WELCOME TO THE FOTON FAMILY

Congratulations on the purchase of your new FOTON TUNLAND from one of the world's leading commercial vehicle manufacturers.

At FOTON NEW ZEALAND, we're committed to delivering an ownership experience that's friendly, efficient, and designed to make your life easier. Real service. Real support. Real care.

If you have any questions about your vehicle or the information contained in this booklet, your local authorised FOTON dealer will be happy to help.

ABOUT THIS BOOKLET

This **Warranty & Service Booklet**, together with the **Vehicle's Instruction Manual** provided with your vehicle, is designed to help you get the most from your FOTON. They explain the key vehicle features, outline essential maintenance requirements, and provide guidance to support safe, reliable, and efficient operation - all with the aim of maximising uptime and reducing unplanned downtime.

This booklet clearly outlines your warranty coverage and responsibilities as an owner, as well as the services available through FOTON New Zealand. It includes essential information regarding service schedules, warranty terms and conditions, exclusions, and support resources.

Please note: While every effort has been made to ensure the information in this booklet is accurate at the time of publication, details may change. For the latest information, please contact your authorised FOTON Dealer or visit www.foton.co.nz

We recommend keeping this booklet in your vehicle at all times, as it will be helpful during servicing and any warranty-related visits.

1. WHY FOTON SERVICE?

Choosing FOTON Service means choosing quality and peace of mind. Our dedicated FOTON Service Network is staffed with trained technicians who are experts in maintaining your FOTON vehicle. They use and recommend Genuine FOTON Parts to ensure your vehicle performs at its best. FOTON specialists also have access to the latest FOTON-specific diagnostic equipment and specialty tools, designed to maintain the high standards of your vehicle.

Properly maintaining your FOTON is important. So when it's time for a service, don't settle for less. Your investment in your FOTON doesn't just stop with your purchase. The FOTON Service Network and their factory-trained technicians are dedicated to helping you get the most out of your vehicle by preserving and enhancing its performance, safety, and retained value.

Only approved FOTON Service Dealer/Agents are qualified to adjust, repair, or replace any defects covered under this warranty, at no cost to the owner.

The service schedule provided in this handbook offers general guidelines for safe vehicle operation under typical conditions. However, if your vehicle is used in severe or extreme conditions (such as very hot or cold weather), more frequent servicing may be necessary. For further details, refer to **Section 13.3**.

Your FOTON is an investment worth protecting. By following the recommended service schedule and using only genuine or approved FOTON Parts & Accessories, you can ensure years of dependable and enjoyable driving from your FOTON vehicle.

2. SCOPE OF WARRANTY

This document outlines the scope of the FOTON New Vehicle Warranty, which is provided by FOTON MOTOR INTERNATIONAL CO., LTD ("FOTON INT.") and administered in New Zealand by Anglesea Vehicle Distributors Ltd, trading as FOTON NEW ZEALAND ("FOTON NZ").

Subject to the terms, conditions, and exclusions set out below, FOTON INT. warrants that if any part of your FOTON vehicle, or any genuine or approved FOTON Part or Accessory, is found to be defective due to faulty factory materials or workmanship within the applicable warranty period, that part will be adjusted, repaired or replaced by an approved FOTON Service Dealer/Agent. This applies only once an approved FOTON Service Dealer/Agent has identified the issue and FOTON INT. has confirmed it is a warrantable defect.

Any defective part(s) shall be retained at the FOTON Service Dealer/Agent for reference.

NOTES:

1. No person or entity other than FOTON NZ is authorised to change, modify, or extend the terms of the FOTON New Vehicle Warranty as outlined in this booklet. Any modifications or additional warranties offered by third parties are the responsibility of the corresponding supplier or vendor, and any claims related to such modifications or warranties must be directed to them.
2. The FOTON New Vehicle Warranty does not cover any compensation for consequential losses or damages to persons, property, or cargo. It also excludes any costs related to accommodation, meals, telephone calls, unauthorised towing, hire charges, or repairs carried out after the expiry of the applicable warranty period.
3. Additionally, the FOTON New Vehicle Warranty does not apply to any FOTON vehicles that have been exported from or operated outside of New Zealand, or to any vehicles purchased overseas and subsequently imported into New Zealand by any party other than FOTON NZ.
4. The FOTON New Vehicle Warranty does not cover any consequential loss or damage resulting from acts, events, or circumstances beyond the control of FOTON NZ, including but not limited to industrial disputes, strikes, natural disasters, adverse weather conditions, geographic inaccessibility, or the unavailability of subcontractors. These factors may delay, interfere with, or prevent the delivery of warranty services or customer support.
5. No other person or entity, including FOTON Dealers & Service Agents, are authorised to make any statement or representation regarding the quality, performance, features, or suitability of any FOTON product that differs from or is inconsistent with any official FOTON NZ documentation or published materials. FOTON NZ does not accept responsibility for any unauthorised claims, assurances, or undertakings made by third parties.

