Say hello to GWM.

GWM is a world-renowned vehicle manufacturer capable of designing and producing SUVs, utes and powertrains simultaneously. At GWM, everything we do is grounded in our corporate philosophy: ‘improving little by little every day.’

From building world-class research and development systems, which enable continuous innovation, to following the ‘excessive investment’ principle, which drives industry leadership, we relentlessly put our philosophy into practice. With nearly 8 million sales to date, in more than 170 countries (and counting), we are the No. 1 SUV brand in the world’s largest market and have been for the past 9 years.

Our brand vision is to pioneer global mobility solutions, which use innovative technology to deliver a more pleasurable driving experience. Through innovation and global collaboration, we continue to improve our vehicles’ reliability, safety, performance, design and technology.

Ready to make the switch to electric? Meet the ORA 5. This next-generation compact crossover brings a fresh wave of choice and plenty of serious everyday versatility, it feels just as much at home weaving through city streets, music playing, as it does cruising down the highway, windows down.

It hits all the right notes on the road, too. A punchy 150kW motor serves up that perfectly smooth, instantly responsive acceleration EVs are famous for. Range anxiety? Not here. With up to 435km of driving range (WLTC)* and fast-charging capability, it makes daily driving child's play. Add in clever tricks like Vehicle-to-Load (V2L) functionality to keep your gear powered up wherever you park, and the ORA 5 proves that ditching the petrol pump is an absolute no-brainer.

* Indicative driving range using the WLTC test procedure. Figures obtained after the battery was fully charged. Figures stated for the purposes of comparison amongst vehicles tested to the same technical procedures only. Actual real world driving range may vary depending on factors such as battery age and condition, driving style, use of heating/cooling, traffic conditions, weather conditions, any accessories fitted and vehicle load.

Born from nature. Electric performance. Introducing the future of fun.

It's not every day an electric vehicle rolls up with this much style and swagger. Then again, a look this good doesn't happen by accident. From its confident curves to tail lights inspired by the break of dawn over the horizon, the ORA 5 is your ultimate on-road statement piece, built to turn heads and keep the good times rolling.

Overseas model shown.

A car with aura. A car with mORA.

The ORA 5 doesn't do boring. Rocking super-smooth flowing curves (sculpted using clever G3 continuity, if you want to get technical), the vibe is seamless and seriously fun. It perfectly blends classic retro car charm with future-forward flair, complete with a signature brake light bar and cheeky LED tail lights cleverly hiding right behind the tailgate glass.

But there is mORA to love than just a pretty face. It slices through the wind with air resistance as low as 0.276Cd, using an active grille shutter and slick aerodynamics to stretch your EV range right up to 435km (WLTC)*.

That means you can go a little mORA, for a little longer. Oh, and it actually packs a spare tyre in the boot. Because nobody wants a flat to ruin a perfectly good adventure.

Step inside and things get even cosier. Plush, power-adjustable leatherette seats* bring the comfort, while that retro-cool two-spoke designer steering wheel adds a touch of play to every single drive. We have made sure the screens, electronic dials, and instruments are placed exactly where your hands and eyes expect them to be, making the whole setup feel easy, intuitive, and delightfully ORA 5.

*Ultra variant only

Technology that does mORA.

Why waste time turning keys? The ORA 5 skips straight past the formalities. Just hop into the driver's seat, tap on the brake, drop it into Drive, and you're off.

Once you're rolling, there's plenty of smart tech to help you live a little mORA. Our Coffee OS is the master of ceremonies, powering a massive 14.6" multi-touch infotainment screen in stunning 2K resolution, while a sleek 10.25" digital cluster serves up exactly what you need to know, when you need to know it. Throw in the retro-cool two-spoke multi-function steering wheel, seamless Apple CarPlay®, mood-matching ambient lighting*, and the ultimate remote-control Telematics App, and you've got a digital playground to slide right into.

The cleverness doesn't stop at the cabin doors, either. With a 360° Surround View Camera, an "X-ray style" Transparent Chassis Camera, and zero blind spot technology, tight manoeuvres and parallel parking are officially a piece of cake. Hate stop-and-go traffic? 3 levels of brake regeneration has your back. Heading out for the weekend? Hit Camping Mode and use the V2L (Vehicle-to-Load) capability to plug in your gadgets in the wild. From the daily commute to weekend escapes, the ORA 5 is fully charged and ready to play.

Play. Safe.

