamboo imparts a warm natural sound, free of such artifacts. The high level of craftsmanship in the woodworking is immediately evident and the sheer beauty of bamboo equipment racks is apparent every time you walk into the room.

The synergy between bamboo's organic damping qualities and the RPRA's acoustic refinement enhances realism, dimensionality, and tonal depth. Listeners experience a striking blackness between notes, along with heightened vibrancy in vocals and instruments—an audible openness that reveals the soul of the music itself. The result is more than furniture—it's a meticulously designed audio foundation that supports your system both physically and sonically, allowing your components to perform at their absolute best.

Finish Options

Tri-Art Isolation Platforms are finished with a hand rubbed oil application formulated in our lab. The supplied spikes cups are finished to match.

Options available: Natural, Natural+Black, Black+Natural, Graphite, Distressed Black, Black

Spike Cups

A set of 4 Spike Cups are supplied with Tri-Art Equipment Racks. Optional finishes available to match Racks. In addition to floor protection, the Spike Cups control vibrations and harmonics providing isolation and aid in the distribution of compressed air.

Available Sizes

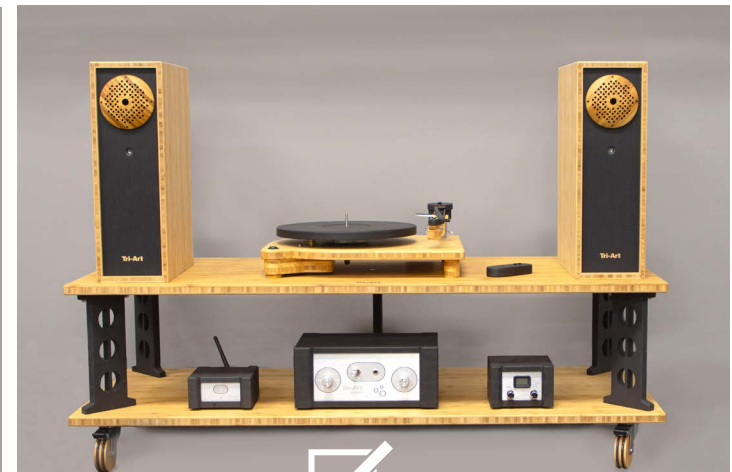

Multimedia Rack Dimensions

↑	Castor Height:	4"	(10.16cm)
↑	Height:	25 ¾"	(64.40cm)
↓	Width:	46"	(91.44cm)
↓	Depth:	18 ¾"	(47.63cm)
↑	Distance Between Bottom Shelves:	11 ¾"	(28.42cm)
↑	Distance Between Top Shelves:	9.2"	(28.42cm)

Equipment Rack Dimensions

↑	Height (2 Shelf):	21 ¾"	(55.25cm)
↑	Width:	30"	(76.20cm)
↓	Depth:	18 ¾"	(47.63cm)
↓	Distance Bottom Shelves:	11 ¾"	(28.42cm)
↓	Distance Between Top Shelves:	9.2"	(28.42cm)
↑	Distance Between Shelves (2Shelf)	9.2"	(28.42cm)

*Add 9.2"(28.42cm) to height per additional shelf

Customize

Our racks are customizable. The number of shelves and stain finishes to display and enhance your audio system are available by Tri-Art Audio.

Flatpack Shipping

The equipment racks are flat packed for easy shipment and/or storage.