3. MODEL & VARIANT APPLICABILITY

This handbook sets out the warranty and service information for **FOTON Light Commercial Vehicles** and genuine or approved **FOTON Parts & Accessories** imported by FOTON NZ. Due to specification differences between models and variants, some information may not be relevant to your FOTON vehicle.

For more information please consult your local authorised FOTON Dealer.

4. WARRANTY START DATE

The FOTON New Vehicle Warranty cover begins on the **Date of First Sale**, which is defined as the earliest occurrence of any of the following:

- The date the vehicle is **first registered** in New Zealand for road use; or
- The date the vehicle is first put into **use** (including demonstrator vehicles); or
- The date **ownership is transferred** to a third party outside of FOTON's authorised Dealer Network (e.g. private or fleet sale), as per the contract of sale or vehicle title transfer.

If a vehicle has been sold yet none of the above apply, then the warranty shall commence no later than 12 months following the date the vehicle was paid for in full.

This date marks the official start of the warranty period and will be used to determine coverage eligibility.

5. PARTS & ACCESSORIES WARRANTY

FOTON offers the following warranty coverage for genuine and approved parts and accessories imported and distributed by FOTON NZ and sold over the counter by an authorised FOTON Agent.

1. Genuine FOTON Parts sold and fitted by an authorised FOTON Agent are warranted for **24 months or 50,000 km** (whichever occurs first), from the **date of installation**.
2. Genuine FOTON Parts sold by an authorised FOTON Agent but fitted by an independent third party are warranted for **12 months or 25,000 km** (whichever occurs first), from the **date of sale**.
3. Approved FOTON Accessories supplied through an authorised FOTON Agent are warranted for a period of **24 months**. Visit www.foton.co.nz/warranty for further information.

Only genuine or approved parts & accessories that are supplied by FOTON NZ and purchased through an authorised FOTON Agent are eligible for coverage under FOTON's Parts & Accessories warranty. In the event of a manufacturing defect, only the affected part will be replaced. Labour costs associated with removal, installation, or diagnosis are not covered under this warranty. Claims for parts or accessories not sourced or sold through authorised channels will not be accepted.

NOTE:

Any parts replaced under the FOTON **New Vehicle Warranty** are not eligible for separate coverage under FOTON's Parts & Accessories Warranty. Such parts will remain covered only for the remainder of the original New Vehicle Warranty period, which does not reset or extend as a result of the replacement.

6. VEHICLE WARRANTY TYPES

FOTON's New Vehicle Warranty includes the following types of cover, each designed to protect your vehicle against defects in factory materials or workmanship under normal operating conditions in New Zealand. It does not cover wear-and-tear items or any other limitations and exclusions outlined in this booklet.

1. BASE NEW VEHICLE WARRANTY

The Base New Vehicle Warranty covers the factory-supplied components and systems in your FOTON vehicle (excluding consumables) against manufacturing defects in materials or workmanship. It does not include any items subject to wear and tear or otherwise excluded under the terms of this booklet.

2. PERFORATION CORROSION WARRANTY

This warranty covers perforation corrosion (rust-through) of the body panel parts, which is defined as rust that penetrates from the inside to the outside of the original FOTON sheet metal due to defective factory materials or workmanship.

This coverage **excludes** surface corrosion, paint deterioration and rust that results from the following:

- Lack of proper cleaning or maintenance
- Exposure to corrosive substances (e.g. road salts, chemicals, sea salt, etc.)
- Stone chips or damage caused by road debris or other external impacts
- Modifications or repairs not carried out by an authorised FOTON Agent

Any claims under this warranty are subject to inspection and approval by an authorised FOTON Agent.