Like all GWM vehicles on Aussie roads, the ORA 5 takes looking after you seriously. Think of it as having a hyper-aware co-pilot on board. It comes loaded with a comprehensive suite of safety systems designed to protect you and everyone else around you. We're talking Camera-based Driver Drowsiness Detection to help alert you when signs of fatigue are detected, Traffic Sign Recognition so you never miss a change in the rules, and Intelligent Adaptive Cruise Control to take the edge off your commute. Throw in Lane Keep Assist, Lane Departure Warning, Rear Cross Traffic Alert, and those all-seeing 360° cameras serving up a complete view of your surroundings, and the ORA 5 practically has a sixth sense. It all combines to give you total peace of mind, so you can just enjoy the drive knowing GWM has your back — and the backs of everyone else out there.

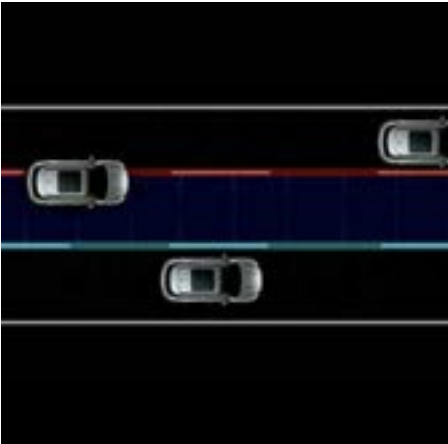

Lane Keeping Assist and Lane Centre Keeping

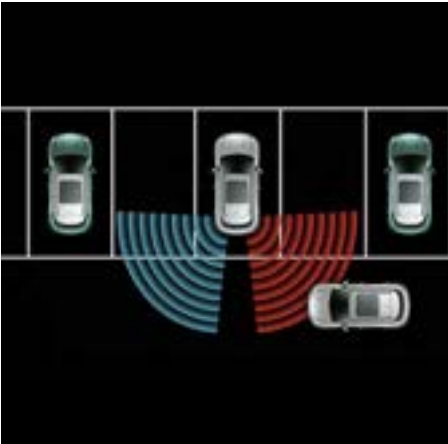

Camera detects lane markings and keeps the vehicle centred.

Lane Departure Warning

Alerts and nudges the steering wheel back when the vehicle begins to drift.

Rear Cross Traffic Alert

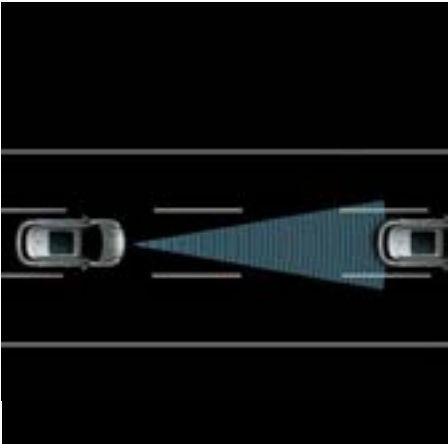

Detects approaching vehicles from the sides when reversing and alerts and brakes to mitigate collisions.

360 Degree Camera

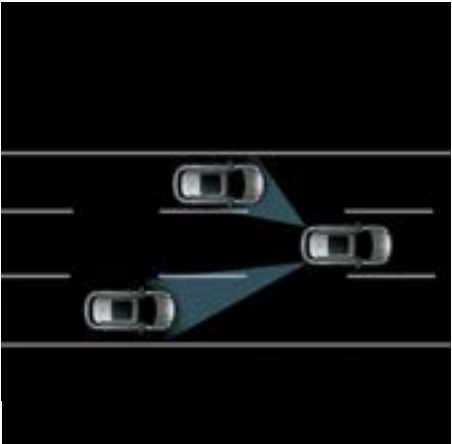

Provides a bird's-eye view of the vehicle to aid parking and manoeuvring in tight spaces.

Adaptive Cruise Control

Automatically adjusts the speed of the vehicle to maintain a safe distance from the vehicle ahead.

Blind Spot Monitoring

Detects vehicles in the driver's blind spot and alerts with visual or auditory signals to prevent collisions.

Overseas model shown.

GWM's entire electrification roadmap is spearheaded by the ORA 5. Powered by a highly efficient and incredibly reliable Lithium Iron Phosphate (LFP) battery, this new energy technology is capable of delivering performance considered as best in class with exceptionally quiet, almost silent, results. Perfect for urban driving with fast charging, and no tail pipe emissions. The direct drive provides responsive take-offs and superior acceleration when you need it, all the while saving on electricity. Backed by advanced technology and safety, the ORA 5 is the next generation of electric vehicles.

Driven By A New Energy - 100% Electric.

GWM Care

Every GWM comes with GWM Care. It begins from the moment you take delivery of your vehicle and continues long into the future. Wherever the road leads, you can rest assured knowing that your GWM will be kept at its best for many years to come.