7. WARRANTY PERIOD

The following warranty periods are subject to the terms and limitations outlined in this booklet. Improper vehicle maintenance, misuse or unauthorised modifications may result in the invalidity of the warranty.

FOTON MODEL	BASE VEHICLE	PERFORATION	GENUINE PARTS	ACCESSORIES
Tunland V7 & V9	7 Years unlimited kms ¹	7 Years unlimited kms ¹	1 / 2 Years 25,000/50,000km ²	2 Years unlimited kms ²

¹ - Refer **Section 6** for Vehicle & Perforation Warranty

² - Refer **Section 5** for Parts & Accessories Warranty

1. WARRANTY EXPIRATION

Where a warranty period is expressed in both time and distance (i.e. Years or kms), then the warranty expiration date shall be determined by whichever limit occurs first. See **Section 4** for more details.

2. EXTENDED WARRANTIES

The warranty periods listed in this section do not include any Extended Warranties which may be available for purchase or offered as part of a promotional campaign from time to time.

3. HEAVY DUTY OPERATION

If a vehicle is regularly used in extreme or heavy-duty conditions (such as off-road use, prolonged idling, extreme climates, or coastal areas), this may result in increased wear or corrosion. Operating in these conditions may limit warranty coverage, particularly where the operating environment is considered relevant to the issue being claimed. See **Section 13.3** for more details.

8. WARRANTY EXCLUSIONS

The FOTON New Vehicle Warranty applies only to defects in material or workmanship. It does not cover wear & tear or any damage, fault, or failure arising from the following situations.

1. WEAR & TEAR

Wear and tear means the degradation of parts or components due to regular use, environmental exposure, or routine operation of the vehicle. Wear and tear is not a manufacturing defect and therefore is not covered by this warranty. Examples include, but are not limited to:

- Minor noise, vibration, or performance changes within commercial tolerances.
- Slight seepage of fluids that does not materially affect quantity or performance.
- Cosmetic or external imperfections not affecting vehicle function.
- Panel gaps within manufacturer limits.
- Any issue that cannot be demonstrated or reproduced.
- Interior and exterior trim deterioration (see **Section 9**)
- Clutch lining, brake pads, shoes, rotors, discs, and drums (see **Section 9**)
- Clutch friction discs
- Window glass (see **Section 9**)
- Batteries <24V (see **Section 9**)
- Suspension bearings, bushes, seals & other rubber suspension components (see **Section 9**)

2. USE & OPERATION

- Use of the vehicle for a purpose or under road or climatic conditions (-20° to 45°C) other than that for which it was designed, including racing.
- Driver negligence, misuse, or abuse (including overloading, tampering, disconnection, towing beyond specifications, or continued operation after fluid loss).
- Accident, impact, fire, theft, war, illegal use, or malicious damage by third parties.
- Environmental conditions such as acid rain, industrial fallout, salt, sand, stones, sap, animal droppings, hail, flooding, earthquakes, lightning, or other natural events.
- Towing or Recovery costs (unless arranged through approved FOTON Service Dealer/Agent)

3. MAINTENANCE & SERVICING

- Any work carried out by persons other than an approved Foton Service Dealer/Agent.
- Failure to service or maintain the vehicle in strict accordance with manufacturer specifications, or to repair promptly after accident, damage, or discovery of a defect.
- Improper repairs, inspections, diagnosis, or adjustments not approved by Foton NZ.
- Use of incorrect, contaminated, or non-recommended fuel, oil, fluids, lubricants, coolants, or water.
- Any costs relating to Scheduled Maintenance or Certificate of Fitness (CoF), which remain the responsibility of the customer.
- Warranty claims will not be accepted if the fault or damage is determined to be the result of insufficient, incorrect, or missed maintenance.

4. MODIFICATION & PARTS

- Modifications or alterations (including to software) not approved by the manufacturer.
- Installation or use of non-genuine parts, accessories, equipment, assemblies, or components.
- Any defect caused by components which are not Foton genuine or authorised parts.

5. ODOMETER & DOCUMENTATION

- Any warranty claim where the odometer or Warranty and Service Booklet has been tampered with.
- Replacement of the instrument cluster without proper completion of the **Vehicle Handover Certificate** at the front of this book by the FOTON authorised selling dealer (including date and odometer.).

6. WATER INGRESS

- Water ingress caused by floods, deep-water fording, or anything else that should exceed the manufacturer limits.

7. LIMITATION OF LIABILITY

Under the New Vehicle Warranty, FOTON NZ does not accept liability for:

- Loss of use of the vehicle
- Costs associated with alternative transportation (including truck or car rental fees)
- Accommodation, lodging, or food expenses
- Telephone or communication costs
- Damage to goods or cargo
- Commercial loss or loss of income
- Loss of time or inconvenience
- Any other incidental or consequential damages or expenses

These limits apply in so far as the maximum permitted by law.

9. WARRANTY LIMITATIONS

While wear-and-tear components are excluded from general warranty coverage, the following items are provided with limited warranty coverage where failure results from a defect in factory materials or workmanship.

1. TYRES

Tyres are subject to normal wear but are covered under a limited warranty of **6 months or 10,000 km** (whichever occurs first).

2. CLUTCH & BRAKES

Clutch friction linings, Brake pads, linings, discs, and drums are considered wear-and-tear components; however, they are covered under a limited warranty of **6 months or 10,000 km** (whichever occurs first).

3. GLASS

Covered under a limited warranty of **6 months or 10,000 km** (whichever occurs first).

4. BATTERIES (<12V)

Covered under a limited warranty of **6 months or 10,000 km** (whichever occurs first).

5. SUSPENSION

Bearings, bushes, seals, and other rubber or wear-sensitive suspension components are wear-and-tear items. Failures caused by a defect in factory materials or workmanship may be considered for warranty, subject to all standard warranty terms and exclusions.

Actual coverage will vary depending on operating conditions, terrain, and usage intensity. FOTON NZ reserves the right to assess claims based on vehicle history and environment.

6. COSMETIC ITEMS

Cosmetic issues in paint, trim or other finishes that arise from vehicle use, care practices, or environmental exposure are considered wear and tear and are not covered under this warranty.

Damage such as stone chips, cracks, or deep scratches are not covered and should be repaired promptly. Exposed metal may corrode quickly, potentially leading to more extensive damage that is not covered.

Coverage may vary depending on environmental conditions and vehicle usage. However, cosmetic defects that are proven to result from manufacturing faults in materials or workmanship will be covered under the terms of this warranty, subject to assessment and approval by an authorised FOTON Agent.

10. WARRANTY REPAIRS

If your vehicle requires repairs under the FOTON New Vehicle Warranty, please take it to an authorised FOTON Dealer. All authorised FOTON Dealers are equipped and approved to carry out warranty repairs and will repair, replace, or adjust—free of charge—any part found to be defective in factory materials or workmanship.

In some cases, authorised FOTON Service Agents may be able to carry out minor or moderate warranty repairs; however, coverage for repairs completed outside the authorised FOTON Dealer network will only be honored if express prior approval has been obtained from FOTON NZ. FOTON NZ is unable to reimburse the cost of repairs carried out by unauthorised repairers or without prior approval.

11. TRANSFER OF WARRANTY

The FOTON New Vehicle Warranty runs with the vehicle and is transferable from owner-to-owner conditional upon the standard warranty terms as explained in this handbook. If you have just purchased a used FOTON Vehicle, please complete the **Transfer of Warranty** form at the back of this book and send it to FOTON NZ.

Please note that the FOTON New Vehicle Warranty is only available for vehicles officially imported by FOTON NZ. Vehicles imported through other channels are not eligible for warranty coverage. The warranty is also not transferable to other countries, as no reciprocal international warranty arrangement exists.

12. OWNERS RESPONSIBILITIES

1. SCHEDULED SERVICING & MAINTENANCE

As the vehicle owner, you are responsible for maintaining your FOTON vehicle in accordance with the latest Maintenance Check List (MCL). All maintenance services and costs - including the supply/replacement of oils, chemicals, consumables, and parts - are the responsibility of the owner. These costs are not covered by the warranty and must be paid as part of standard vehicle upkeep.

Servicing through the authorised FOTON Dealer Network is strongly recommended, as it ensures your vehicle is maintained to the latest standards using approved procedures and genuine parts.

If servicing is carried out outside the authorised network, it is the owner's responsibility to ensure the vehicle is serviced in accordance with the latest Maintenance Check List (MCL), which can be obtained from an authorised FOTON Dealer.

Failure to complete the required scheduled maintenance, or provide proof of service, may affect warranty coverage and could result in the warranty being voided.

2. SERVICING & MAINTENANCE RECORDS

You must retain evidence that proper maintenance has been performed on your FOTON vehicle, which an authorised FOTON dealer or other service provider must complete. Acceptable proof of service includes a digitally generated tax invoice or receipt that clearly references the vehicle's VIN or registration number, the service date, odometer reading, and details of the parts and materials consumed.

3. RUST, CORROSION & DAMAGE REPAIRS

Rust, corrosion, and damage must be addressed promptly once identified. Regardless of the root cause, these issues can worsen over time, and what may begin as a minor repair can quickly become extensive and costly if left unattended. Neglect or delayed action may affect warranty coverage.

If rust or corrosion is noted during a Warrant of Fitness (WoF) or Certificate of Fitness (CoF) inspection, it must be inspected by an authorised FOTON Dealer within 90 days to determine whether it may be eligible for warranty consideration. Failure to act promptly may result in the issue being excluded from warranty coverage.

4. WARRANTY ASSESSMENTS & REPAIRS

Warranty assessments and repairs must be carried out by an authorised FOTON Agent to ensure the validity of the warranty. It is the owner's responsibility to deliver the vehicle to the nearest authorised FOTON Dealer for such services. This should only be done when it is safe to do so and driving the vehicle will not cause further damage.

13. SCHEDULED MAINTENANCE

Regular servicing, including the timely replacement of certain routine maintenance items and consumables, is essential to maintaining performance and ensuring ongoing warranty coverage. These costs are not covered by the warranty and must be paid as part of standard vehicle upkeep.

1. MAINTENANCE EXCLUSIONS

Some of the routine maintenance items and consumables that are **not covered** under the FOTON New Vehicle Warranty include (but are not limited to):

- Oils, fluids, lubricants, and other service chemicals
- Filters (oil, air, fuel, cabin etc.)
- Rubber components (such as suspension bushes, belts, hoses, and seals)
- Fuses, light bulbs, wiper blades
- Brake pads, brake discs, and clutch linings
- Tyres, batteries (<24v)
- General service items such as wheel alignment, balancing, and adjustments

The frequency of replacement, repair, or adjustment will vary depending on factors such as vehicle usage, driving habits, road conditions, climate, and environmental exposure.

Note: The Maintenance Exclusions list is provided for general guidance and may not be exhaustive. Coverage decisions are subject to the full terms and conditions outlined in this booklet. Some components listed above may have limited warranty coverage under specific conditions. Please refer to **Sections 8 & 9** for more details.

2. SERVICE INTERVAL TIMING

To ensure vehicles are maintained appropriately, FOTON's service intervals are determined by one of the following measurements (whichever occurs first):

- **Distance Travelled** (Kilometers) - i.e. vehicles used for frequent delivery or long distance travel, etc.
- **Time Elapsed** (Months / Years) - i.e. vehicles used seasonally, infrequently or shorter commutes, etc.
- **Engine Operation** (1 Hour=50km) - i.e. vehicles used on work sites with extended idling periods, etc.

Note: The service intervals listed in the Maintenance Check List (**Section 15**) are considered maximum limits. Servicing beyond these limits is considered late and may affect warranty coverage.

3. HEAVY-DUTY OPERATION

If the vehicle is used in demanding environments or applications then more frequent maintenance must be carried out to ensure the validity of the warranty. This is done by appropriately shortening the intervals between scheduled services.

Examples of Heavy-Duty operating conditions include:

- Dusty or unsealed roads
- Extreme heat or cold
- Mining operations (above or below ground)
- Exploration or remote area use
- Coastal environments
- Off-road surfaces

Note: To determine the appropriate service intervals for your vehicle and whether any adjustments are required, always discuss your vehicle's intended use with your authorised FOTON dealer at the time of sale or refer to the Maintenance Check List (MCL).

4. STATIONARY OPERATION

For vehicles with prolonged periods of idling but very little movement (i.e. stationary while operating equipment, etc.), service intervals must be based on **engine operating hours** rather than distance or time. Engine operating hours are calculated as follows:

- **1 Hour = 50 km**

5. REPLACEMENT PARTS

To maintain the validity of the warranty and ensure optimal vehicle performance and safety, genuine FOTON components or approved equivalents must be used. The use of non-genuine parts may affect reliability and could void warranty coverage if a failure is linked to their use.

6. MAINTENANCE CHECK LISTS:

The Maintenance Check List in this handbook is specifically tailored for New Zealand operating conditions and must be followed, even if it differs from the schedule provided in the vehicle's Instruction Manual.

The service intervals listed in the Maintenance Check List (**Section 15**) are considered maximum limits. Extending these limits (late servicing) may affect warranty coverage.

Note: FOTON may update servicing requirements without notice to improve vehicle performance and longevity. Always consult your authorised FOTON Dealer for the latest service and maintenance schedule for your vehicle.

14. WHEN USING THE JACK

1. BEFORE YOU START

- Park the vehicle on a flat, hard surface like concrete or asphalt.
- Place the vehicle in "Park" and engage the handbrake.
- Use wheel chocks to block the wheels on the ground and prevent rollaway.

2. JACKING THE VEHICLE

- Check the jack is in good working order and vehicle doesn't exceed its weight capacity.
- Position the jack underneath the vehicle and begin slowly lifting until the tyre is just off the ground.
- All occupants should exit the vehicle before attempting to lift it with the jack.

WARNING!

- Never get under a vehicle while it is being supported by a jack or you risk being crushed or trapped!
- Always refer to the Vehicle Instruction Manual for correct jack positioning points and safe working load capacity.

RECOMMENDED FLUIDS

ENGINE	COOLANT	TRANSMISSION	REAR DIFF	FRONT DIFF	TRANSFER CASE
C3 (5W-30)	Pink OAT/ELC	ZF Lifeguard 8	GL-5 (80W-90)	GL-5 (80W-90)	ATF-VI (Mercon LV)

16. RECOMMENDED CHECKS

To ensure reliable operation of your FOTON vehicle and prevent unnecessary wear or damage, the following checks should be performed regularly. We recommend doing these when **refueling or every 1,000 km** (whichever comes first):

1. OUTSIDE THE VEHICLE:

- ☐ Tyre pressures (refer to tyre placard on door pillar for recommended pressures)
- ☐ Tyre Condition (tread depth, cracks/damage or abnormal wear)
- ☐ Wheel nuts (indications of looseness or damage)
- ☐ Condition and operation of all lights/lamps
- ☐ General condition of vehicle (external projection, loose components)
- ☐ All latches/doors and load are secure
- ☐ Check expiry dates of RUCs & Registration
- ☐ Water separator (if applicable)
- ☐ All camera lenses are clean (if applicable)
- ☐ Fuel & AdBlue caps are secure

2. UNDER THE BONNET:

- ☐ Fluid Oil Levels (Engine, Power steering, Brake Fluid, Coolant etc.)
- ☐ Loose or damage drive belt (if applicable)
- ☐ Indication of leaks (fuel, oil, coolant etc.)
- ☐ Battery and cable condition

3. INSIDE THE VEHICLE:

- ☐ Check gauge levels (fuel, AdBlue, battery charge, air pressure etc.)
- ☐ Check for illumination of Malfunction Indicator Lamps (MIL) or fault codes
- ☐ Operation & effectiveness of Park Brake
- ☐ Operation & effectiveness of Windshield wiper & washers
- ☐ Operation & effectiveness of Horn
- ☐ Operation & effectiveness of rearview mirrors
- ☐ Operation & effectiveness of doors & locks
- ☐ Condition of Windscreen
- ☐ Condition of Seatbelts
- ☐ Check expiry dates of WoF and Maintenance schedule decals
- ☐ Any loose items are secure

4. DRIVING THE VEHICLE: *

- ☐ Operation & effectiveness of brakes
- ☐ Operation & effectiveness of Steering Operation
- ☐ Abnormal noises or vibrations

* **Caution:** The recommended checks while driving should only be carried out when it is safe to do so.
